

No.	Description	Description	Carbon Management - Offers carbon management solutions in terms of measurement, reduction and reporting.	Sustainability Certification - Consultancies to help navigate your certification journey.	Sustainability Reporting - Holistic report on company's environmental, social and governance (ESG) impact of their activities.
1	<a href="#">ACT Commodities</a>	ACT's end-to-end decarbonisation and environmental impact solutions helps organisations to efficiently measure, reduce, mitigate, monitor, and disclose their carbon footprint to achieve their goals. ACT also offers comprehensive solutions for organisations to meet complex environmental regulations set by authorities at regional, national, and international levels on a global scale.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
2	<a href="#">Affirmo Technology</a>	Affirmo Technology Pte Ltd uses AI, Analytics, Big Data Management and IoT to help companies in their digital transformation, innovation and sustainability journeys. Their solutions include: 1. Real-time monitoring and optimisation of manufacturing operations for ESG Sustainability and Efficiency using AI, Data Analytics, IoT and Wireless (Real-time Operations AI Platform) 2. Monitoring and reduction of energy consumption for buildings and manufacturing operations.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

3	<a href="#">Asuene</a>	Asuene offers enterprise software coupled with consultations with Greenhouse Gas (GHG) experts to measure, reduce and verify companies' scope 1-3 carbon emissions.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
4	<a href="#">ByteGenie</a>	ByteGenie provides an operating system for ESG data & analysis tasks, all the way from data collection, processing, to advanced analytics. Their proprietary AI models are able to turn messy and unstructured data into standardised and meaningful performance metrics, enabling economically relevant and financially material research.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
5	<a href="#">Circular Unite</a>	Circular Unite's range of sustainability solutions equips businesses to navigate the complex landscape of waste management and recycling. Their Core product N.A.T.A.L.I.E. revolutionizes waste management with advanced machine learning and data analytics, offering insights for effective waste reduction and recycling. Its algorithms help businesses to streamline processes and minimise contamination.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
6	<a href="#">CO2X Enterprise</a>	CO2X Enterprise Platform is a solution that provides and automated means of helping transporters (currently focused on road transportation) to calculate their Scope 1, 2, and even 3 GHG emission through IoT Sensors.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

7	<a href="#">Covene ESG</a>	<p>Convene ESG is a digital sustainability reporting and carbon management solution that automates ESG data collection (via OCR, SFTP, APIs etc.) and workflows for greater data auditability, while greatly reducing human errors with its data validation processing.</p> <p>Enterprises can generate robust reports aligned with global ESG frameworks and regulatory provisions, including SGX, GRI, TCFD, HKEX, POJK, PH SEC, Bursa Malaysia, UK SRS, ISSB etc. These standards are regularly updated to ensure compliance and relevance for enterprises to future-proof and manage any potential gaps.</p> <p>Convene ESG also has an in-built carbon calculator that allows enterprises to measure and track their scope 1, 2, &amp; 3 carbon emissions with country-specific, sector-specific, and global emission factors (IPCC, US EPA, UK Defra, and IGES). Oversee everything – track ESG goals, benchmark against peers, and do mandatory internal reviews with ease.</p>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
8	<a href="#">EAMD INTERNATIONAL</a>	<p>EAMD INTERNATIONAL is a specialized consulting and training firm dedicated to empowering organisations to achieve excellence in Quality, Environment, Health &amp; Safety, and Sustainability. This includes areas in sustainability and ESG consulting, management system certification, training and capacity building, and energy management and efficiency.</p>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

9	<a href="#">EnergiTranz</a>	<p>EnergiTranz provides Sustainability Consultancy services to organisations in the APAC region.</p> <p>EnergiTranz's Sustainability-as-a-Service (SaaS) framework comprises 5 key service pillars: Green Electricity Procurement, ESG Reporting &amp; Independent Verification, Sustainability Transition Pathway, Solar PV Deployment, RECS &amp; Carbon Credits Procurement. CorpCarbon Web Application is EnergiTranz's proprietary solution which empowers organisations to Measure, Monitor and Reduce their Scope 1, 2 and 3 emissions via intuitive dashboards and infographics periodically.</p>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
---	-----------------------------	---	-------------------------------------	--	-------------------------------------

10	<a href="#">ESGpedia</a>	ESGpedia Nexus manages your business units/suppliers' data and helps you create ESG-Standard reports without massive IT investments. Easily onboard suppliers and portfolio entities with your own co-branded landing page, into our easy-to-complete ESG assessment as part of the UNESCAP ESNB program, and leverage on our embedded GHG calculator with a continuously updated, localised and expanding Emission Factor Database covering industry standard and ISO14064 methodologies. Compile full internal and value-chain ESG data into industry-standard reports (ISO, GRI, ISSB, local regulatory standards etc) for external reporting of corporate sustainability.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
11	<a href="#">Evercomm</a>	Evercomm collects verifiable data to derive actionable plans and implement technological activities to achieve carbon emissions, reductions and energy efficiencies. Powered by AI and digital technologies, their solutions come with online dashboards for ESG assurance, 24/7 real-time monitoring and measuring.	<input checked="" type="checkbox"/>		

12	<a href="#">faradai</a>	<p>faradai helps organisations navigate and achieve their net-zero targets through their enterprise software (SaaS) that is able to measure, analyse and reduce emissions.</p> <ul style="list-style-type: none"> <li>- Faradai Energy: IoT-based digital energy management platform to optimise energy efficiency, operational energy, and energy costs.</li> <li>- Faradai Sustain: Automation tools to capture sustainability data for organisations, and transform it into a comprehensive system of record. This solution is also able to track Scope 1, 2, and 3 emissions, providing a holistic approach to sustainability management.</li> </ul>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
13	<a href="#">Global Destination Sustainability (GDS)</a>	Global Destination Sustainability (GDS)- Consulting for Events through development of strategy, marketing/communications, offsetting, consulting, etc.		<input checked="" type="checkbox"/>	
14	<a href="#">Global Green Connect (GGC)</a>	<p>Global Green Connect (GGC) is an integrated sustainability network that combines consulting, academy, and social enterprise. Nine key business offerings:</p> <ul style="list-style-type: none"> <li>• Carbon &amp; GHG Management</li> <li>• Chief Sustainability Officer as-a-service</li> <li>• Circular Economy Integration</li> <li>• Sustainability/ESG Reporting &amp; Assurance</li> <li>• Life Cycle Assessment</li> <li>• Responsible Marketing &amp; Communications</li> <li>• Supply Chain Sustainability</li> <li>• Sustainability Strategy &amp; Roadmap</li> <li>• Sustainable Finance</li> </ul>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

15	<a href="#">GoNetZero™</a>	<p>GoNetZero™ empowers clients worldwide to achieve their net-zero goals. As a global decarbonisation solution provider, it offers comprehensive end-to-end solutions through its digital platform and verified environmental attributes (EAs), including Energy Attribute Certificates and carbon credits. It is the carbon management business of Sembcorp Industries, a Singapore Stock Exchange-listed company.</p> <p>GoNetZero™'s suite of digital solutions includes Measure - which enables clients to begin their net-zero journey by assessing their organisations' emissions; Manage - which allows clients to view, manage, and retire their EAs portfolio seamlessly on a single platform; and Perform - which helps clients maximise the output and lifespan of their renewable energy assets across multiple sites on a single dashboard. Additionally, GoNetZero™ provides custom solutions tailored to clients' decarbonisation needs.</p>	<input checked="" type="checkbox"/>		<input type="checkbox"/>
----	----------------------------	---	-------------------------------------	--	--------------------------

16	<a href="#">GreenA</a>	<p>GreenA provides solutions in the areas of Green Reporting, Certification, Environmental Studies, Protocol Development, and Environmental Audits.</p> <p>They work with organisations to achieve sustainability goals; from green building certifications advisory (eg. LEED, ILFI, Green-Mark) to implementing energy-efficient systems and policies to facilitate zero-waste towards a circular model.</p>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
17	<a href="#">GreenFi</a>	<p>GreenFi is a SaaS based ESG Risk &amp; Due Diligence Software. Their platform helps Financial Institutions and Corporates with ESG Due Diligence, Risk Assessments &amp; Automated Decisioning for Sustainable Investments. The ESG AI platform helps Banks to increase origination of sustainable financing, thus SMEs get increased access to capital for transitioning to sustainable operations.</p>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

18	<a href="#">Greenprint (Gprnt)</a>	<p>Greenprint (Gprnt) tackles the global ESG data gap by equipping businesses of all sizes with tools to collect, report, and take action on their sustainability data.</p> <p>The Gprnt Disclosure tool is designed to offer a simple, automated, generative AI (artificial intelligence)-powered solution to easily measure businesses' Scope 1 and 2 emissions. The Gprnt platform will be integrated with government databases and private sector solutions, so that SMEs can easily calculate their basic emissions.</p> <p>Gprnt Disclosure is free for all businesses' individual use, with users retaining full control over their data and whom to share it with. For a fee, the tool can also be customised and deployed by larger organisations to collect data from their value and supply chains, and support their Scope 3 reporting efforts.</p>			<input checked="" type="checkbox"/>
19	<a href="#">Greenview</a>	Greenview advises companies from across the hospitality sector on ESG matters, including how to set up programs, maximize performance, set goals and targets, improve rankings and ratings and effectively communicate to internal and external stakeholders.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

20	<a href="#">Miniwiz</a>	Miniwiz offers circular ESG upcycling solutions, products and services across the real estate value chain. Their core technology (A) LCA software, (B) building system (C) upcycling machines, captures the value of B-C single- use plastic, metal, glass, fashion, B-B construction demolition and other industry waste stream by upcycling trash into modular building products, fixtures, and medical certified modular construction system at scale	<input checked="" type="checkbox"/>		
21	<a href="#">MVGX Tech</a>	MVGX is green fintech group providing regulated financial services and end-to-end carbon Software-as-a-Service solutions for a more inclusive and sustainable future. Compliant by design, MVGX's subsidiaries hold licenses from the Monetary Authority of Singapore including the Recognised Market Operator license, Capital Market Services license, and Major Payment Institution license.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
22	<a href="#">Novata</a>	Novata's technology platform makes navigating the ESG landscape simple for private markets by identifying a clear starting point for selecting the metrics that matter, streamlining data collection, and contextualizing data to drive reporting and action. Novata is backed by the Ford Foundation, Hamilton Lane, Microsoft, Northern Trust, Omidyar Network, and S&P Global.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

23	<a href="#">Paia</a>	Paia is sustainability consulting firm focusing on sustainability strategy, implementation and reporting in the South East Asian context.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
24	<a href="#">Palo IT</a>	PALO IT is a global technology consultancy that designs, develops and scales digital and sustainable products and services to unlock value across the triple bottom line: people, planet, profit. The PALO IT Impact Tracker is a comprehensive ESG data platform designed to streamline ESG reporting. It offers a practical alternative to traditional ERP systems and limited front-end interfaces by utilizing an ESG Data Lake. This system integrates seamlessly with your organization's existing infrastructure, using a library of connectors to extract data from internal systems.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
25	<a href="#">Persefoni</a>	Persefoni is a Climate Management & Accounting Platform (CMAP). The company's Software-as-a-Service solutions enable enterprises and financial institutions to meet stakeholder and regulatory climate disclosure requirements with trust, transparency, and ease. The Persefoni platform provides users a single source of carbon truth across their organisation, enabling them to manage their carbon transactions and inventory with the same rigor and confidence as their financial transactions.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

26	<a href="#">Peterson Solutions</a>	Peterson Solutions is a global sustainability advisory firm. Their services include ESG strategy, sustainable sourcing, certification support, technology solutions, and sustainability training. They help organizations implement practical and impactful sustainability strategies aligned with international standards, and in sustainable tourism, they support clients in achieving globally recognized certifications such as GSTC and Green Globe.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
27	<a href="#">Resync</a>	Resync provides AI-powered energy solutions for smarter and greener building. They use a combination of machine learning models and deep technical knowledge of energy systems to ensure system efficiency, optimised performance, savings on electricity bills and reduction of overall carbon footprint.	<input checked="" type="checkbox"/>		

28	<a href="#">Rimm Sustainability</a>	<p>Rimm's sustainability management platform, myCSO, an end-to-end suite of sustainability solutions designed to simplify your company's sustainability reporting and performance tracking, all in one place. MyCSO helps small businesses measure, record, implement and assess actions that aid the delivery of more sustainable business operations, ultimately driving growth. The platform's key features include:</p> <ul style="list-style-type: none"> <li>• One-click assessments, reports and analytics aligned to global sustainability standards to highlight the key areas your company needs to focus on to boost your performance</li> <li>• Strengthen your company's positioning and strategy in your industry by benchmarking your performance against data on over 20,000 companies</li> <li>• Analyze your company's risks - and be prepared for any situation such as changes in stakeholder and regulatory expectations</li> <li>• AI driven tools to assist with data collection and analytics</li> </ul>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
29	<a href="#">QuESH</a>	<p>QuESH provides consultancy services to help firms redesign their internal processes and develop an Event Sustainability Management System (ESMS) that is in accordance to ISO20121.</p>		<input checked="" type="checkbox"/>	

30	<a href="#">reXtore</a>	reXtore is a design and build company specialising in highly experiential, sustainable and zero waste spaces. Their main focus is on the exhibition, events and commercial interior sectors.	<input checked="" type="checkbox"/>		
31	<a href="#">Singapore Environment Council (SEC)</a>	The Singapore Environment Council (SEC) is an independently managed, non-profit, non-governmental organisation (NGO) endorsed by global bodies (e.g. UNEP, GEN, IGPN) and sustainability networks. SEC provides a range of sector-specific Eco Certifications. These include Eco-Office, Eco-F&B, Eco-Retail, Eco-Events Certifications and Green Labels for industrial and commercial products.		<input checked="" type="checkbox"/>	

32	<a href="#">Sigma Sustainability Institute (SSI)</a>	<p>Sigma Sustainability Institute (SSI) provides consulting, programme management and education services in the area of sustainability and performance management.</p> <p>Technologies that integrate into businesses' existing operations, such as:</p> <ol style="list-style-type: none"> <li>1. Command and Control Centres (CCC): CCC are sophisticated hubs that monitor and manage the operations of a facility or multiple facilities. They use real-time data to oversee systems such as security, building management, and energy use, ensuring optimal performance and quick response to any issues.</li> <li>2. Smart FM (Facility Management): Smart FM refers to the use of digital tools and systems to improve the management of facilities. It encompasses predictive maintenance, energy management, and space optimisation, aiming to reduce costs and improve the functionality of the workspace.</li> </ol>	<input checked="" type="checkbox"/>		
----	--	---	-------------------------------------	--	--

33	<a href="#">South Pole</a>	South Pole develops and implements comprehensive emission reduction projects and strategies that turn climate action into long-term business opportunities for companies, governments, and organisations around the world. Services include Sustainability strategy (measure footprint, set targets & create roadmap, reduce footprint, finance climate action, communicate & lead); Climate solutions (renewable energy, circular economy, digital solutions); Climate investments (climate funds, carbon investments, sustainable infrastructure); Action platform development.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
34	<a href="#">Terrascope</a>	Terrascope is an end-2-end decarbonisation platform to help companies measure, reduce and report their carbon emissions. We guide companies on the most impactful actions they can make on the journey to decarbonisation, starting with a comprehensive measurement of scope 1, 2, 3 emissions that is 5x faster and more accurate than conventional efforts.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
35	<a href="#">The Lumiere Consultancy</a>	The Lumiere Consultancy (TLC) provides practical and actionable advisory & consultancy services, enabling hospitality companies to establish a robust sustainability framework and embark on their journey towards achieving carbon neutrality.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

36	<a href="#">Turnkey</a>	<p>Turnkey is a software provider in sustainability, focussing on ESG and risk management, providing key areas of support – including data collection and reporting, consultancy and analysis of ESG metrics, and framework reporting in over 7000 locations across 46 countries.</p> <p>Turnkey's Sustainion™ cloud solution platform allows businesses to automatically collect and aggregate data from multiple sources in their business and supply chain. The data is then mapped against all the relevant regulatory reporting requirements and frameworks; and the built-in data analytics provides clients with complete visibility, simplified reporting and alignment with their ESG and business strategies.</p>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
----	-------------------------	---	-------------------------------------	--	-------------------------------------

37	<a href="#">WeavAir</a>	<p>WeavAir offers a business intelligence solution for energy-efficient, low-carbon and safe operations.</p> <p>WeavAir's digital platform allows direct measurement, reporting and verification of greenhouse gas emissions that helps organisations in their ESG investment decision-making, energy transition implementation and financing.</p> <p>WeavAir offers modular &amp; continuous data acquisition systems combining networks of satellites, drones and IoT devices to track greenhouse gas emissions, energy efficiency, maintenance, operations &amp; climate risk parameters.</p>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
38	<a href="#">Workiva</a>	<p>Workiva (formerly Sustain.Life) streamlines the full lifecycle of measuring, managing, and reporting carbon emissions. Workiva brings customers' financial reporting, Environmental, Social, and Governance (ESG), and Governance, Risk, and Compliance (GRC) together in a controlled, secure, audit-ready platform.</p>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

39	<a href="#">Univers</a>	Univers (formerly known as "Envision Digital") help organisations optimise energy systems and reduce carbon emissions with accurate, reliable, and actionable decarbonisation data. Their EnOS system connects on-the-ground operational technology and in-the-cloud intelligence to deliver real-time energy data and data-driven carbon monitoring, reporting, and abatement.	<input checked="" type="checkbox"/>		
40	<a href="#">Unravel Carbon</a>	Unravel Carbon is an AI-powered decarbonisation platform that helps companies measure, track, reduce, and report their carbon emissions. It measures a company's full supply chain carbon profile in weeks, generates reduction pathways and auto-populates regulatory disclosure reports.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
41	<a href="#">Zuno</a>	Zuno provides end-to-end carbon management solutions that helps organizations measure, offset, and reduce emissions by integrating across your business value chain to collect activity data. Companies can calculate their carbon footprint in real-time using real activity data automatically collected across value chain for all scopes and activities, enabling companies to plan and execute the right carbon reduction strategy.	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
Others					

42	<a href="#">Food waste management solutions</a>	Includes solution providers of food waste recycling facilities and on-site food waste treatment systems (turning food waste into fertiliser)	<input checked="" type="checkbox"/>		
----	---	--	-------------------------------------	--	--
