ANNEX A: PRE-APPROVED LIST OF CARBON CREDITING PROGRAMMES AND METHODOLOGIES

1. Table A below sets out an initial version, as of the date of this Agreement, of the pre-approved list of carbon crediting programmes and methodologies, which have been pre-approved in accordance with the applicable domestic laws, regulations and administrative frameworks of both Singapore and Zambia and which meet the requirements under Article 5 (Environmental Integrity).

Table A: Initial Version of the Pre-Approved List of Carbon Crediting Programmes and Methodologies

Carbon crediting programmes	**Methodologies**
Gold Standard for the Global Goals (GS4GG)	1. Soil Organic Carbon Framework Methodology v1.0 2. Methane Emission Reduction by adjusted Water management practice in rice cultivation v1.0 3. Methane Emissions Reduction from Enteric Fermentation in Beef Cattle through Application of Feed Supplements v1.0 4. Gold Standard Agriculture Smallholder Dairy Methodology v1.0 5. Emission Reductions from Safe Drinking Water Supply v2.0 6. Methodology For Animal Manure Management and Biogas Use for Thermal Energy Generation v2.0 7. Reduced emissions from cooking and heating (RECH) (formerly TPDDTEC) v5.0 8. Simplified Methodology for Clean and Efficient Cookstoves v4.0 9. Methodology For Metered & Measured Energy Cooking Devices v2.0 10. Quantification of Climate Related Emission Reductions of Black Carbon and Co-Emitted Species Due to The Replacement of Less Efficient Cookstoves with Improved Efficiency Cookstoves v1.1 11. Two And Three Wheeled Personal Transportation v1.0 12. Emission Reduction by Shore-Side or Off-Shore Electricity Supply System v1.0

	13. Suppressed Demand Methodology Micro-Scale Electrification and Energization v1.0 14. Suppressed Demand Small-Scale Methodology for Low GHG Food Preservation v1.0 15. Suppressed Demand Small-Scale Methodology for Energy Use for The Processing of Agricultural Products v1.0 16. Reduction in Methane Emissions from Landfills Through Decentralised Organic Waste Processing v1.0 17. Methodology for Collection of Sargassum and Other Macroalgae to Avoid Emissions from Decomposition and to Use for Beneficial Products v1.0 18. Methodology for Reducing Methane Emissions from Combustion Engine Exhaust v1.0 19. Methodology For Marine Fuels and Bio Bunkers v1.0 20. Retrofit Energy Efficiency Measures in Shipping v2.1 21. GS A6.4-AMM-001 v1.0

2. The pre-approved list of carbon crediting programmes and methodologies may be updated by the Joint Committee from time to time, pursuant to the process set out in Article 5(2).

3. Notwithstanding that pre-approval has been granted to the methodologies in the pre-approved list of carbon crediting programmes and methodologies, the Parties will assess the applicability of these methodologies against their applicable domestic laws, regulations and administrative framework, in accordance with the process set out in Stage A (Submission and processing of project application to the Joint Committee) of **Annex B**.

4. If a methodology listed in the pre-approved list of carbon crediting programmes and methodologies has been suspended or formally placed under review by the relevant carbon crediting programme at the time the project applicant submits the application for authorisation of a mitigation activity, either Party may regard that methodology as being ineligible to qualify as a pre-approved methodology under this Agreement and thus refuse to authorise a mitigation activity on that basis.

5. If the project applicant uses a later version of a methodology than the version of the same methodology listed in the pre-approved list of carbon crediting programmes and methodologies, the Parties may regard that later version as eligible to qualify as a pre-approved methodology under this Agreement.
