

TECHNOLOGIES AND EQUIPMENT

Step into the realm of decisive firepower. Our Artillery systems stand as the backbone of battlefield dominance, delivering unparalleled precision and devastating power where and when it matters most. Explore the diverse capabilities that make Singapore Artillery a critical asset, capable of shaping the battlefield across a full spectrum of operations.

The High Mobility Artillery Rocket System (HIMARS) provides the Singapore Artillery with long-range capabilities and pinpoint accuracy while broadening the suite of precision weapons systems available to our Army and the SAF.

The TPO-53 Weapon Locating Radar is able to track Rockets, Artillery and Mortars with pinpoint accuracy. The TPO-53 is able to network to other sensors and shooters to enhance the Army's sense and strike capabilities.

The Singapore Artillery will introduce the next-generation howitzer to replace our existing FH 2000 and SSPH PRIMUS as part of our force modernisation efforts.

ARTILLERY

Orchestrating a firestorm is your regular.

Discover how a career in Artillery is
**ANYTHING BUT
REGULAR**

ABOUT ARTILLERY

The Singapore Artillery, known as the King of the Battlefield, is the oldest formation in the Singapore Armed Forces, established since 1888. Today, we play a critical role in shaping the battlefield by harnessing the full suite of sensors and state-of-the-art rocket and weapon systems. Accurate and effective, we orchestrate fearsome and earth-shaking strikes with pinpoint precision to neutralise enemy forces.

OUR VISION

To be the leader who shapes and dominates the battlespace to achieve a swift and decisive victory. We are Men of Steel. Ready, Resilient, Respected.

OUR MISSION

The Singapore Artillery will direct and deliver precise, timely and calibrated fires to support a full spectrum of operations, and harness the full effect of integrated fires to shape the battlespace to achieve the Commander's intent.

OUR SINGAPORE
ARMY
READY DECISIVE RESPECTED

ROLES AND SPECIALISATION

If you're looking for action and purpose, the Artillery will give you the chance to be a true force multiplier. You will direct the fight, by mastering cutting-edge technology and delivering a precise advantage. Are you ready to take command of the battlefield?

FIELD ARTILLERY

As the "Big Guns", the Field Artillery (FA) forces are the most instinctive image associated with Artillery. From 120mm Mortars to 155mm Howitzers to the Rocket Systems of HIMARS, our FA capabilities deliver responsive, coordinated and deadly strikes to shock and neutralise the adversary.

The Recce and Survey troops also play a pivotal role to provide reconnaissance of safe and appropriate deployment grounds for our assets.

FIELD ARTILLERY TARGET ACQUISITION

The Field Artillery Target Acquisition (FATA) forces are the eyes and ears of the FA, providing crucial information to our firing units. The formation's wide range of radars, including the Artillery Hunting Radar (ARTHUR), SAFARI and TPQ-53 Weapon Locating Radars locate enemy artillery and provide early warning or opportunities for counterfires.

In addition, the Field Artillery Meteorological System (FAMS) provides timely and accurate atmospheric data to enhance the accuracy of artillery fires.

LIAISON

EYES ON THE TARGET

Our Liaison elements, such as Fire Support and STORM teams in the manoeuvre units plan, integrate, coordinate and direct air and land fires onto the battlefield. A force multiplier, the STORM team specialises in orchestrating artillery and air assets to deliver maximum firepower on enemy targets.

SHARPENING OUR OPERATIONAL CAPABILITIES ALL OVER THE WORLD.

Besides being the King of the Battlefield, the Artillery is also one of the most well-travelled formation with training opportunities across India, Australia, New Zealand, and United States. We also develop our Gunners holistically through overseas courses and seminars.

COMMONLY ASKED QUESTIONS

IS THE TRAINING DIFFICULT?

Our training programme is meticulously designed to be safe and progressive, ensuring that service personnel develop the necessary skills and knowledge to achieve operational readiness.

ARE ARTILLERY OPERATIONS A VERY PHYSICALLY DEMANDING JOB?

While physical fitness is an important aspect of soldiers' fundamental training, other traits such as resilience, agility in adapting to dynamic situations and ability to collaborate effectively within a team are equally valued. In addition, the physical demands (e.g. rounds lifting) have significantly been reduced through integration of technology within our platforms.

WILL I BE TRAINED IN ALL PLATFORMS?

Your initial training will provide you with fundamental core competencies. As you advance through the ranks, you will be progressively introduced and exposed to the various roles and platforms.

DO I HAVE TO KNOW ALL PLATFORMS AS A REGULAR IN ARTILLERY?

Artillery is far more than just 'firing Big Guns.' Beyond the impressive display of firepower lies a complex 'system of systems' that demands precision, seamless coordination, and exceptional teamwork. You'll engage with cutting-edge technology and analyse critical intelligence, playing a crucial role in delivering decisive strikes to the battlefield.
