

GRANTS AWARDED TO YOUTH ACTION CHALLENGE SEASON 6 TEAMS

Balance in Life

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
1.	AlturaVita	A 2022 study revealed that gamers often lack exercise motivation due to gaming's sedentary nature. AlturaVita's Redefine You transforms this challenge by gamifying fitness through AI-driven personalised recommendations, badges, titles, and progress visualisation. By speaking gamers' language and making workouts as engaging as their favourite games, the platform empowers users to build sustainable wellness habits through a reward system they naturally understand and appreciate.	\$5,000	\$1,700	\$6,700
2.	CareforWe	CKD is a growing public health issue, costing \$300 million annually on ESKD patients and consuming 2-3% of healthcare budgets. CareforWe addresses this challenge through an AI-powered nutrition tool specifically designed for CKD patients, providing real-time food analysis, personalised meal suggestions, and risk alerts. By functioning as a personal AI Renal Dietician, CareforWe democratises healthcare through highly personalised nutrition and CKD management, helping reduce dialysis risk and improve patients' quality of life.	\$20,000	\$10,100	\$30,100
3.	Cura	With 20% of discharged patients facing critical readmission within just 30 days, Cura addresses this urgent healthcare challenge through personalised support for post-discharge care. The platform combines AI-driven technology with doctor-backed recovery plans to provide organised, incentivised guidance for newly discharged and chronic care patients. By offering tailored support throughout the healthcare journey, Cura helps prevent readmissions while making healthy living more accessible and hassle-free.	\$5,000	\$10,600	\$15,600

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
4.	GreaterHive	With 1 in 4 youths facing mental health issues amid record-high burnout and stress levels, GreaterHive introduces a unique approach through personalised volunteerism. As the only hyper-personalised volunteer centric platform whose goal is to increase volunteer rates, GreaterHive facilitates youth volunteering as a pathway to a more balanced life, leveraging evidence that shows how giving back builds purpose, social connections, and a positive outlook. Through its targeted matching system, the platform aims to increase volunteer rates while enriching lives through meaningful community engagement.	\$5,000	\$4,600	\$9,600
5.	Maibel.ai	To combat the 74% abandonment rate among women fitness app users, Maibel.ai revolutionises habit formation through a gamified wellness app that combines AI-powered coaching with immersive storytelling. The platform engages users through tailored health challenges and an AI companion, while incorporating dramatic storylines that users unlock through completed health missions. Uniquely designed for women, Maibel.ai transforms fitness into an engaging journey that satisfies both health goals and entertainment preferences.	\$20,000	\$7,800	\$27,800
6.	Letsplore	Choice overload and lack of user-friendly tools make outing planning a challenge for Singapore youths, leading to wasted time and missed bonding opportunities. Letsplore addresses this through a trip-planning app featuring a dating app-style interface that makes decision-making fun and interactive. Through curated recommendations and digital loyalty cards, Letsplore helps youths reduce decision fatigue and spend more time bonding rather than scrolling through endless options.	\$5,000	\$5,400	\$10,400
7.	Surety - Midlife Management	With 1 in 2 women suffering from moderate to severe menopause symptoms, and the topic remaining taboo in Asia, many women lack	\$20,000	\$9,400	\$29,400

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		proper education and support. Surety - Midlife Management addresses this gap through a holistic, community-driven approach that combines menopause education, community support, and workplace advocacy specifically tailored for Asian women. By engaging midlife women, employers, and healthcare providers, Surety works to normalise menopause conversations and foster a society where this natural transition is openly discussed and well-supported through integrated workplace and healthcare policies.			
8.	GIVMI	Addressing the widespread need for convenient and healthy energy solutions on the go, GIVMI ENERGY introduces Singapore's first caffeine gummies and mints. The product delivers sustained energy and focus through a sugar-free formula packed with Vitamins B6 & B12 and caffeine, offering a quick, convenient, and healthy boost in a delicious, on-the-go format. GIVMI ENERGY redefines energy solutions as Singapore's pioneering caffeine gummies and mints, providing a better alternative for energy enhancement.	\$5,000	\$1,100	\$6,100
9.	Conexa	A 2024 study reveals that over 60% of youths experience loneliness and seek friendships through digital platforms, yet existing apps often fail to facilitate genuine connections through their focus on superficial swiping or one-off meetups. Conexa addresses this gap by matching individuals with small, like-minded groups that meet regularly, fostering deeper relationships through consistent interaction. Unlike large-scale community platforms, Conexa prioritises intimate, diverse group settings where meaningful connections can develop naturally over time.	\$5,000	\$2,700	\$7,700
10.	Harmoni: Dun Pai(say)!	Addressing the disconnection between youths and their cultural heritage, Harmoni: Dun Pai(say)! creates community-driven initiatives that make	\$20,000	\$7,600	\$27,600

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		learning mother tongues and dialects engaging and approachable. Through relatable content, online challenges, and in-person events, the platform provides elderly individuals a space to share stories and advice, while encouraging youths to practice language skills. Dun Pai(say)! goes beyond language teaching to deepen intergenerational bonds and celebrate cultural heritage through interactive learning experiences.			
11.	Harmonics	Youth communication challenges with family and friends often lead to emotional distance and strained relationships. Harmonics addresses this through Harmony Quest, an innovative music-themed board game that combines purposeful play with meaningful conversation. Unlike traditional board games focused solely on strategy or competition, Harmony Quest creates a safe space for authentic communication through its unique blend of music-themed gameplay, conversation cards of varying depths, and challenge cards that foster bonding between players.	\$20,000	\$13,000	\$33,000
12.	Therapeutic Bake	Addressing growing emotional distance in families due to limited quality time and generational gaps, Therapeutic Bake offers specialised baking workshops that foster deeper connections. Unlike conventional skill-focused sessions, these workshops take a slower, more immersive approach with guided discussion prompts, enabling meaningful reflections and open conversations. Through blending baking with family bonding, Therapeutic Bake creates shared experiences that allow families to spend quality time together and develop stronger emotional connections.	\$5,000	\$2,700	\$7,700
13.	Knowing Thyself	With Singapore facing \$16 billion in annual depression-related losses and rising youth loneliness, ThyKnow introduces an innovative solution through its Telegram bot platform. The service empowers youths through thought-provoking prompts that encourage self-reflection and deeper	\$5,000	\$4,200	\$9,200

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		understanding, fostering meaningful connections and improved mental well-being. By combining self-reflection with relationship building, ThyKnow offers a unique approach to combat social isolation and its associated economic impact in Singapore.			
14.	Tio Boh?	Despite living with their families, one-third of elderly Singaporeans face social isolation due to declining dialect use and intergenerational disconnect. Tio Boh addresses this through Singapore's only dialect learning app, providing bite-sized lessons tailored for busy lifestyles. As a non-profit initiative, the platform empowers youth and healthcare workers to connect more meaningfully with dialect-speaking seniors, fostering stronger intergenerational bonds through language revival.	\$50,000	\$14,100	\$64,100

Navigating Careers

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
1.	NexSwap	Despite career fairs attracting up to 10,000 attendees, more than one-third struggle to approach potential employers. NexSwap solves this through smart tags that connect job seekers and HR professionals based on proximity, using vibration notifications to indicate suitable matches. Having successfully hosted 4 events, NexSwap continues to refine its technology to accommodate larger events while increasing meaningful job opportunities for youths through its innovative matching system.	\$5,000	\$6,700	\$11,700
2.	CORDY	With 88% of youths uncertain about their future career paths seeking exploration opportunities, CORDY serves as a personalised platform connecting them to over 100 weekly opportunities including competitions, workshops, and volunteering activities. The platform provides tailored recommendations based on users' interests, personality, and aspirations, functioning as a personalised exploration partner. CORDY distinguishes itself through its advanced recommendation system, similar to TikTok's approach, but specifically designed for matching youths with career and interest-based opportunities.	\$20,000	\$12,300	\$32,300
3.	Mngler	With 1 in 3 Singapore youths regretting their tertiary education choices due to an insufficient guidance ecosystem, Mngler supports better decision-making through an app that aggregates opportunities and connects youths with experienced seniors. The platform serves as the ultimate search engine for teenagers, enabling them to document and share progress on projects, interests, and extracurriculars. Built by listening to users, Mngler maintains a free, for-youth, by-youth approach that has gained popularity among hundreds of users.	\$5,000	\$8,600	\$13,600

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
4.	Creo Works	With schools facing limited access to fabrication tools (one machine per 100 students), students lack crucial hands-on problem-solving experience while SMEs struggle to find skilled talent. Creo Works bridges this gap through multi-modal fabrication machines, automated job queuing, and a digital portfolio & job-matching platform. By providing students with access to fabrication tools and connecting them directly with industry opportunities, the platform empowers young creators to build, prototype, and showcase their talents while developing competitive real-world skills that SMEs seek.	\$5,000	\$16,600	\$21,600
5.	GoodHub SEA	In response to the challenges youths face in securing technology roles that require regional experience, GoodHub SEA empowers Singapore youths through real-world cross-border collaborative experiences in Southeast Asia's digital economy. The platform connects participants with impactful digital project opportunities from regional non-profits while hosting panel discussions and immersion trips to expand their industry networks. Through tech-for-good projects, GoodHub SEA enables youths to build technology for impact while gaining valuable cross-border collaboration experience across ASEAN.	\$5,000	\$9,500	\$14,500
6.	Ketchup	According to LinkedIn's research, more than 70% of senior positions are never publicised, and 85% of mid-to-senior people advance through connections, while youths remain underprepared in network management, often using manual and ineffective methods. Ketchup functions as a personal network assistant that helps people track, maintain, and enhance their connections by turning unstructured data inputs into valuable insights, enabling users to focus on building quality connections. With guidance from SG networking veterans, Ketchup helps	\$20,000	\$12,000	\$32,000

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		youths unleash the full potential of their networks through career-related recommendations based on their career agenda.			
7.	Office Hours	As Gen Zs become the majority of early career professionals in today's workforce, Office Hours steps in with a comprehensive range of solutions to help youths navigate workplace realities. The platform combines a Career SOS Chatbot, Training Workshops, 1-1 Mentoring/Coaching, and Peer Support Groups to create confident and adaptable professionals. Through focused, theory-based solutions accessible to all, Office Hours empowers a new generation of workers to thrive in any workplace environment.	\$20,000	\$7,800	\$27,800
8.	Our Curiosity Collective	Research shows that more than 1 in 2 millennials in Singapore experience burnout due to chronic work-related stresses, feeling stuck without direction. Our Curiosity Collective serves as a spark for millennials by hosting regular small-group offline events around pertinent career topics and creating ongoing inspirational digital content. The community establishes itself as the definitive platform for millennials seeking career clarity and breakthrough, providing valuable insights and mutual support to help them confidently navigate this critical stage of their lives.	\$20,000	\$9,500	\$29,500
9.	Overhaul	1 in 2 Singaporeans skip upskilling courses due to time constraints, yet 86% actively pursue hobbies in their free time. Overhaul transforms this challenge into an opportunity by creating a career playground where youths can validate their career pathways through passion projects and hobbies after working hours. Through experiential project-based learning, the platform enables participants to build real-world proof of their skills while understanding industry pros and cons through purpose-driven projects.	\$20,000	\$2,000	\$22,000

Environment & Sustainability

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
1.	Bite Busters	Conventional approaches to dengue prevention education often fail to capture public attention or inspire action. Bite Busters transforms this challenge through an interactive card game that makes learning about dengue prevention both strategic and entertaining. Using a unique system of Catastrophe, Hurdle, Action, and Character cards, players work together to tackle increasingly complex challenges, from basic prevention to research-level problems. By turning public health education into an engaging gameplay experience, Bite Busters prompts proactive measures against dengue while fostering teamwork and real-world problem-solving skills.	\$5,000	\$4,300	\$9,300
2.	Greener+	While Singapore generates 177 kg of plastic waste per capita annually with only 6% being recycled, Greener+ tackles this challenge through an interactive platform combining gamified challenges, real-world clean-ups, and AI-powered waste tracking. The platform engages schools and communities to promote long-term behavioral change in sustainable practices, transforming plastic waste reduction into trackable actions. Through its unique gamification approach, Greener+ helps users track impact, earn rewards, and develop lasting plastic-free habits.	\$5,000	\$3,100	\$8,100
3.	GREEN SPROUTS	Rising littering rates and declining environmental awareness in Singapore have created a growing concern. GREEN SPROUTS addresses this challenge by gamifying the litter-picking process, transforming traditional cleanup activities into an engaging experience for young participants. Through specially designed cleanup kits that incorporate interactive elements, the initiative instills environmental stewardship in children by making litter collection both fun and meaningful.	\$5,000	\$2,700	\$7,700

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
4.	Project Trashformers	With Singapore facing a littering crisis marked by a 42% increase in littering tickets according to NEA's 2022 report, Project Trashformers addresses this challenge through fun, engaging, and interactive trash pick-up sessions for primary school students. The initiative aims to develop environmental stewardship among young learners to create clearer and greener shared spaces in Singapore. Through its engaging approach, Project Trashformers cultivates lasting environmental awareness and responsibility in primary school students.	\$5,000	\$10,300	\$15,300
5.	EcoCupid	Recognising that young Singaporeans often take clean public spaces for granted, EcoCupid builds an active environmental community by inspiring youth to champion public hygiene through impact-based media, school workshops, and community events. The platform connects participants with public hygiene heroes while showcasing Singapore's cleanliness innovations across Southeast Asia. As Singapore's first environmental community focused on public hygiene, EcoCupid transforms cleanliness from a practice into a passion through youth engagement and environmental stewardship.	\$20,000	\$11,200	\$31,200
6.	Z3	While Singapore's vector control methods primarily target outdoor areas, a 2023 National Library of Medicine study revealed that Aedes Egypti mosquitoes predominantly rest indoors. Z3 addresses this gap by innovatively combining a home rubbish bin with Singapore's Gravitrap technology, creating the first indoor mosquito control solution with home-friendly features. This unique integration makes mosquito control more convenient and accessible for homeowners, offering a practical approach to indoor dengue prevention.	\$20,000	\$12,200	\$32,200

Society for Everyone

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
1.	SELF	Low-income women in Singapore often face barriers to stable employment due to self-doubt and limiting beliefs. SELF addresses these challenges through its transformative BetterSelf program, which focuses on building self-awareness, confidence, and personal leadership skills. By prioritising inner growth and resilience, SELF empowers women to overcome self-doubt, break cycles of poverty, and create positive ripple effects throughout their families and communities.	\$5,000	\$4,900	\$9,900
2.	FoodBoox	For low-income youth, the path to career growth is often blocked by limited training opportunities and unstable income. Food Boox tackles this challenge through a learn-and-earn model, providing hands-on training in sales, digital marketing, and product distribution through partnerships with F&B businesses. By combining practical business training with real earning opportunities, Food Boox equips youth with transferable skills that enable both immediate financial independence and long-term career development.	\$5,000	\$7,700	\$12,700
3.	LocalLoco	With 72% of Singapore's SMEs being small neighborhood businesses struggling with visibility and marketing costs, LocalLoco bridges the gap between local shops and cost-conscious families. The hyperlocal discovery platform connects small businesses with nearby customers through affordable marketing and exclusive deals. By targeting an untapped market in deal apps focused on neighborhood shops, LocalLoco empowers communities while fostering sustainable local commerce that benefits both residents and businesses.	\$20,000	\$3,900	\$23,900

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
4.	MEMOVE LIEF	The path to stable employment often begins with access to basic tools, yet many low-income individuals cannot afford e-bikes essential for food delivery work. MeMove LIEF bridges this gap through a 6-month program offering subsidised step-down e-bike rentals for immediate earnings, while building structured pathways to long-term stability. Through direct engagement with participants, the program provides both immediate support through e-bike access and future growth through work history validation and job placement assistance.	\$20,000	\$17,900	\$37,900
5.	POP Project	A 2024 study reveals that 94% of DSA successful applicants come from middle-to-high-income families, highlighting educational inequity in Singapore. POP Project addresses this disparity by providing students from low-income families with opportunities to develop future-ready life skills through a unique peer-to-peer learning approach. The initiative enables these students to better compete with their financially better-off peers while receiving a holistic education.	\$20,000	\$6,600	\$26,600
6.	Project Obscura	Financial barriers prevent many underprivileged youths in Singapore from accessing photography training, equipment, and industry experience. Project Obscura breaks down these barriers by providing free photography training, mentorship, and real-world experience, helping transform passion into sustainable skills. Distinguished by its focus on accessible resources and practical industry exposure, the program empowers underprivileged youths to build creative and financial opportunities for their future.	\$20,000	\$15,200	\$35,200
7.	Videotto	Converting long-form content into social media clips traditionally demands hours of manual editing, creating a significant bottleneck in marketing tasks. Videotto addresses this challenge by developing a Singaporean AI	\$20,000	\$18,200	\$38,200

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		Model that transforms lengthy podcasts and livestreams into short social media clips within minutes rather than days. By automating these laborious editing tasks, Videotto enables businesses to focus on more essential operations while maintaining creative output.			
8.	Assistive Technologies	For the 97 million people who rely on AAC tools to communicate, costly apps and restrictive physical tools create significant barriers to expression. @Messenger transforms this landscape by providing a seamless digital solution that replaces traditional physical AAC tools, enabling individuals with Autism Spectrum Disorder and other speech impairments to connect effortlessly with family, educators, and caregivers. Through its accessible approach, @Messenger empowers nonverbal individuals with universal communication and learning opportunities.	\$50,000	\$17,300	\$67,300
9.	Everest	Traditional programs for dyslexic children often emphasise academic weaknesses, creating stress and an adversarial relationship with words. Everest takes a different approach by providing an art-centered programme where children interact with words through scripting and performing plays, free from rigid academic expectations. By focusing on strengths rather than weaknesses, Everest creates a fun and relaxing avenue for learning and self-expression that uplifts children's confidence and self-esteem.	\$5,000	\$7,300	\$12,300
10.	Health Bridge	With PWD unemployment at 67.3% compared to Singapore's overall 1.9% in 2023, Health Bridge introduces Bridge It, Singapore's first peer-driven digital platform connecting PWDs with resources, lived experiences, and community support. Through knowledge sharing and peer empowerment, the platform aims to impact 600 PWDs with limited mobility within one year. Bridge It distinguishes itself as a peer-led initiative that enables PWDs	\$5,000	\$3,700	\$8,700

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		to navigate daily life with greater confidence and independence through community support.			
11.	Magic of Neurodivergence	Addressing the discrimination and exclusion faced by neurodivergent students in schools, Magic of Neurodivergence creates immersive simulation activities through dedicated booths targeting different subgroups of neurodivergent individuals. The program enables neurotypical participants to experience firsthand the challenges faced by neurodivergent students through hands-on experiences, fostering empathy and deeper understanding. Through interactive booths, the initiative reduces stigma and enhances understanding while creating a more inclusive environment without placing undue pressure on neurodivergent students.	\$20,000	\$13,600	\$33,600
12.	Rehabify	With physiotherapy facing a 70% dropout rate due to being expensive, boring, and inconvenient, Rehabify transforms the experience by making it fun, accessible, and affordable for people with disabilities. The platform uses AI technology to detect motions and control games, allowing users to complete their physiotherapy exercises using just a laptop. Rehabify distinguishes itself by gamifying the rehabilitation experience through AI, making physiotherapy both engaging and convenient.	\$5,000	\$10,700	\$15,700
13.	Unity Ventures	According to NUH's study, 1 in 100 Singaporeans are on the Autism Spectrum, with many struggling with sensory overload during daily commutes. Pathway Pal addresses this challenge through a comprehensive app that combines location tracking, a sensory regulation toolkit, and task breakdown functions to support independent travel. Unlike existing fragmented solutions, this all-in-one platform enables safe and comfortable commuting for ASD users while providing peace of mind	\$20,000	\$4,600	\$24,600

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		to caregivers through features like the easily accessible 'Call for help' button that connects to both caregivers and nearby volunteers.			
14.	Visign	Communication barriers between deaf and hearing individuals create significant daily challenges. Visign addresses this through innovative smart glasses that provide bidirectional translation - converting speech into text via a built-in LED display while using AI to transform sign language and facial expressions into audio. Unlike existing solutions that require smartphones, these compact glasses offer standalone functionality for seamless communication anywhere, whether during daily conversations, movie watching, or emergency situations.	\$20,000	\$12,500	\$32,500
15.	The Levelled Field	Research shows that Singapore's PWD employment has only grown 5% to 32.7% in four years, falling short of the 2030 target of 40%. The Levelled Field aims to level the playing field for neurodivergent individuals to secure white-collar jobs by providing affordable digital skills training, fostering lifelong learning, independence, and employability alongside community partners. The platform empowers neurodivergent individuals with industry-relevant digital skills training while ensuring accessibility and inclusion to increase their employment opportunities.	\$5,000	\$18,900	\$23,900
16.	Crafca	Addressing the extinction risk facing traditional Asian crafts due to declining awareness and disappearing artisans, Crafca implements a dual approach through documentary storytelling and craft innovation. The platform films and publishes documentaries showcasing traditional artisans while modernising techniques by integrating them into contemporary products like handbags and corporate projects. Through its design expertise, Crafca preserves cultural heritage by making	\$20,000	\$3,300	\$23,300

S/N	Team Name	Project Description	Grant Awarded by Judges	Grant Awarded through PB Exercise	Total Grant Awarded
		traditional crafts relevant and appealing to young people in today's market.			
17.	Euphoric Melange	Many interracial couples face the challenge of finding wedding services that meaningfully represent their diverse cultural identities. Euphoric Melange addresses this gap by crafting personalised fusion weddings that seamlessly blend different cultural elements into bespoke celebrations. Through its unique approach to wedding planning, the platform not only creates unforgettable experiences for couples but also promotes greater cultural understanding and acceptance, celebrating Singapore's inclusive, multiracial society.	\$5,000	\$4,900	\$9,900
18.	Climate Interfaith	According to a 2025 IPS Study, one in five Singaporeans distrust religious groups outside their own, highlighting significant social divides. Climate Interfaith tackles this challenge by uniquely combining interfaith education with climate action initiatives, bringing different faith communities together through shared environmental goals. Through its innovative approach of connecting faith with climate action, Climate Interfaith works toward building both a cooler planet and a more cohesive Singapore society.	\$50,000	\$3,500	\$53,500
