ELECTIVES (GENERAL) AND LIFE SKILLS MODULES

For details, click [here](#)

Note: The offer of electives is subject to the training schedule of respective ITE Colleges. Students are advised to check with their Class Advisors on the availability of the elective modules they intend to pursue.

MODULE OBJECTIVES

Cluster Core Modules

Fundamentals of Business Operations

On completion of the module, students should be able to support essential business operations by differentiating the various functions in an enterprise, compute employee payroll, prepare documents to support international trade, handle monetary transactions, compute accounting equation and record business transactions in source documents.

Sales Techniques & Engagement

On completion of the module, students should be able to apply sales techniques to sell to client needs and develop strong sales relationships.

Specialisation Modules

Introduction to Supply Chain Management

On completion of the module, students should be able to provide support for supply chain activities by coordinating flow of products and information via air, land & sea.

Essentials of Warehouse Operations

On completion of the module, students should be able to perform warehouse-receiving, order processing, picking, and packing.

Freight & Cargo Documentation

On completion of the module, students should be able to handle import and export procedures and documentation for air, land and sea.

Warehouse & Inventory Management

On completion of the module, students should be able to perform warehouse and inventory management and stocktakes.

International Freight

On completion of the module, students should be able to arrange transport of goods by air, land and sea.

Circular Logistics

On completion of the module, students should be able to coordinate and process goods return for waste minimisation and sustainability.

Material Handling Equipment

On completion of the module, students should be able to plan and carry out MHE operations according to WSQ forklift driver certificate requirements.

Urban Logistics

On completion of the module, students should be able to provide urban and green logistics services through planning and monitoring driver assignments and performing real-time dispatching and order tracking.

Basics of Cold Chain Logistics

On completion of the module, students should be able to perform in-bound, out-bound and despatch arrangements for a cold-chain environment via air, land & sea.

Dangerous Goods Transportation

On completion of the module, students should be able to coordinate packing, documentation and transport for DG goods by air, land & sea.

Ship Agency Operations

On completion of the module, students should be able to provide agency support in the management of maritime commercial vessels, and carry out ship agency functions relating to vessel operations, management, and cargo shipment.
