List of Competencies for On-the-Job Training (OJT)
Work-Study Diploma in Electronics & Computer Engineering (Applied Electronics & Al)
Note: LOC is subject to changes due to curriculum review/ development

	List of Competencies (Standard)	Company to indicate '√' for OJT competencies it can provide	
	Common		
	Manage equipment maintenance and product operations		
1.	Monitor equipment operations and performance		
2.	Test electronic circuit for product operation		
3.	Manage equipment and product failures		
	Manage IoT network and connectivity		
4.	Deploy network infrastructure		
5.	Deploy IoT infrastructure		
6.	Monitor IoT data transmission		
	Perform data analysis and visualisation		
7.	Perform data processing		
8.	Perform data visualisation		
9.	Perform data analysis		
	A) Specialisation – Applied Electronics & Al		
	Manage system integration		
10.	Design integrated system		
11.	Implement integrated system		
12.	Maintain system performance		
	Manage IoT solutions		
13.	Deploy IoT solutions		
14.	Implement remote monitoring		
15.	Maintain IoT security and solutions		
	Manage automation process		
16.	Design automation process		
17.	Validate automation process		
18.	Optimise automation process		
	Deploy AI/ML solutions		
19.	Automate data processing		

S/N	List of Competencies (Standard)	Company to indicate '√' for OJT competencies it can provide							
20.	Evaluate AI/ML models								
21.	Deliver AI/ML solutions								
	Deploy autonomous system								
22.	Set up autonomous system								
23.	Program autonomous system								
24.	Integrate autonomous system								
	Sub – total of Competencies (Standard)								
List	of Competencies (Company-specific)								
1									
2									
3									
4									
5									
6									
	Sub-total of Competencies (Company-specific)								
Note:									
a) C	a) Company must be able to provide OJT for at least 75% of the List of Competencies (Standard).								
W) If company is unable to meet the 75%, please propose alternate course-related competencies which are unique to company operations. <u>Alternate competencies are capped at 25%</u> . [i.e. 50% of the list of competencies (standard) + 25% alternate competencies (Company-specific)].								
c) A	All alternate competencies (Company-specific) must be reviewed and endorsed by ITE.								
d) Tı	rainees must receive OJT and be assessed for All competencies selec	ted in this List.							
Total	no. of competencies selected by company for OJT								
Total	no. of competencies listed (standard & company specific)								
Perce	entage of selected competencies

Company

MODULE SYPNOSIS – WSDip in Electronics & Computer Engineering (Applied Electronics & AI)

Course Objective

The course equips trainees with the skills, knowledge and professional attributes to design, deploy and manage AI-enabled and IoT-based systems with digital connectivity, to optimise operational efficiency and reliability in a digitalised work environment. This specialisation equips trainees with the skills, knowledge and professional attributes to integrate, deploy and manage electronic systems and connectivity, as well as apply AI solutions and automation, to achieve continuous process improvement in a digitalised work environment.

Modules Synopsis

Electronics & Electrical Principles

On completion of the module, trainees should be able to manage operations and performance for equipment and products. They should also be able to manage equipment and product failures by implementing Electrostatic Discharge (ESD) Control measures and evaluating performance metrics.

IoT Devices & Networking

On completion of the module, trainees should be able to manage IoT network and connectivity by programming and deploying IoT devices, configuring IoT network connectivity and monitoring IoT data transmission for quality IoT data communication.

Data Analysis & Visualisation

On completion of the module, trainees should be able to extract and transform data into useful information, as well as create visual elements, to aid in business decision-making. They should also be able to manage projects through collaboration and teamwork.

Applied Electronics

On completion of the module, trainees should be able to install and troubleshoot various detection sensors, including video imaging, Lidar, ultrasonic as well as inertial measurement unit.

IoT Connectivity & Integration

On completion of the module, trainees should be able to deploy and manage IoT solutions, as well as implement remote monitoring, and maintaining IoT security.

Automation & Programming

On completion of the module, trainees should be able to manage automation process by designing, validating and optimising automation process.

AI & Machine Learning

On completion of the module, trainees should be able to deploy and deliver AI/Machine Learning (ML) solutions by automating data processing and evaluating AI/ML models.

Autonomous System Applications

On completion of the module, trainees should be able to set up, program and integrate autonomous robots for applications.

MODULE SYPNOSIS – WSDip in Electronics & Computer Engineering (Applied Electronics & AI)

Company Project

On completion of the module, trainees should have applied their acquired competencies in an authentic project that would value-add to the company.

On-the-Job Training

On completion of the module, trainees should be able to apply the skills and knowledge acquired at ITE College and workplace to take on the full job scope, including supervisory function, where appropriate, at the company.

TRAINING PATTERN SCHEDULE

WSDip in ELECTRONICS & COMPUTER ENGINEERING (APPLIED ELECTRONICS & AI)

Day Release - Trainees attend 1 to 2 days of lessons per week at ITE, with the remaining work-week spent at the workplace for On-the-Job Training.

April'26 Intake	April – June 2026		July – September 2026		October – December 2026		January – March 2027				
1st Year Off-JT @ ITE	1 day/week (Day TBC)	ITE Vacation (June) 4 weeks	1 day/week (Day TBC)	ITE Vacation (Sept) 2 weeks	2 days/week (Days TBC)	ITE Vacation (Dec) 4 weeks	2 days/week (Days TBC)	ITE Vacation (March) 2 weeks			
April'26 Intake	April – June 2027		July – September 2027		October – December 2027		October – December 2028				
2 nd Year Off-JT @ ITE	2 days/week (Days TBC)	ITE Vacation (June) 4 weeks	2 days/week (Days TBC)	ITE Vacation (Sept) 2 weeks	1 day/week (Day TBC)	ITE Vacation (Dec) 4 weeks	1 day/week (Day TBC)	ITE Vacation (March) 2 weeks			
April'26 Intake											
3 rd Year Off-JT @ ITE	2 days/week (Days TBC)	ITE Vacation (June) 4 weeks	2 days/week (Days TBC)	ITE Vacation (Sept) 2 weeks	End: 30 September 2028 Duration: 2.5 years
