“My aspiration is to either become a sports management professional, a Karate athlete, or a Karate coach. To work towards this, I decided to apply for the EAE in *Higher Nitec* in Sport Management. This has allowed me to develop useful practical skills while attaining relevant theoretical knowledge such as in the area of sports science and coaching. I believe this has placed me in good stead for a fulfilling sports career!

"My time at ITE was instrumental - it gave me the chance to challenge perspectives, grow alongside my peers, and discover my potential. Leading and being a voice for students who often go unheard means a great deal to me. I hope my journey inspires others to take charge of their story and be the light at the end of someone's tunnel.

POSITIVE IMPACT

ITE grads find doors to good jobs opening wider

Survey shows median pay more than doubled in 10 years; more grads also furthering studies

Sandra Davie
Senior Education Correspondent

Students from the Institute of Technical Education (ITE) may have taken a longer road to success, but a new survey shows their qualifications can open doors to good jobs and further education pathways.

The survey also found that 68 per cent of ITE graduates who went on to work after secondary school, ITE grads were better off three years later by $600 a month.

The ITE, which offers 92 full-time certificate courses and over 30 part-time/short courses, takes in about 14,000 students a year. The vast majority – 66 per cent – head there after completing their N levels. About 15 per cent are O-level school leavers. The remainder are students progressing from Sitcc to Higher Nitec courses.

The latest graduate employment survey of students from the National University of Singapore, Nanyang Technological University and Singapore Management University showed that their median starting monthly salaries $3,000 each. ITE graduates had a median salary of $1,200 when they left the ITE in 2007.

This 66p 80 per cent of ITE graduates drew $4,500 a month and the top 25 per cent, $5,000 – similar to the average pay of residents here.

Compared with their peers who went on to work after secondary school, ITE grads were better off three years later by $600 a month.

ITE grad Vignesh Seevamanikam composed a degree and is now a user experience manager with FWD Insurance.

Khoh Gek said: "Clearly, an ITE education builds in our students skills that enable them to access good jobs. It also provides them with a strong foundation to go on to further education at some point in their career."

Mr Vignesh, who did ITE in 2010 after completing a course in mechatronics technology, went on to Temasek Polytechnic and then to RMIT University in Australia to complete a degree in communication design.

He credited ITE for moulding him into an independent and hands-on learner. "In polytechnic and then in university, I was ahead of the other students because of the industry-relevant and hands-on exposure that ITE gave me," he said. "And ITE opened doors for me to the role I'm in now."
