

## Healthy and Meaningful Longevity (also known as NIC on Ageing Phase 2)

### Healthy and Meaningful Longevity

Project Title	PI name	Host institution	Application ID	Grant Reference Number
ADL+ 2.0: Enhanced AI-assisted multidomain digital intervention for prevention of cognitive decline in community-dwelling older adults	Lim Wee Shiong	Tan Tock Seng Hospital	NICTran2023-0018	MOH-001651
Implementation of Decade of Healthy Aging Action Plan to Screen and Prevent Decline in Intrinsic Capacity in Elders (SPICE) Through Multisectoral Collaboration	Reshma Aziz Merchant	National University Hospital (NUH)	NICTran2023-0013	MOH-001666
IMpLeMentation stRategiEs for Scalability and Sustainability - Multidomain INterventions in a structured care pathway to Detect and Delay cognitive decline in community-dwelling older adults (IMPRESS-MIND2S)	Low Lian Leng	Singapore Health Services	NICTran2023-0014	MOH-001667
The Cardiovascular-Cognitive Health Initiative	Angela Koh Su-Mei	National Heart Centre Singapore	NICCOG2024-0024	MOH-001906
Innovative Methods for Proactive Risk Optimization and adVancEment in Cognitive Health (IMPROVE-COG)	Tan Li Feng	Alexandra Hospital (NUHS)	NICCOG2024-0027	MOH-001877
I-AGE: Interactive & multimodal AI, Gaming and continuous Engagement (I-AGE) platform to enhance cognitive impairment detection and management	Ho Dean	National University of Singapore	NICCOG2024-0028	MOH-001838
Retina-Enhanced Cognitive-impairment Opportunistic and Generative Neural Intelligent Screening Evaluation (RECOGNISE)	Cheng Ching-Yu	National University of Singapore	NICCOG2024-0029	MOH-001876
Sensors In-home for Elder Well-being: Integrating explainable artificial intelligence, biomarkers and digital phenotypes for early detection and intervention of cognitive decline (SINEW+)	Iris Rawtaer	Sengkang General Hospital	NICCOG2024-0030	MOH-001875
