

Find my Harmonised System (HS) Code

Step 01. Know What HS Code Is

The HS/CA Product Code Checker is available for you to do a quick search for the HS codes, product codes and descriptions of a product within the Singapore Trade Classification, Customs & Excise Duties.

- Whether a permit is required
- Which authority regulates the goods
- Whether duty or GST applies
- What restrictions apply

Getting this wrong can delay clearance or lead to penalties.

Step 03. Search For the HS Code

The HS/CA Product Code Checker is available for you to do a quick search for the HS codes, product codes and descriptions of a product within the Singapore Trade Classification, Customs & Excise Duties.

1

Enter keywords describing the goods

2

Browse by product category

3

Narrow down by material or function

Do not rely on supplier descriptions alone

Step 05. When to Seek Help?

If you encounter the following scenarios:

- The product is complex
- The description is ambiguous
- Multiple HS codes seem possible

You should seek advice before declaring.

Step 02. Describe Your Goods Clearly

Before searching, be clear about:

1

What the product is?

2

What it is made of?

4

Whether it is complete or a part?

3

How it is used?

Vague descriptions lead to wrong codes

Step 04. Check Exclusions and Restrictions

1

Product description under the code

2

Notes and exclusions

3

Whether it matches your goods exactly

Similar products may fall under different codes

Step 06. Common Questions from AskGov

Q1: Can I use the HS code provided by my supplier?

You may use it as a reference, but the importer or exporter is responsible for the final HS code used.

Q2: Why does the same product appear under different HS codes?

Classification depends on material, function, and intended use.

Q3: Do HS codes change?

Yes. HS codes are updated periodically. Always check the latest version.

Q4: Are HS codes the same in every country?

The first six digits are harmonised internationally. Additional digits may differ by country.
