

## HS CODES CONTROLLED BY CCMD (BASEL CONVENTION)

This document is to provide guidance on the use of appropriate Harmonised System (HS) and product codes, and the required supporting documentation when applying for a TradeNet permit for the import and export of waste, recyclables and used items which are controlled by the Chemical Control and Management Department (CCMD) of the National Environment Agency. CCMD(Basel) is known as NEA(MTV) in TradeNet.

### Submission of TradeNet permit applications for controlled goods under CCMD(Basel)

2 To avoid delays or rejection of TradeNet permit applications, importers and exporters are to ensure that their waste, recyclables or used items are correctly declared using the most appropriate HS codes and product codes, and to check that complete information has been provided for the application (e.g. description of goods, submission of all required supporting documentation). CCMD(Basel)'s approval in TradeNet is required prior to the export, import and transit of controlled goods.

3 The full list of HS codes and product codes controlled by CCMD(Basel) and a summary of required supporting documentation to be submitted in TradeNet can be found in **Annex A** of this document. A used item could be considered as waste by a country if it is defined as or considered to be waste under the provisions of that country's national legislation. Companies are advised to check with the competent authorities in the exporting/importing countries if the controlled item (e.g. empty containers, used tyres etc.) is subject to additional requirements (e.g. permit, certificate etc.) prior to the shipment.

4 Traders are encouraged to submit their declarations early (at least 5 working days before the import, export or transit) to avoid potential delays. Longer time may be needed if applications are incomplete. Please also note the following:

- a. Status of application - Traders should check the status of the permit approval in the TradeNet system (approval, rejected, pending) after submission of the declaration.
- b. Receipt of application or supporting documentation - Please note that supporting documents uploaded to the TradeNet system are considered submitted upon successful completion of the application process. Separate email confirmation from CCMD(Basel) regarding receipt of your application or documents is not required.
- c. Appropriate HS or product codes to be used in your declaration - Please refer to Annex A or the information on HS/CA Product Code available on TradeNet or visit <https://go.gov.sg/hasca>. For all controlled items, please ensure compliance with the import/export/transit requirements set by the relevant controlling agencies.

### Requirement to obtain Basel permit prior to any import, export or transit of hazardous waste and other waste controlled under the Basel Convention

5 As a Party to the Basel Convention, Singapore adopts the Prior Informed Consent (PIC) procedure of the Basel Convention in granting any permit for the export, import or transit of hazardous wastes and other waste controlled under the Convention. Any person who wishes to export, import or transit hazardous wastes shall obtain a Basel permit from CCMD(Basel).

For more information on the Basel Convention text and its annexes of wastes, please visit <https://www.basel.int/TheConvention/Overview/TextoftheConvention/tabid/1275/Default.aspx>.

For the requirement to apply for a Basel Permit, please visit <https://www.nea.gov.sg/corporate-functions/resources/legislation-international-law/multilateral-environmental-agreements/chemical-safety/basel-convention/application-for-basel-permit>

## Penalties

6 We would like to remind all recyclers, traders, freight forwarders and declaring agents to adhere strictly to the declaration requirements. TradeNet applications that are found non-compliant with the aforementioned requirements may be rejected for import, export or transit. Any false or misleading declarations may constitute an offence under the Section 37(2) of the Hazardous Waste (Control of Export, Import and Transit) Act and the offender shall be liable on conviction to a fine not exceeding \$10,000 or to imprisonment for a term not exceeding 12 months or to both. In addition, the import, export and transit of hazardous or other wastes under the Basel Convention without a valid Basel Permit may also constitute an offence under Sections 25(1), 26(1) and 27(1) of the Hazardous Waste (Control of Export, Import and Transit) Act and the offender shall be liable on conviction to a fine not exceed \$300,000 for a body corporate; or \$100,000 and/or imprisonment for a term not exceeding 2 years for an individual.

*\* Most types of wastes would require a Basel permit, while some may be exempted from it depending on the importing/exporting country's requirements and/or volume of the shipment. You may wish to verify with CCMD(Basel) at NEA\_Basel@nea.gov.sg if a Basel permit is needed for the proposed import or export.*
