

First Air Traffic Control Undergraduate Scholarship Recipient

Mr Lee Voy is the first recipient of the CAAS Air Traffic Control (ATC) Undergraduate Scholarship. He will pursue a Bachelor of Science in Biotechnology at the University of Edinburgh, United Kingdom.

Voy's interest in aviation was sparked at a young age, following a visit to the Singapore Airshow with his parents when he was eight. As he grew older and deepened his understanding of the industry, he became intrigued by the pace and scale of operations at Changi Airport. He was particularly drawn to the role of Air Traffic Control Officers (ATCOs), whom he sees as the unsung heroes working behind the scenes round the clock to keep flights at Changi Airport running smoothly. Voy was impressed by the level of

skill, coordination and discipline required to manage such a complex and fast-paced operation with precision and safety.

Since then, Voy has aspired to be part of the highly skilled and dedicated community of ATCOs. Inspired by their strong sense of professionalism and commitment, he applied for the CAAS ATC Undergraduate Scholarship. He is motivated by the opportunity to work closely with pilots and fellow ATCOs to ensure the safe and orderly movement of aircraft.

Voy chose to study Biotechnology, believing that science and technology can improve everyday lives and play an increasingly important role in shaping the future of the aviation sector.

"I look forward to being part of a dynamic ATC team that safeguards Singapore's skies, and to contributing to CAAS' efforts to advance air traffic management and support the safe and efficient growth of air travel." **Mr Lee Voy**, CAAS ATC Undergraduate Scholar.
