<sup>†</sup> Provisional figures

<sup>#</sup> Added to the list of notifiable diseases as of 30 Jun 2022. To date, all mpox infections detected have been Clade IIb infections.

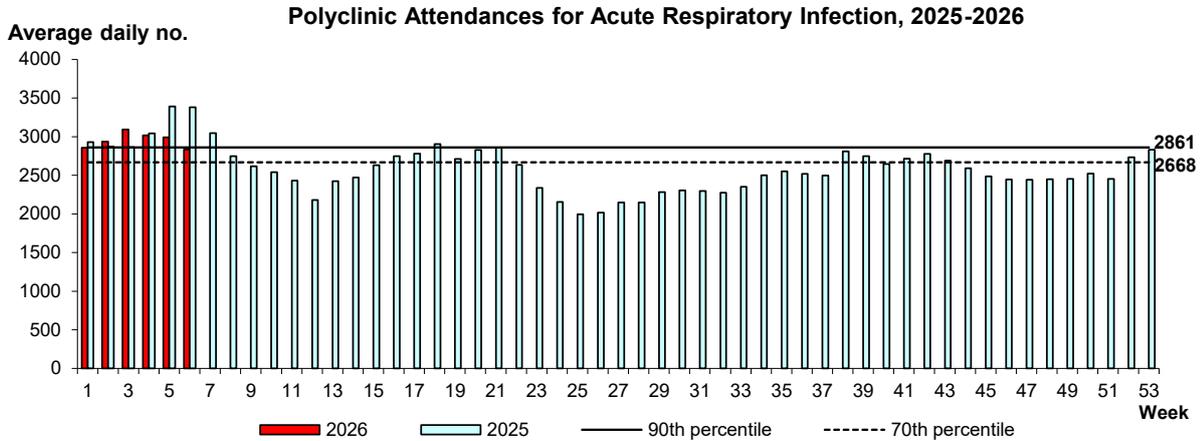

<sup>^</sup> With effect from E-week 27, 2023, only confirmed cases of MERS will be reported, instead of the number of persons tested.

\*\* With effect from January 2026, national-level STI data will be reported.

## Acute Respiratory Infection (ARI) Situation in Singapore 2026

ARI indicators for E-week 6 (8 - 14 Feb 2026) were as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI was 2835 (over 5.5 working days) in E-week 6.

In E-week 6, the top respiratory pathogens among adult and paediatric samples from the National Surveillance Programme for Acute Respiratory Infection<sup>§</sup> (ARI) were:

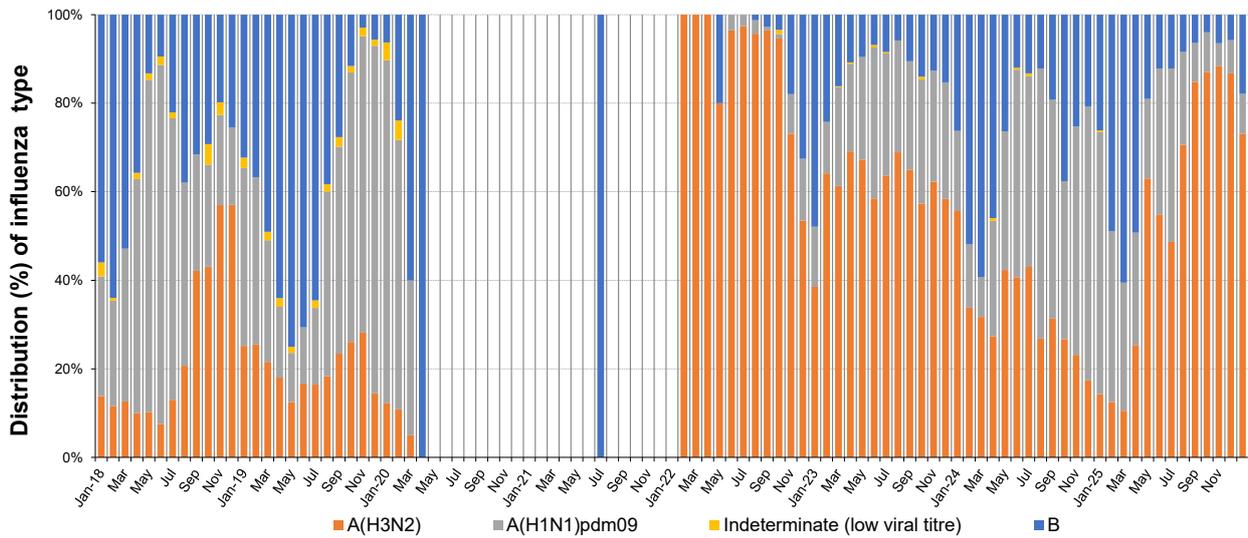

- Adult samples: Human rhinovirus/enterovirus (24%), non-SARS seasonal coronaviruses (11%), and parainfluenza viruses (9%)
- Paediatric samples: Human rhinovirus/enterovirus (32%), parainfluenza viruses (20%), and adenovirus (8%).

<sup>§</sup> CDA monitors the trends of respiratory pathogens in the community through our sentinel surveillance programme for Acute Respiratory Infections (ARI) which includes polyclinics and selected general practitioner (GP) clinics.

## COVID-19 and Influenza

The proportion of patients with influenza-like illness (ILI) among the polyclinic attendances for ARI was 0.4%. The positivity rate for influenza among ILI samples (n= 148) in the community was 10% in E-week 6. The positivity rate for COVID-19 among ARI samples (n= 311) in the community was 1% in E-week 6. Of the 67 specimens tested positive for influenza in January 2026, six were positive for influenza A(pH1N1) (9%), 49 were positive for influenza A(H3N2) (73%), and 12 were positive for influenza B (18%).

### Monthly Influenza Surveillance

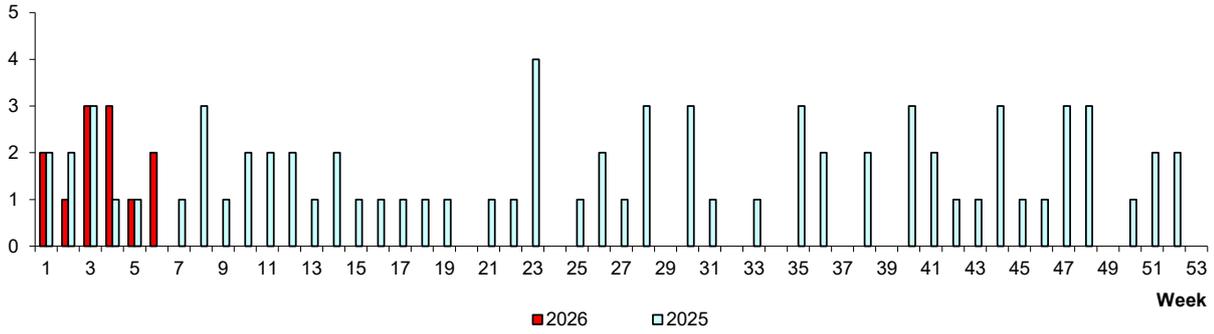

Based on influenza-like illness (ILI) samples from GPs and polyclinics

WEEKLY INCIDENCE OF FOOD/WATER-BORNE DISEASES, 2025-2026

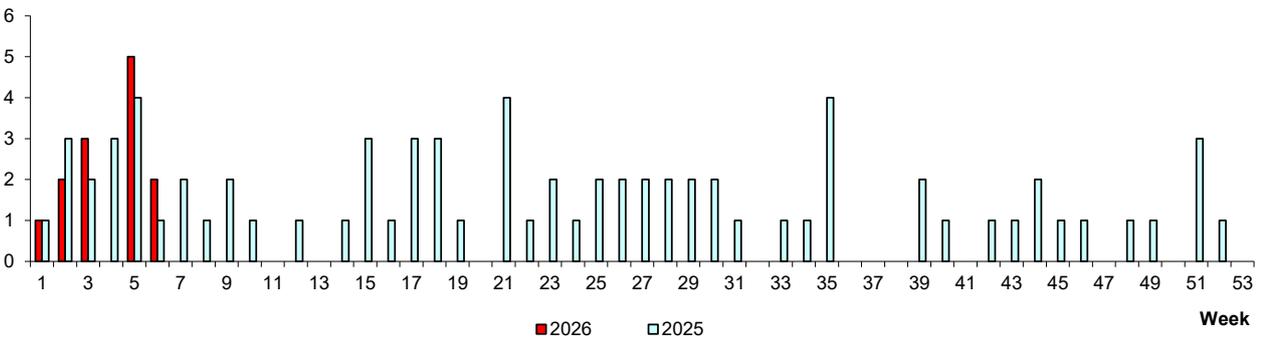

No. of Cases

Paratyphoid/Typhoid

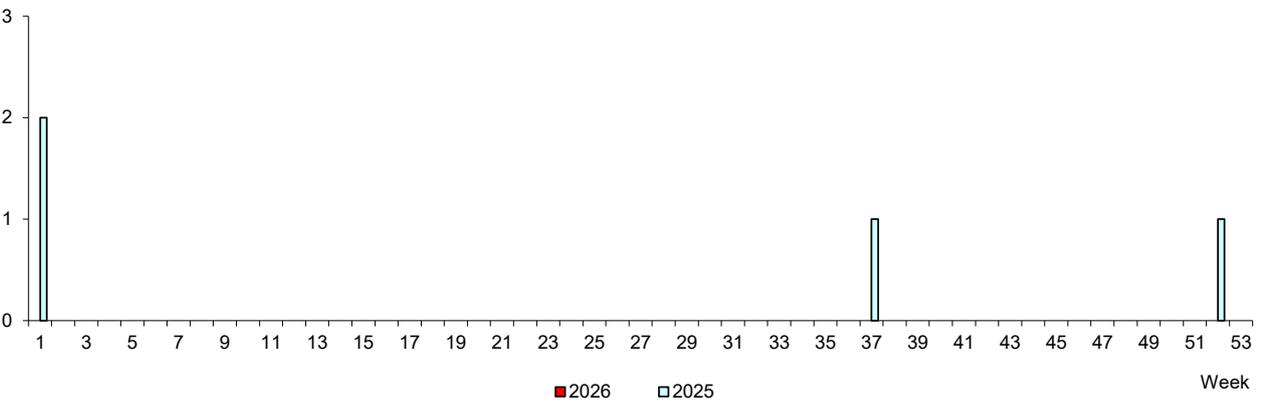

No. of Cases

Acute Hepatitis A

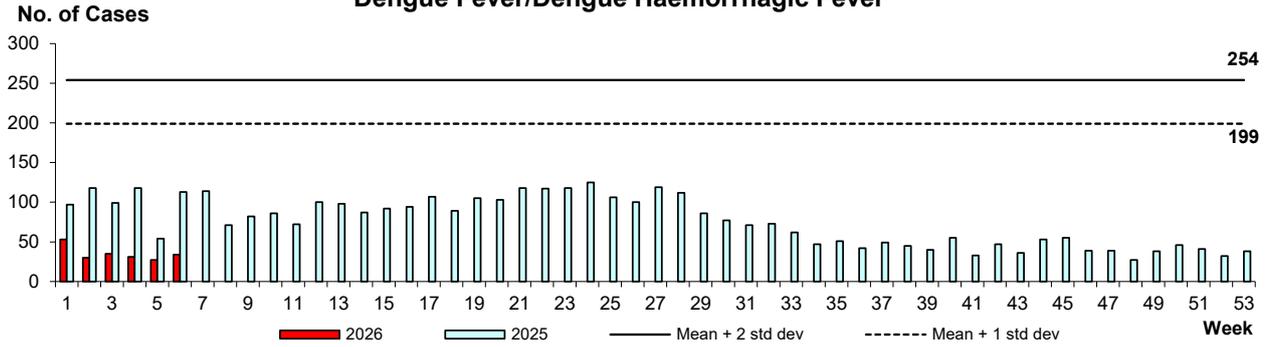

No. of Cases

Cholera

**WEEKLY INCIDENCE OF VECTOR-BORNE DISEASES, 2025-2026**

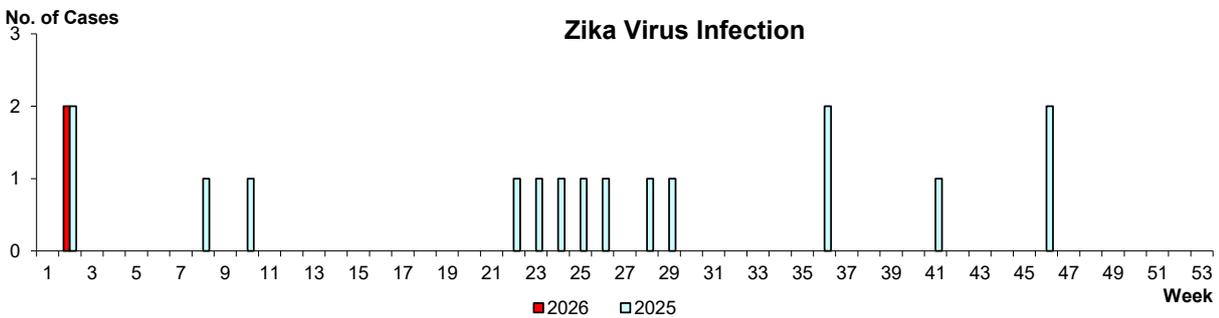

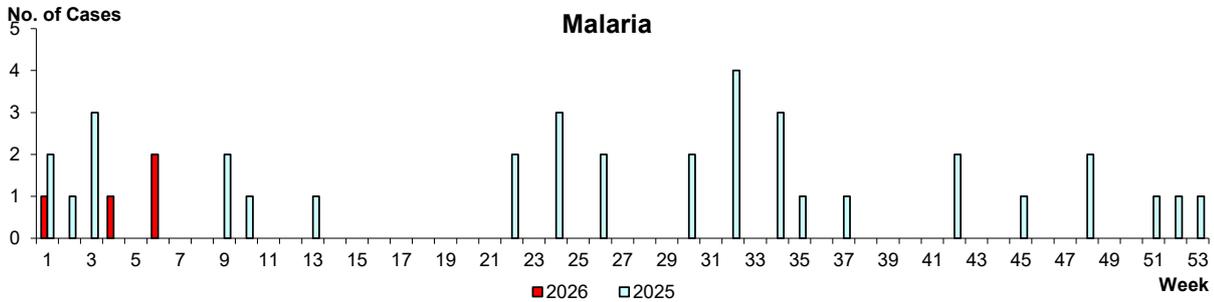

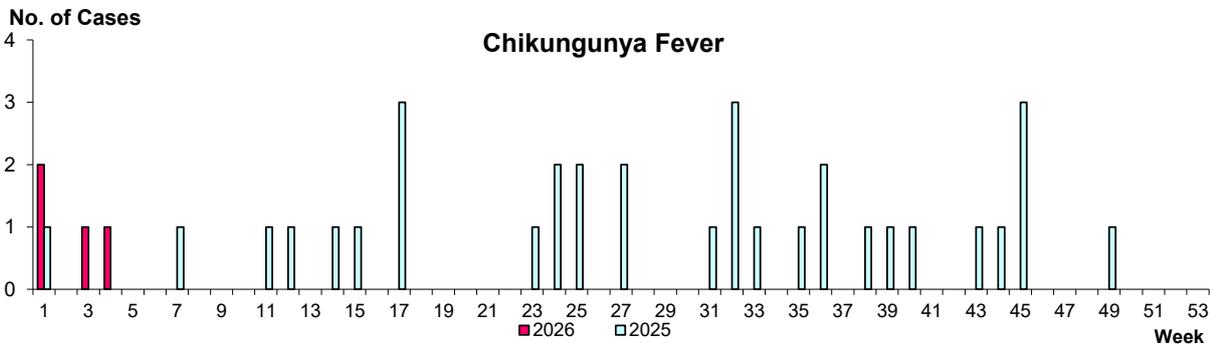

**Dengue Fever/Dengue Haemorrhagic Fever**

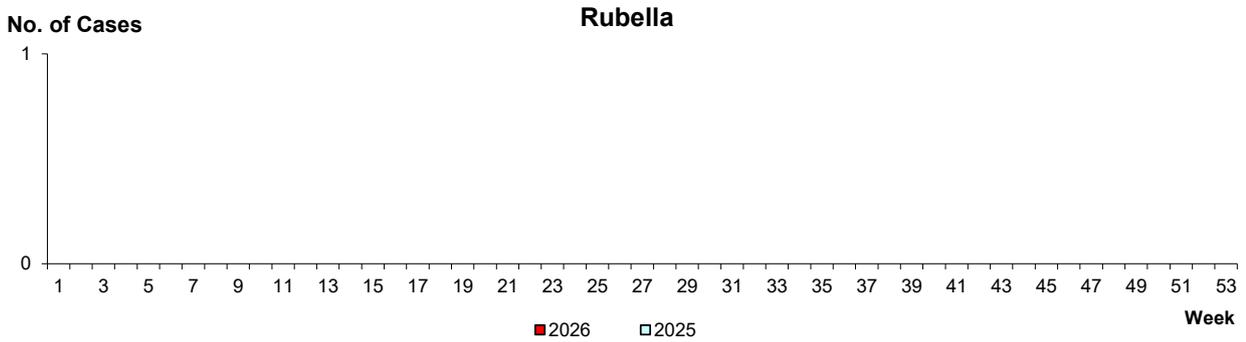

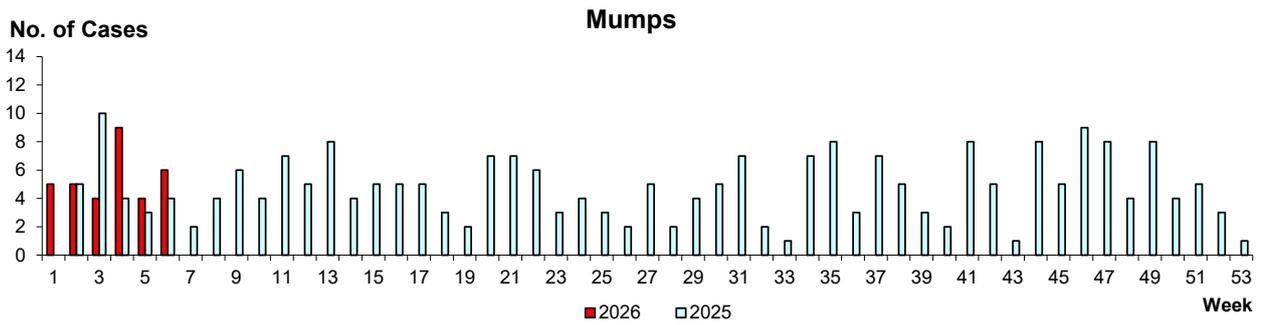

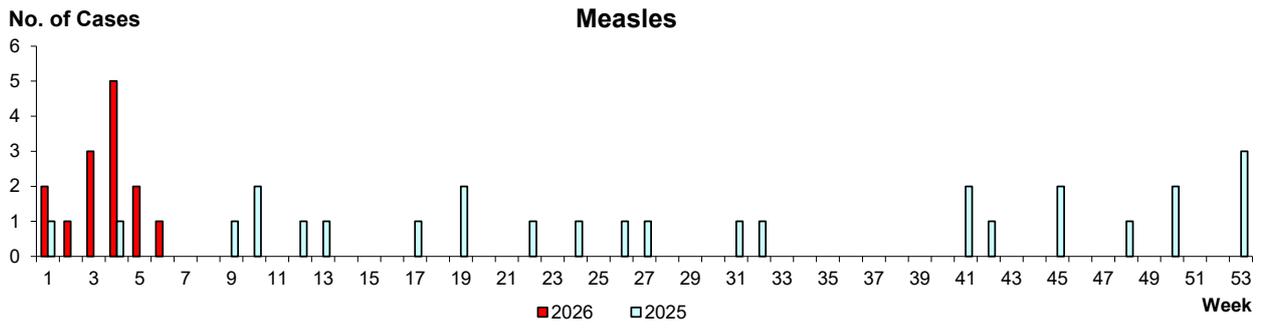

The number of dengue notifications was 34 in E-week 6.

The number of hospital admissions remains stable at 5 in E-week 6, compared to 5 in E-week 5.

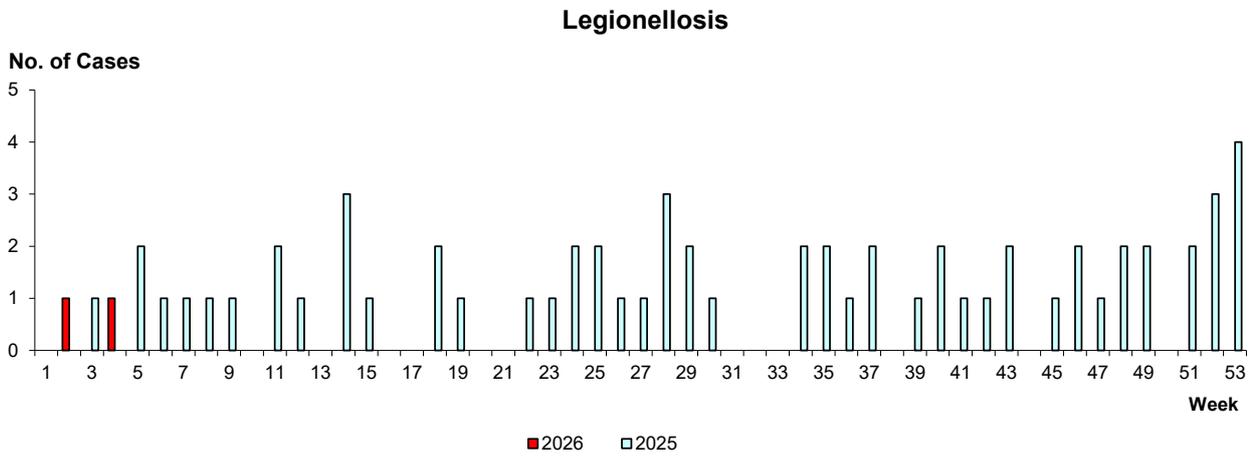

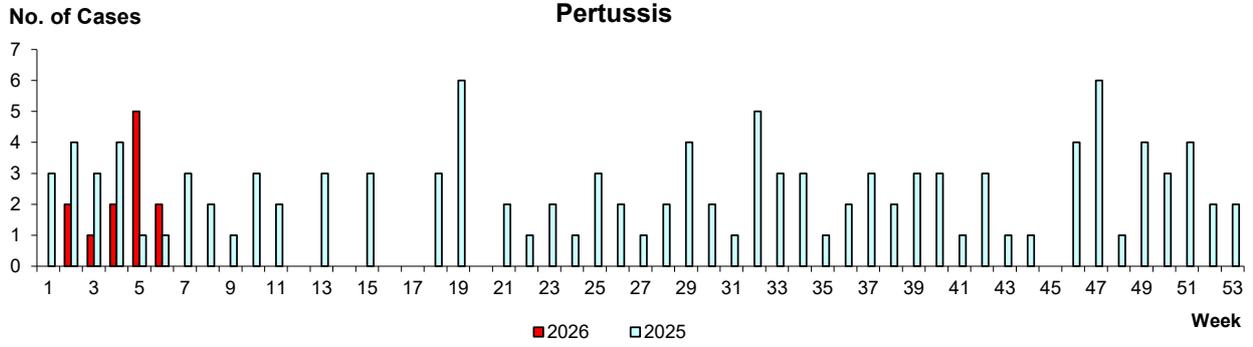

Preliminary results of all positive dengue samples serotyped in January 2025 showed DEN-1, DEN-2, DEN-3 and DEN-4 at 7.5%, 68.7%, 17.9% and 6.0% respectively.
