Legally Notifiable STIs ^{**}	1545			8083			
Tuberculosis	76			493			

* Provisional figures

[#] Added to the list of notifiable diseases as of 30 Jun 2022. Nine cases of Mpox clade 1b infection had been detected to date. All other cases were clade 1lb infections.

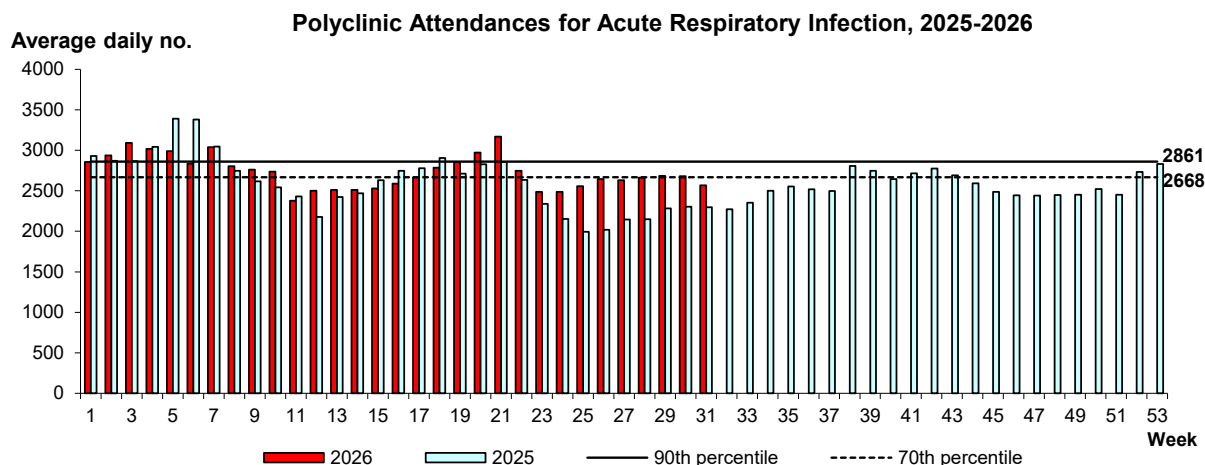

[^] With effect from E-week 27, 2023, only confirmed cases of MERS will be reported, instead of the number of persons tested.

^{**} With effect from January 2026, national-level STI data will be reported.

Acute Respiratory Infection (ARI) Situation in Singapore 2026

ARI indicators for E-week 31 (2 - 8 Aug 2026) were as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI was 2568 (over 5.5 working days) in E-week 31.

In E-week 31, the top respiratory pathogens among adult and paediatric samples from the National Surveillance Programme for Acute Respiratory Infection[§] (ARI) were:

- Adult samples: Human rhinovirus/enterovirus (23%), influenza (13%), and SARS-CoV-2 (11%).
- Paediatric samples: Human rhinovirus/enterovirus (40%), influenza (13%), and respiratory syncytial virus (10%).

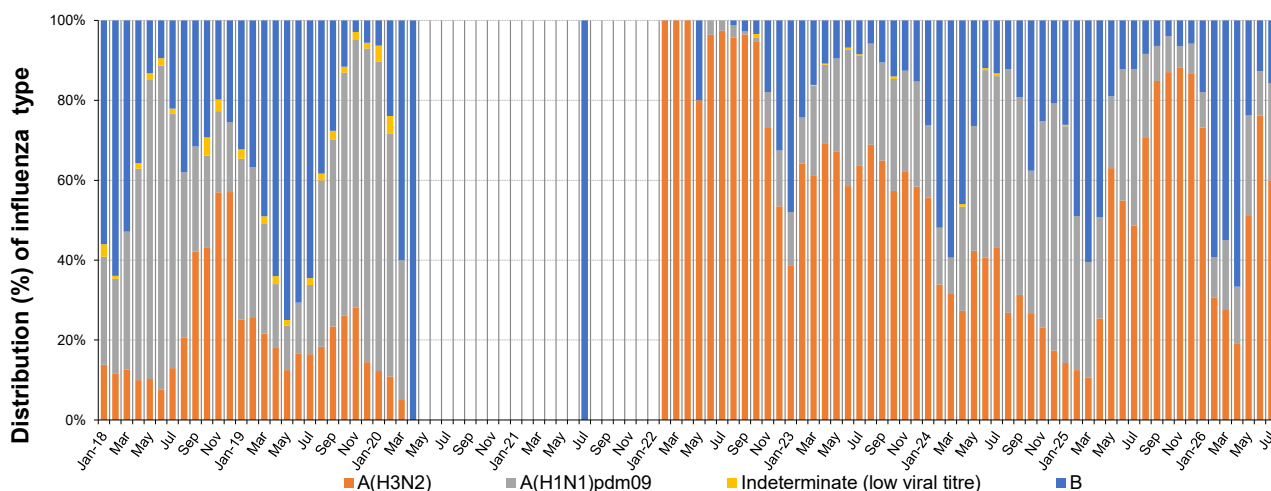

[§] CDA monitors the trends of respiratory pathogens in the community through our sentinel surveillance programme for Acute Respiratory Infections (ARI) which includes polyclinics and selected general practitioner (GP) clinics.

COVID-19 and Influenza

The positivity rate for influenza among ILI samples (n= 147) in the community was 25% in E-week 31. The positivity rate for COVID-19 among ARI samples (n= 309) in the community was 7% in E-week 31.

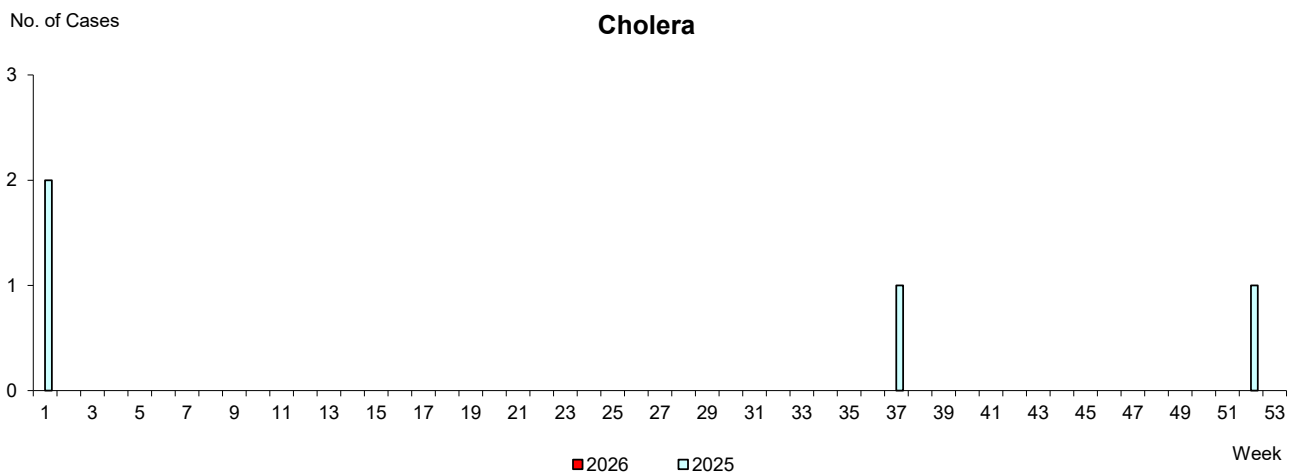

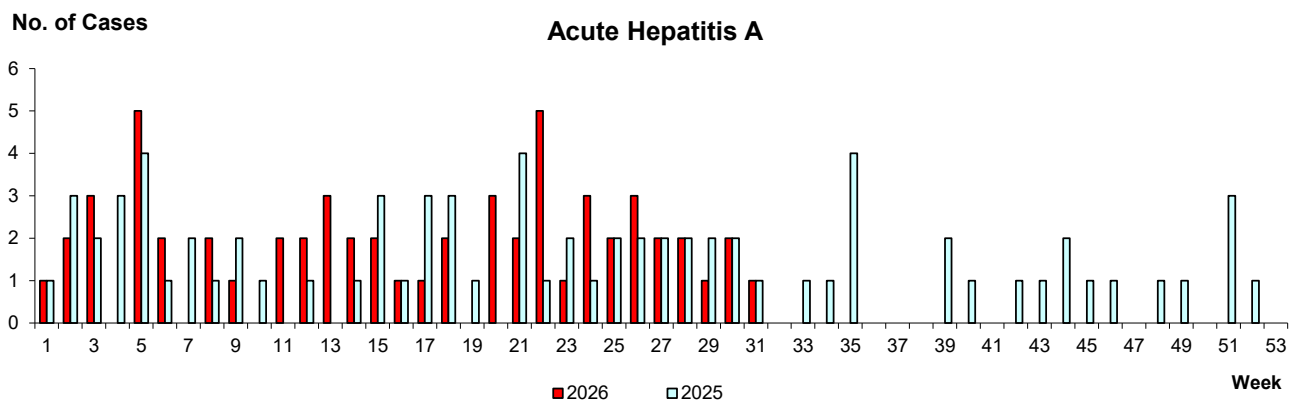

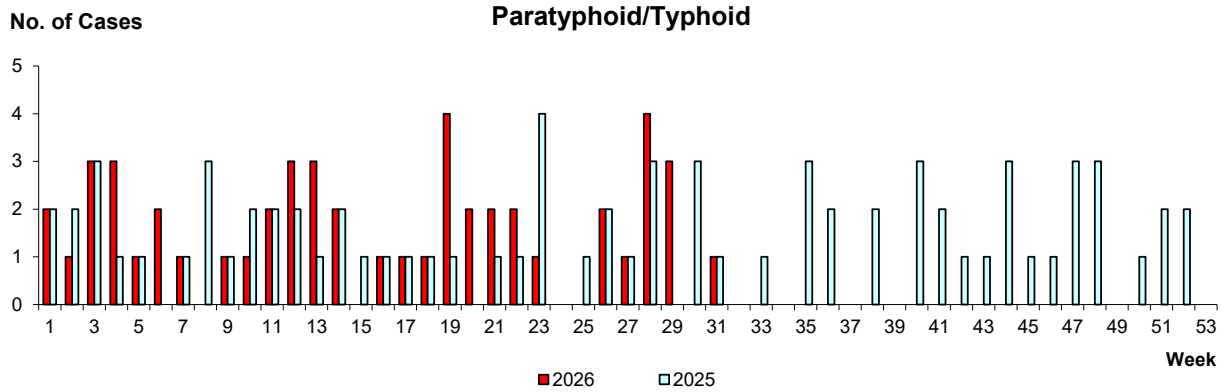

Of the 165 specimens tested positive for influenza in July 2026, 40 were positive for influenza A(pH1N1) (24.2%), 99 were positive for influenza A(H3N2) (60.0%), and 26 were positive for influenza B (15.8%).

Monthly Influenza Surveillance

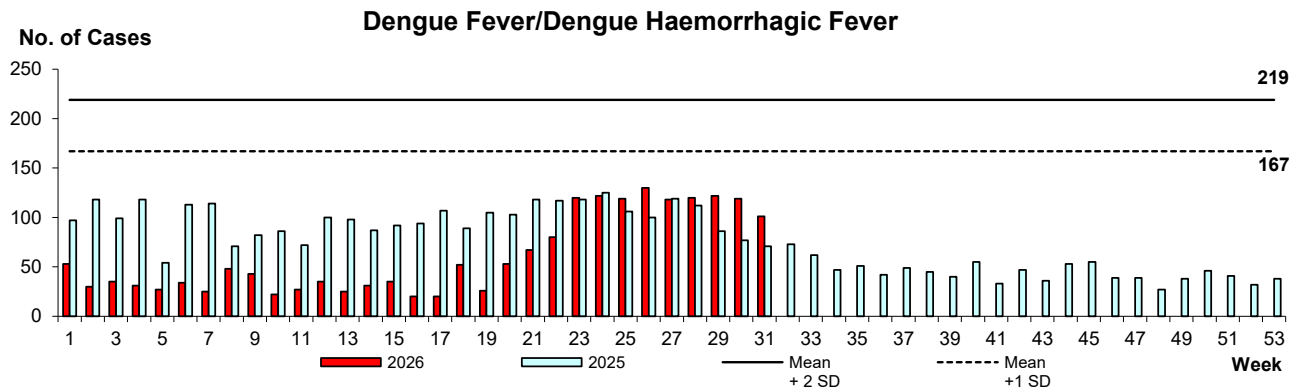

Based on influenza-like illness (ILI) samples from GPs and polyclinics.

WEEKLY INCIDENCE OF FOOD/WATER-BORNE DISEASES, 2025-2026

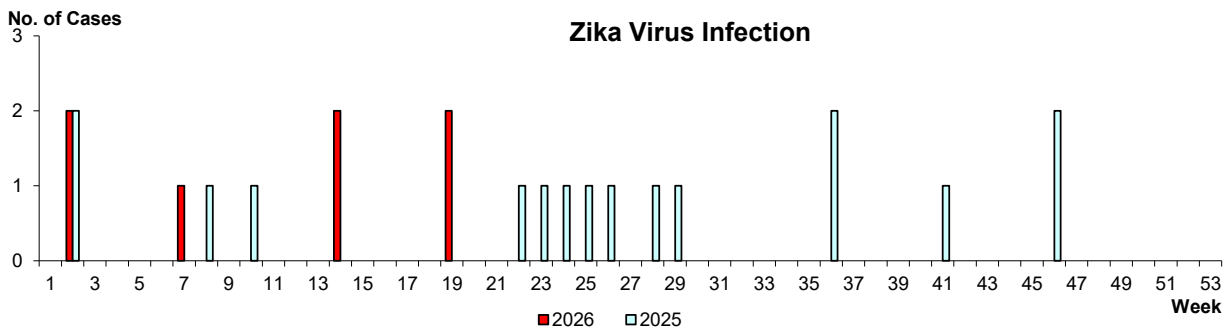

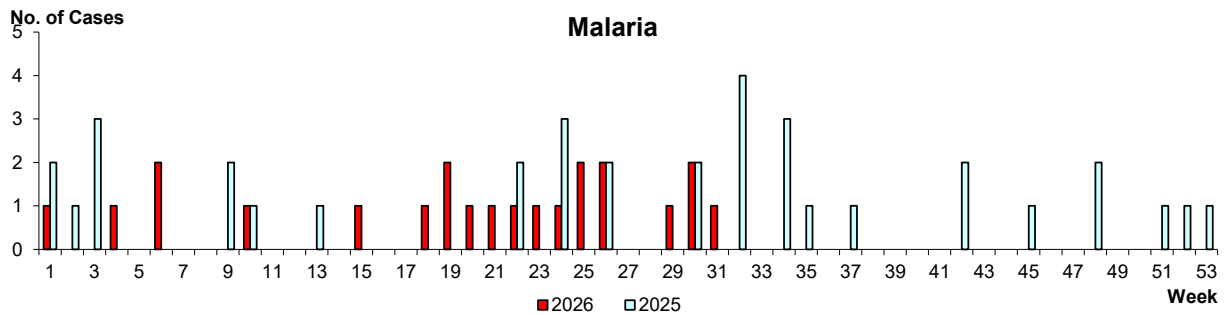

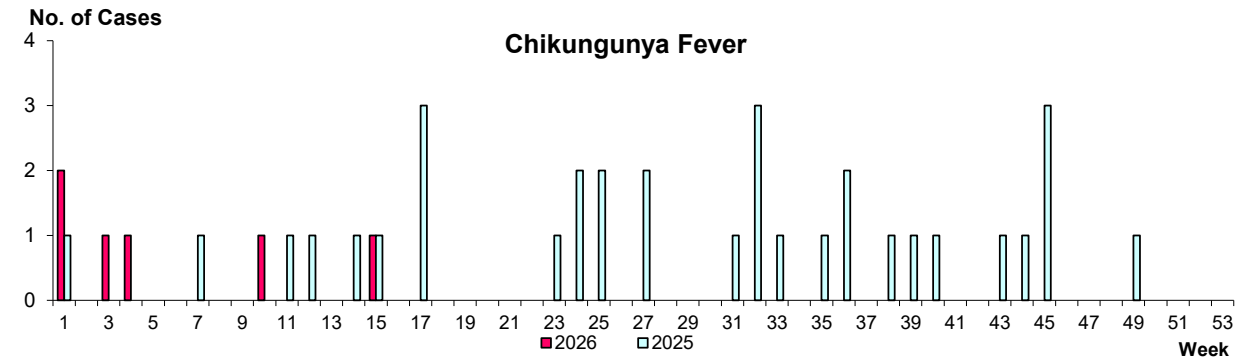

WEEKLY INCIDENCE OF VECTOR-BORNE DISEASES, 2025-2026

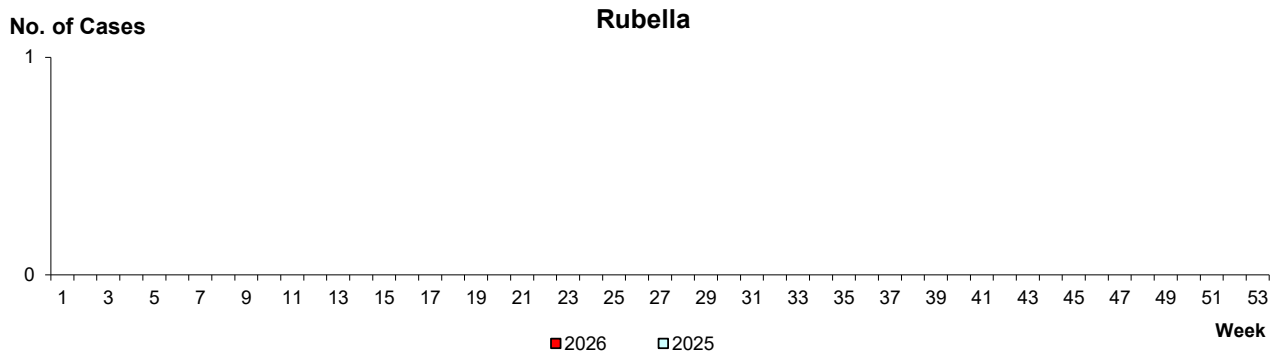

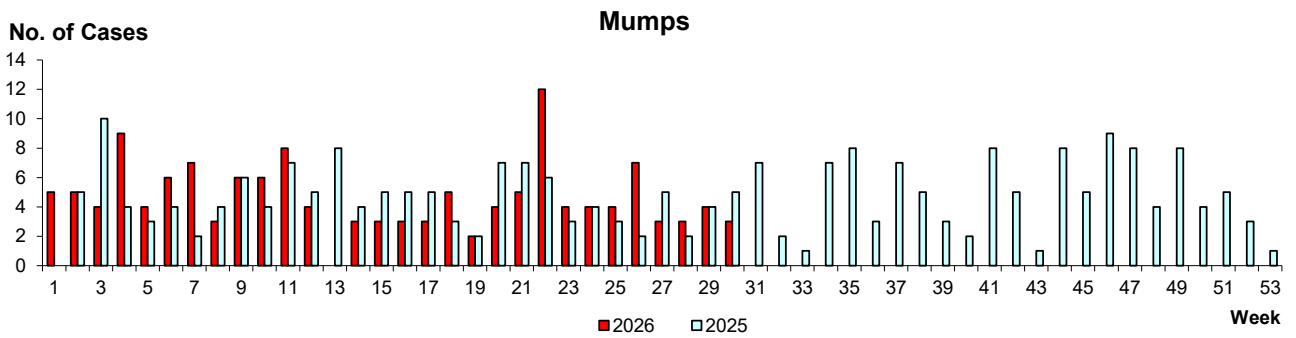

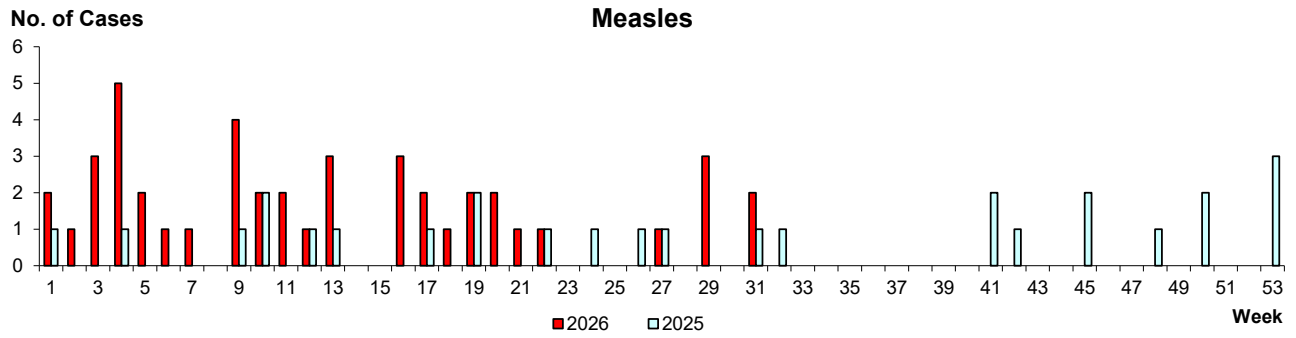

The number of dengue notifications was 101 in E-week 31.

The number of hospital admissions increased to 23 in E-week 31, compared to 15 in E-week 30.

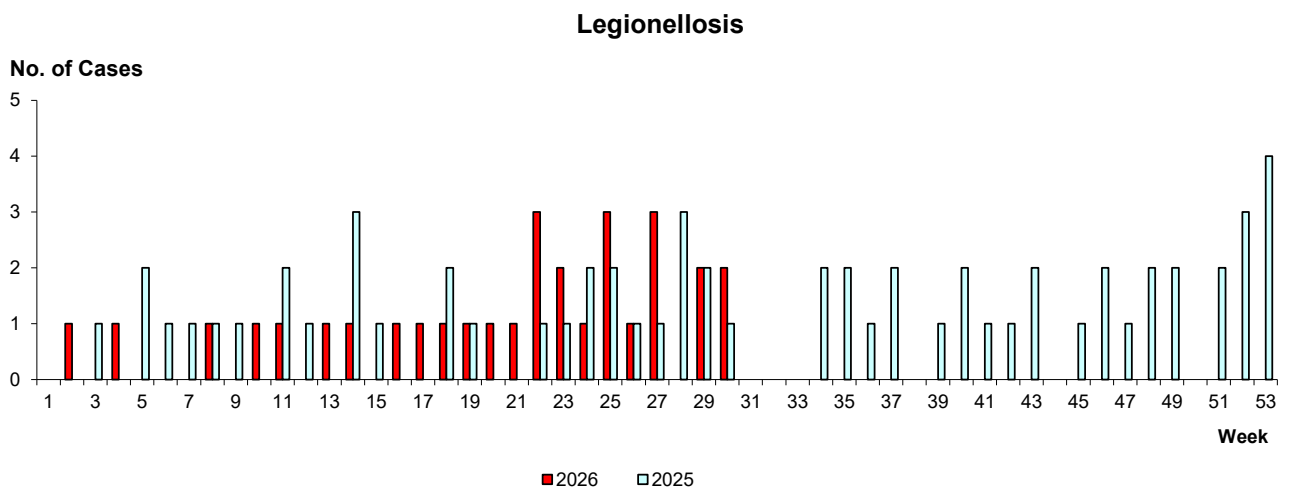

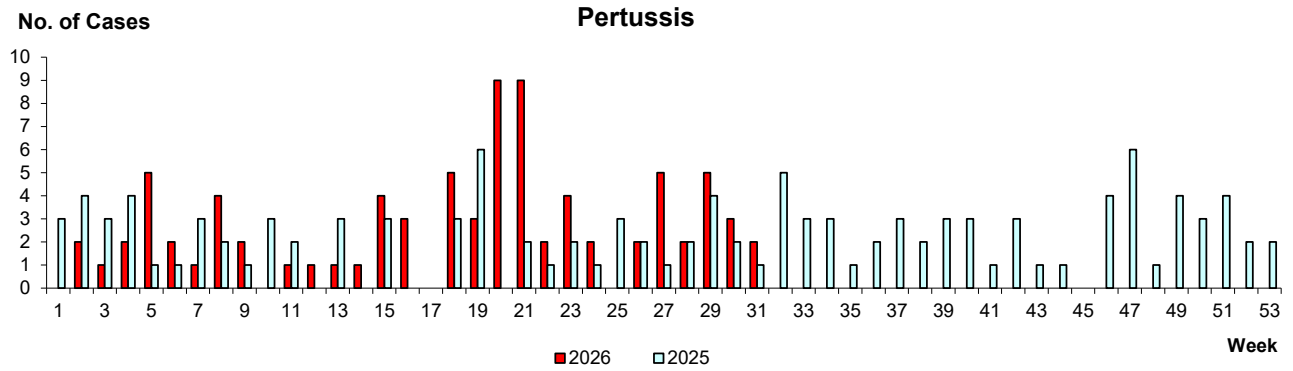

Preliminary results of all positive dengue samples serotyped in July 2026 showed DEN-1, DEN-2, DEN-3 and DEN-4 at 5.7%, 38.2%, 55.7% and 0.5% respectively.

WEEKLY INCIDENCE OF AIR/DROPLET-BORNE DISEASES, 2025-2026
