* *Provisional figures*

# *Added to the list of notifiable diseases as of 30 Jun 2022.*

§ *Added to the list of notifiable diseases as of 31 Oct 2026.*

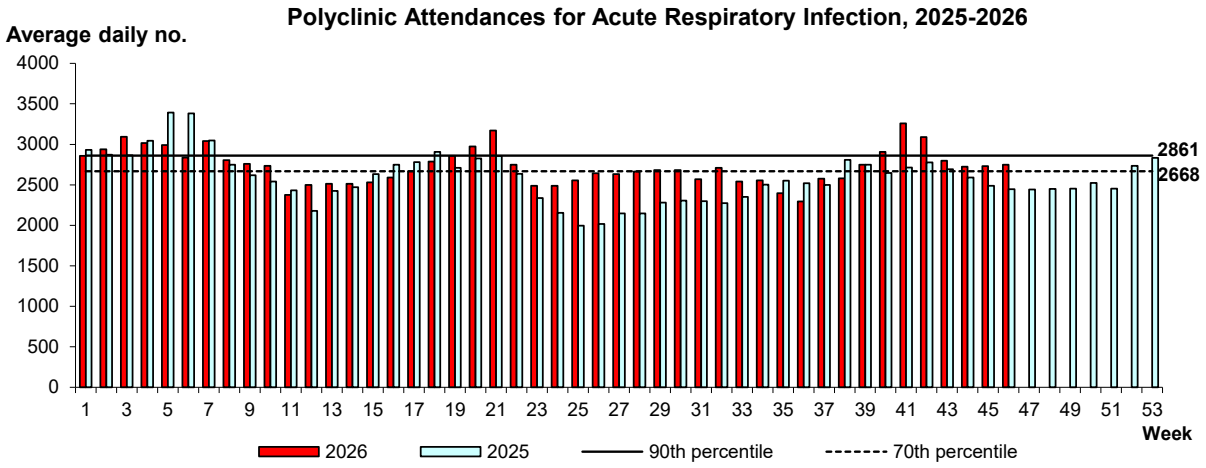

^ *With effect from E-week 27, 2023, only confirmed cases of MERS will be reported, instead of the number of persons tested.*

** *With effect from January 2026, national-level STI data will be reported.*

## Acute Respiratory Infection (ARI) Situation in Singapore 2026

ARI indicators for E-week 46 (15 - 21 Nov 2026) were as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI was 2749 (over 5.5 working days) in E-week 46.

In E-week 46, the top respiratory pathogens among adult and paediatric samples from the National Surveillance Programme for Acute Respiratory Infection[§] (ARI) were:

- Adult samples: Human rhinovirus/enterovirus (26%), influenza (18%), and non-SARS seasonal coronaviruses (7%).
- Paediatric samples: Human rhinovirus/enterovirus (27%), influenza (27%), and parainfluenza viruses (14%).

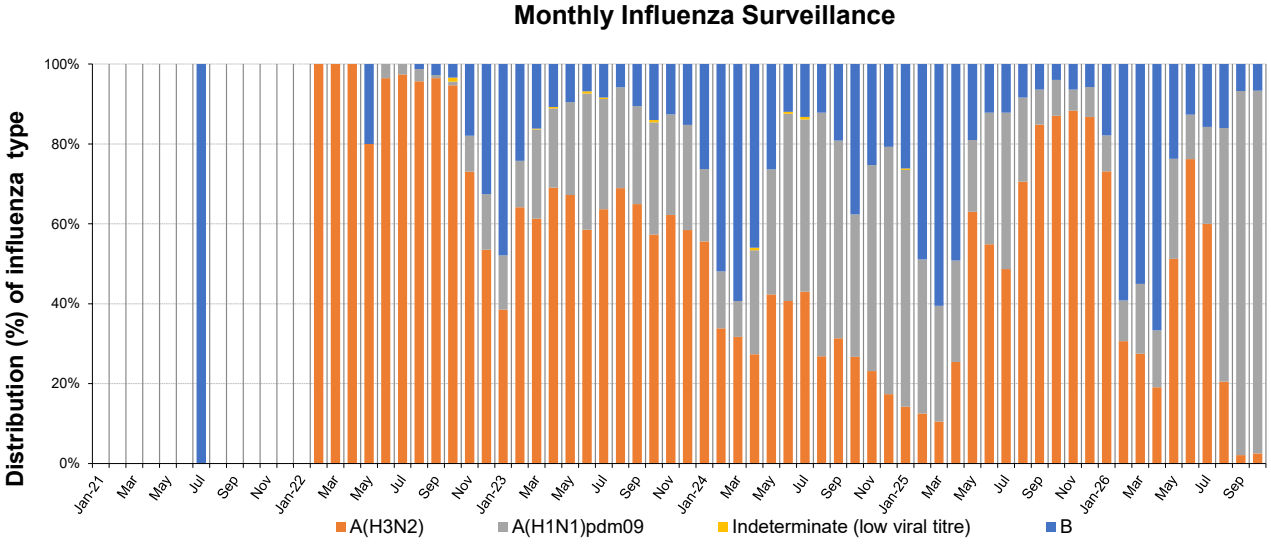

*§ CDA monitors the trends of respiratory pathogens in the community through our sentinel surveillance programme for Acute Respiratory Infections (ARI) which includes polyclinics and selected general practitioner (GP) clinics.*

### COVID-19 and Influenza

The positivity rate for influenza among ILI samples (n= 181) in the community was 34% in E-week 46. The positivity rate for COVID-19 among ARI samples (n= 300) in the community was 1% in E-week 46.

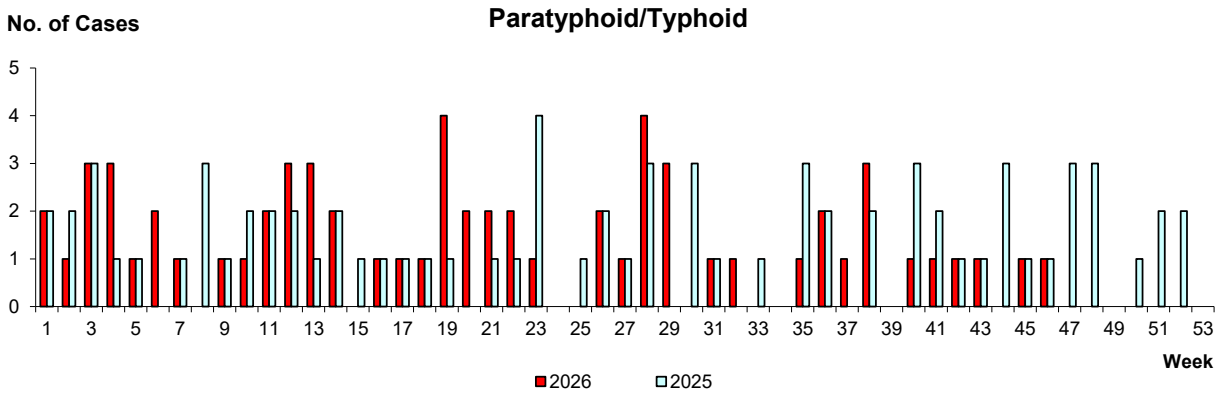

Of the 314 specimens that tested positive for influenza in October 2026, 285 were positive for influenza A(H1N1)pdm09 (90.8%), eight were positive for influenza A(H3N2) (2.5%), and 21 were positive for influenza B (6.7%)***.

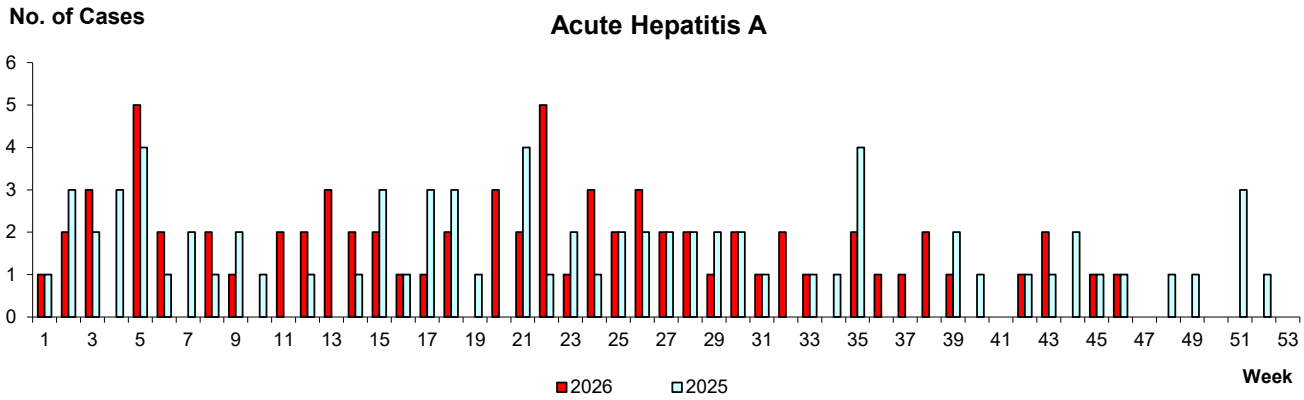

*** *Figures may not add to 100% due to rounding.*

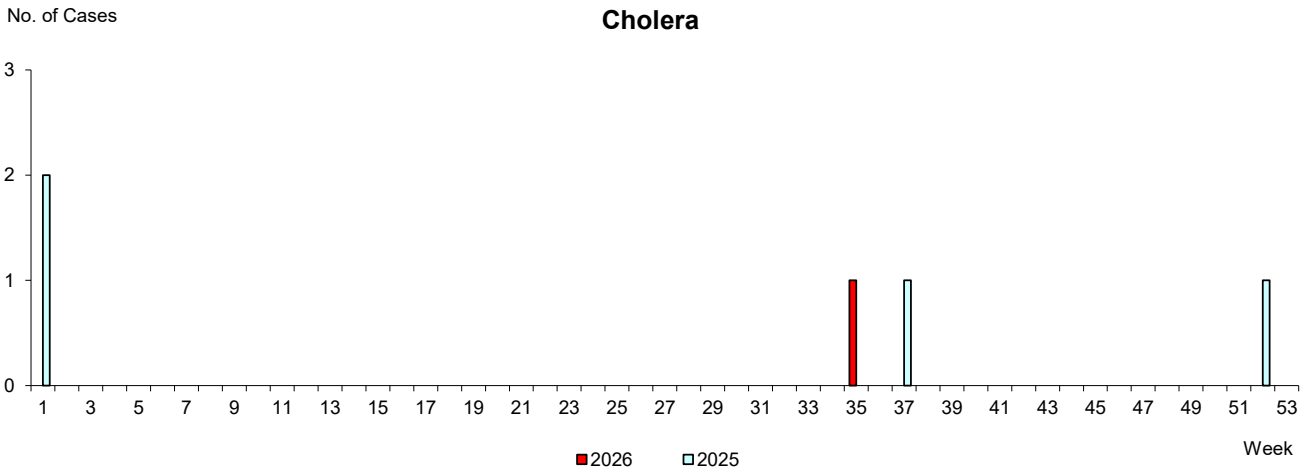

*Based on influenza-like illness (ILI) samples from GPs and polyclinics.*

## WEEKLY INCIDENCE OF FOOD/WATER-BORNE DISEASES, 2025-2026

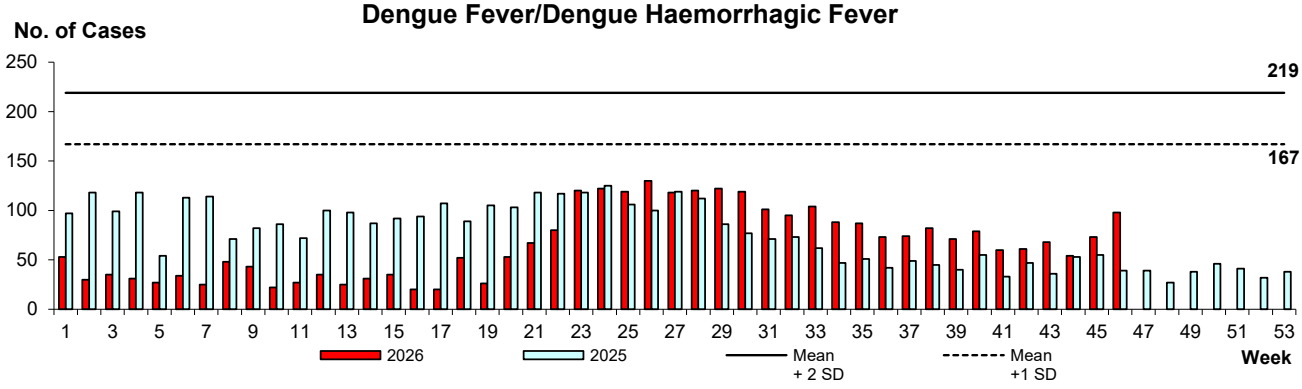

## WEEKLY INCIDENCE OF VECTOR-BORNE DISEASES, 2025-2026

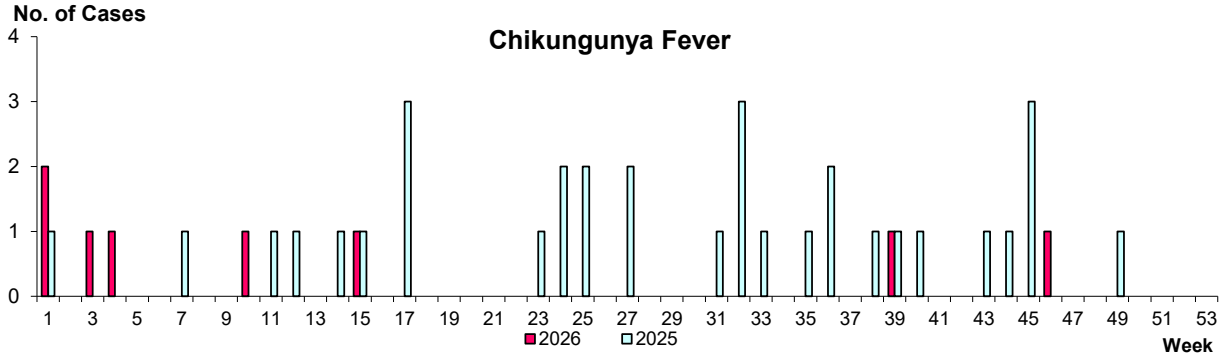

### Dengue Fever/Dengue Haemorrhagic Fever

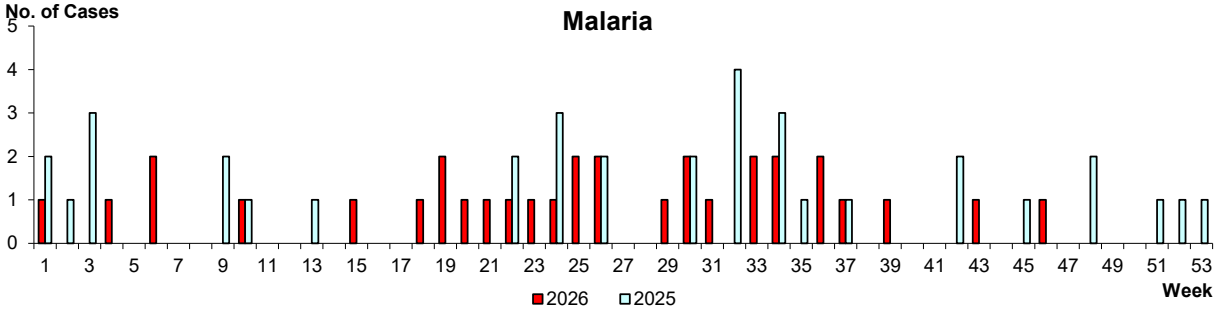

The number of dengue notifications was 98 in E-week 46.
The number of hospital admissions increased to 18 in E-week 46, compared to 10 in E-week 45.

Preliminary results of all positive dengue samples serotyped in Nov 2026 showed DEN-1, DEN-2, DEN-3 and DEN-4 at 35.4%, 18.5%, 38.5% and 7.7% respectively.

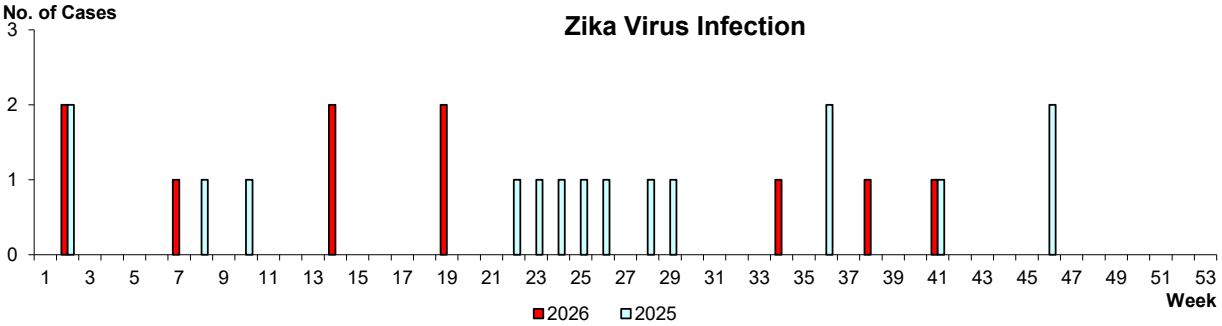

### Chikungunya Fever

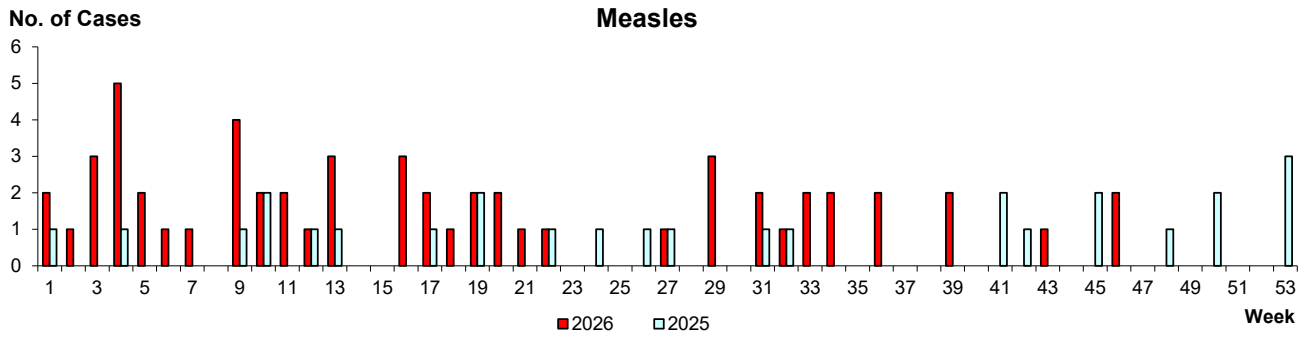

### Malaria

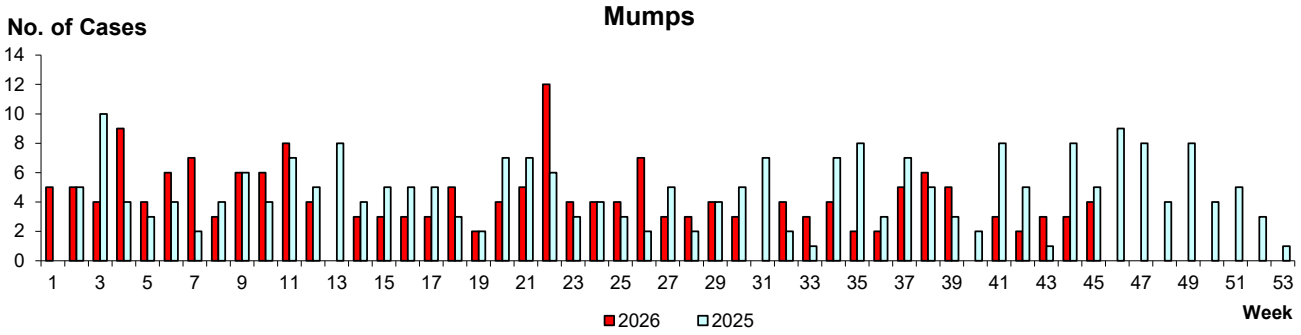

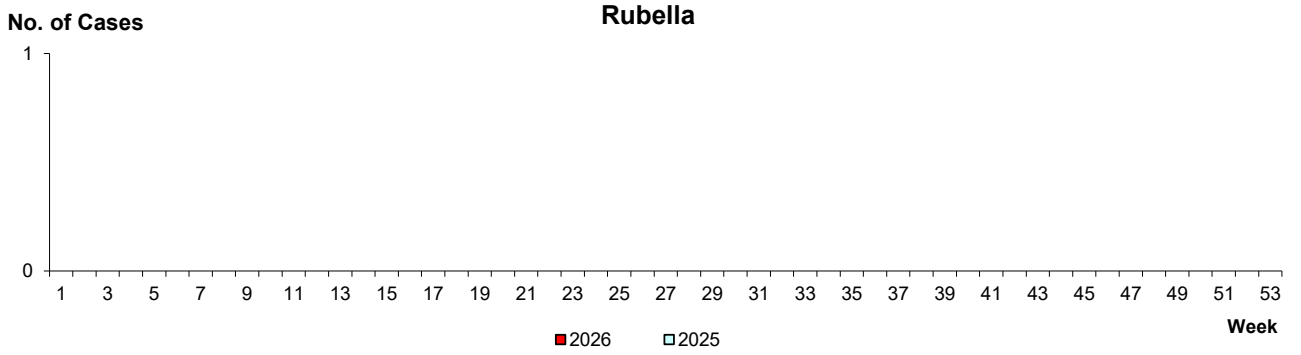

### Zika Virus Infection

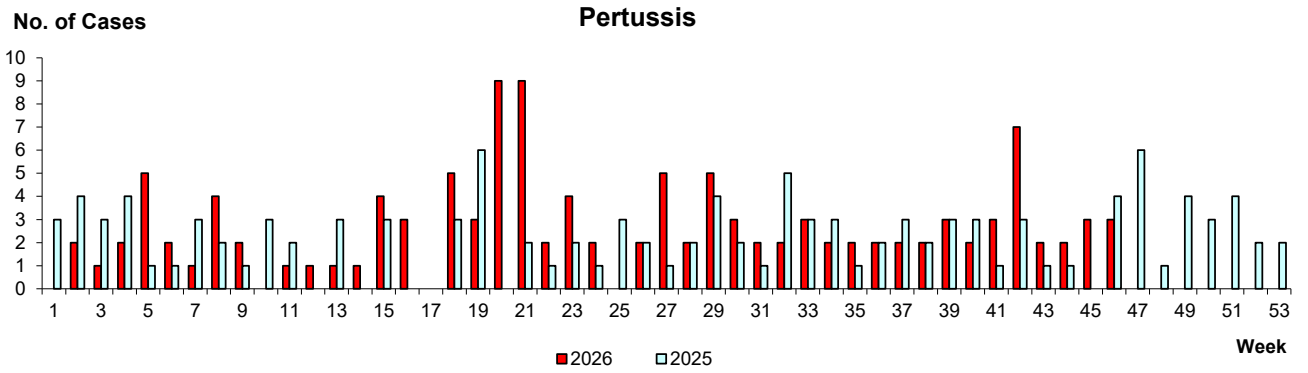

## WEEKLY INCIDENCE OF AIR/DROPLET-BORNE DISEASES, 2025-2026

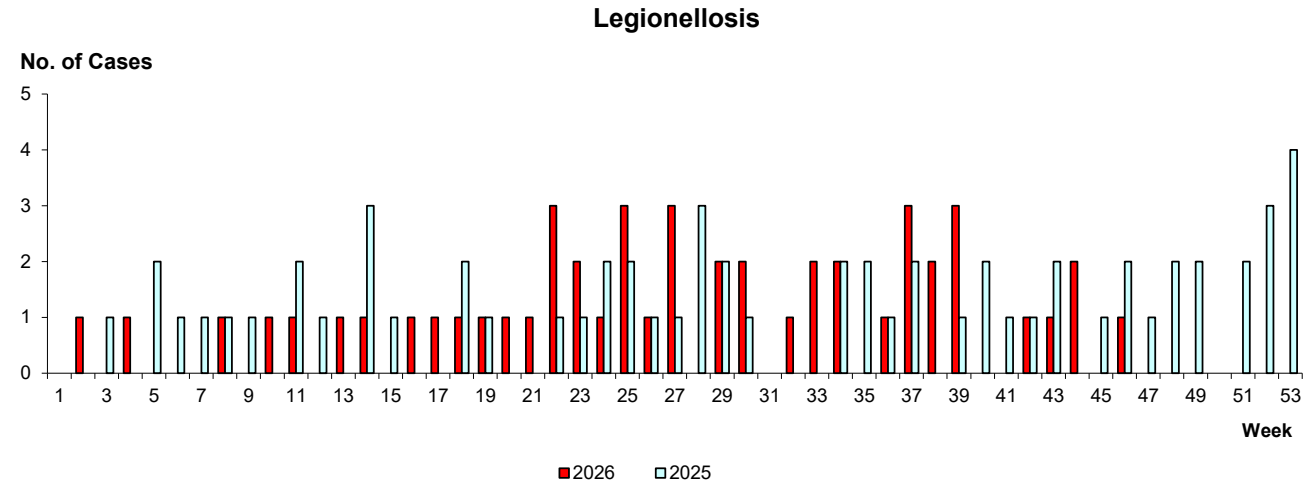

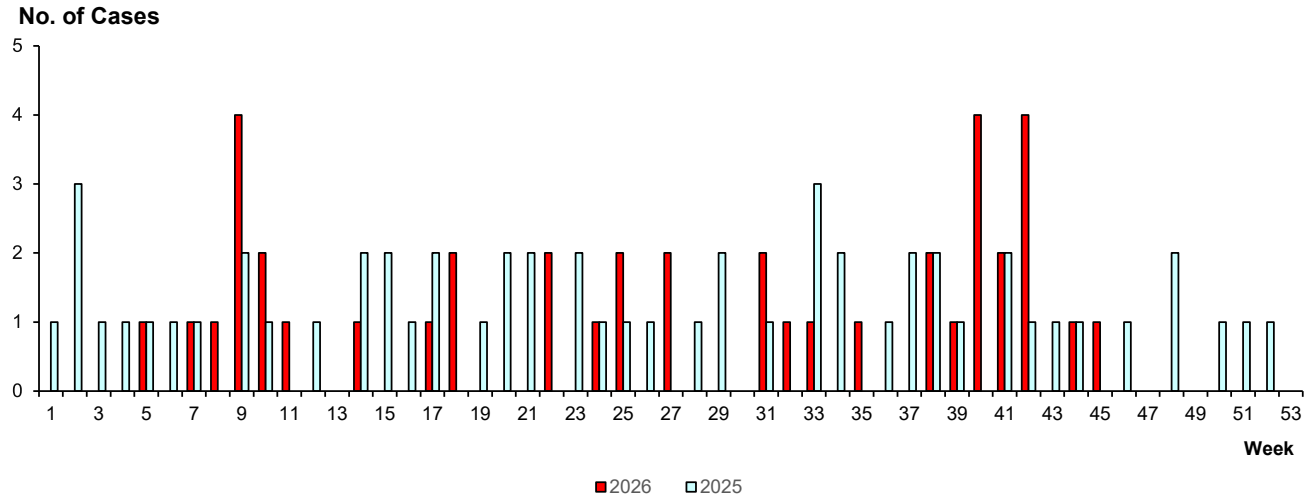

## WEEKLY INCIDENCE OF AIR/DROPLET-BORNE DISEASES, 2025-2026

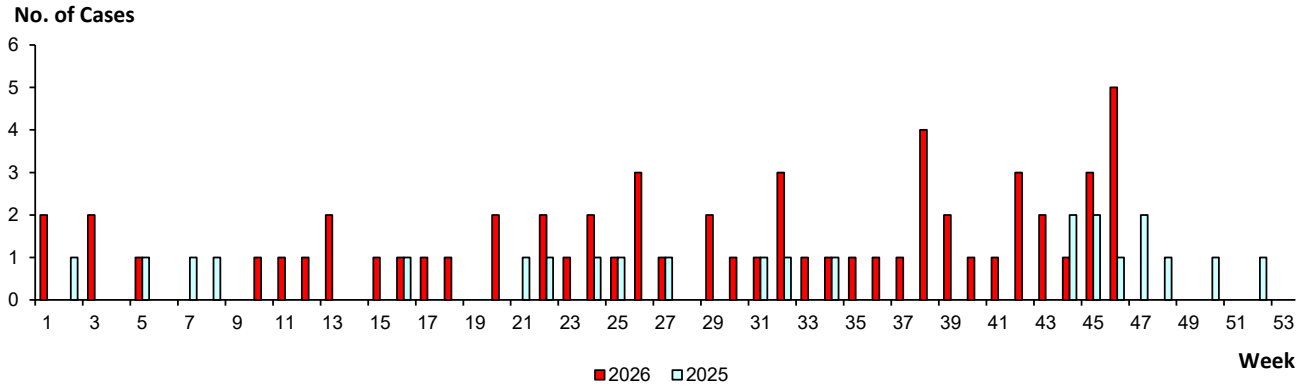

## WEEKLY INCIDENCE OF OTHER DISEASES, 2025-2026

### Melioidosis

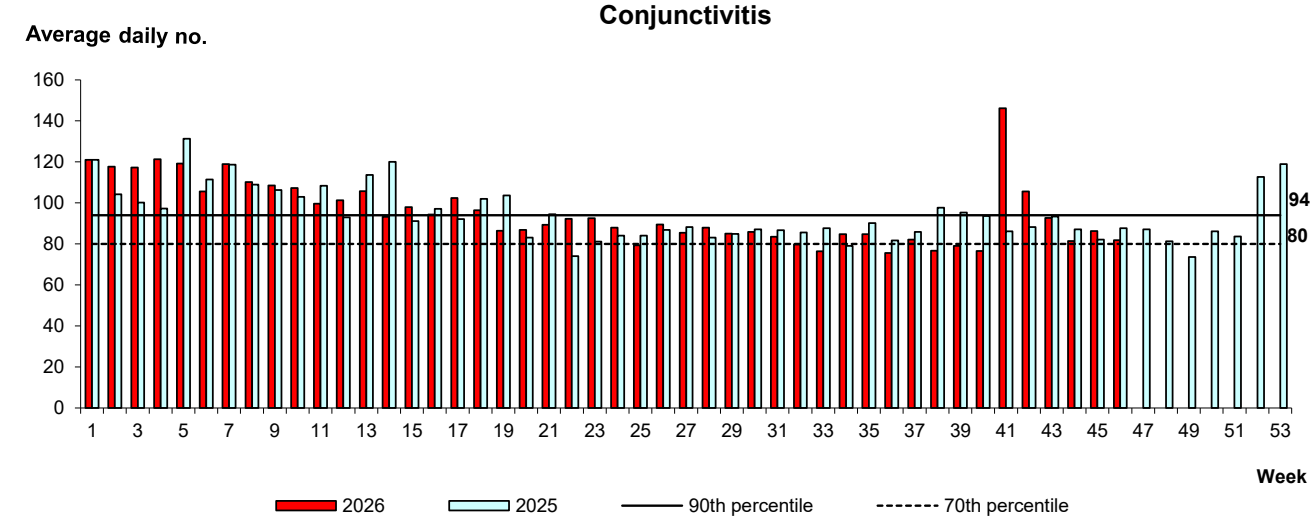

### Mpox

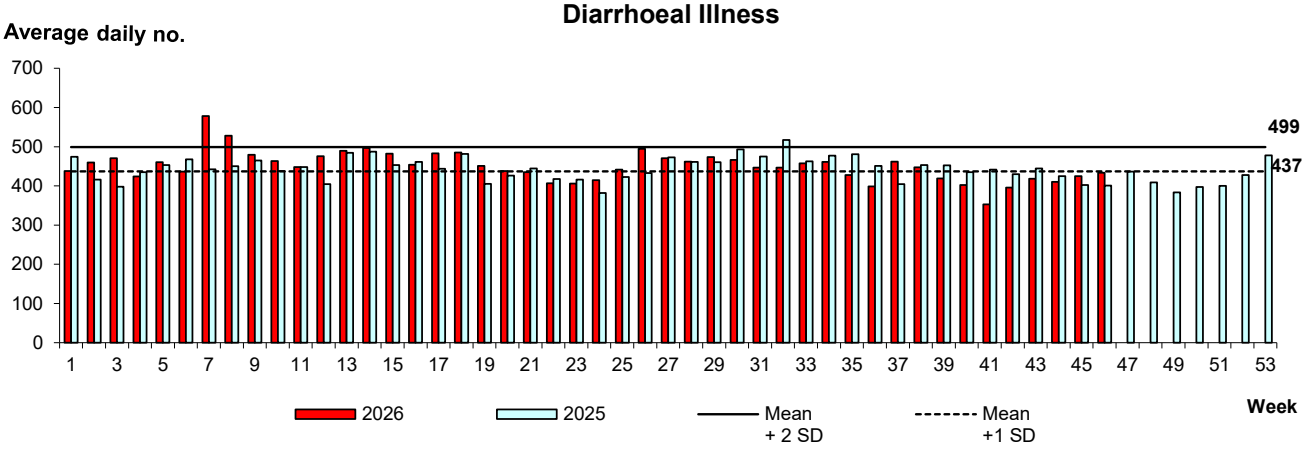

## POLYCLINIC ATTENDANCES, 2025-2026

### Conjunctivitis

### Diarrhoeal Illness

### Hand, Foot & Mouth Disease
