HIV/AIDS	10			64			
Legally Notifiable STIs**	1482			6538			
Tuberculosis	80			417			

[†] Provisional figures

[#] Added to the list of notifiable diseases as of 30 Jun 2022. The fourth case of Mpox clade 1b infection was detected in E-week 20 2026. All other cases were clade 1b infections.

[^] With effect from E-week 27, 2023, only confirmed cases of MERS will be reported, instead of the number of persons tested.

** With effect from January 2026, national-level STI data will be reported.

Acute Respiratory Infection (ARI) Situation in Singapore 2026

ARI indicators for E-week 23 (7 - 13 Jun 2026) were as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI was 2489 (over 5.5 working days) in E-week 23.

In E-week 23, the top respiratory pathogens among adult and paediatric samples from the National Surveillance Programme for Acute Respiratory Infection[§] (ARI) were:

- Adult samples: Human rhinovirus/enterovirus (20%), influenza (17%), and SARS-CoV-2 (11%).
- Paediatric samples: Human rhinovirus/enterovirus (30%), human metapneumovirus (10%), influenza (10%), and parainfluenza viruses (10%).

[§] CDA monitors the trends of respiratory pathogens in the community through our sentinel surveillance programme for Acute Respiratory Infections (ARI) which includes polyclinics and selected general practitioner (GP) clinics.

COVID-19 and Influenza

The positivity rate for influenza among ILI samples (n= 145) in the community was 19% in E-week 23. The positivity rate for COVID-19 among ARI samples (n= 284) in the community was 9% in E-week 23.

Of the 80 specimens tested positive for influenza in May 2026, 20 were positive for influenza A(pH1N1) (25.0%), 41 were positive for influenza A(H3N2) (51.3%), and 19 were positive for influenza B (23.8%).

Monthly Influenza Surveillance

Based on influenza-like illness (ILI) samples from GPs and polyclinics.

WEEKLY INCIDENCE OF FOOD/WATER-BORNE DISEASES, 2025-2026

WEEKLY INCIDENCE OF VECTOR-BORNE DISEASES, 2025-2026

The number of dengue notifications was 120 in E-week 23.

The number of hospital admissions increased to 18 in E-week 23, compared to 13 in E-week 22.

Preliminary results of all positive dengue samples serotyped in June 2026 showed DEN-1, DEN-2, DEN-3 and DEN-4 at 3.4%, 55.2%, 34.5% and 6.9% respectively.

WEEKLY INCIDENCE OF AIR/DROPLET-BORNE DISEASES, 2025-2026
