# Overview of Charity

# Overview of Charity

**The SG Eco Fund was set up as a charitable trust under the Trustees Act, Cap 337, by way of a Trust Deed on 24 November 2020.**

**Date of Incorporation:**

24 November 2020

**Date of Charity Registration:**

28 April 2021

**Unique Entity Number (UEN):**

T20CC0012E

**Registered Address:**

40 Scotts Road, #24-00,  
Environment Building,  
Singapore 228231

**Bank:**

United Overseas Bank

**Auditor:**

Audit Alliance LLP

**Investment Advisor:**

Monetary Authority of Singapore

## Objective

The SG Eco Fund supports projects that advance environmental sustainability and involve the community in Singapore by providing grants to eligible individuals, community groups, and organisations. The SG Eco Fund also encourages collaboration between partners to deliver environmental solutions.

## Vision

Together, a sustainable and green Singapore for all generations.

## Mission

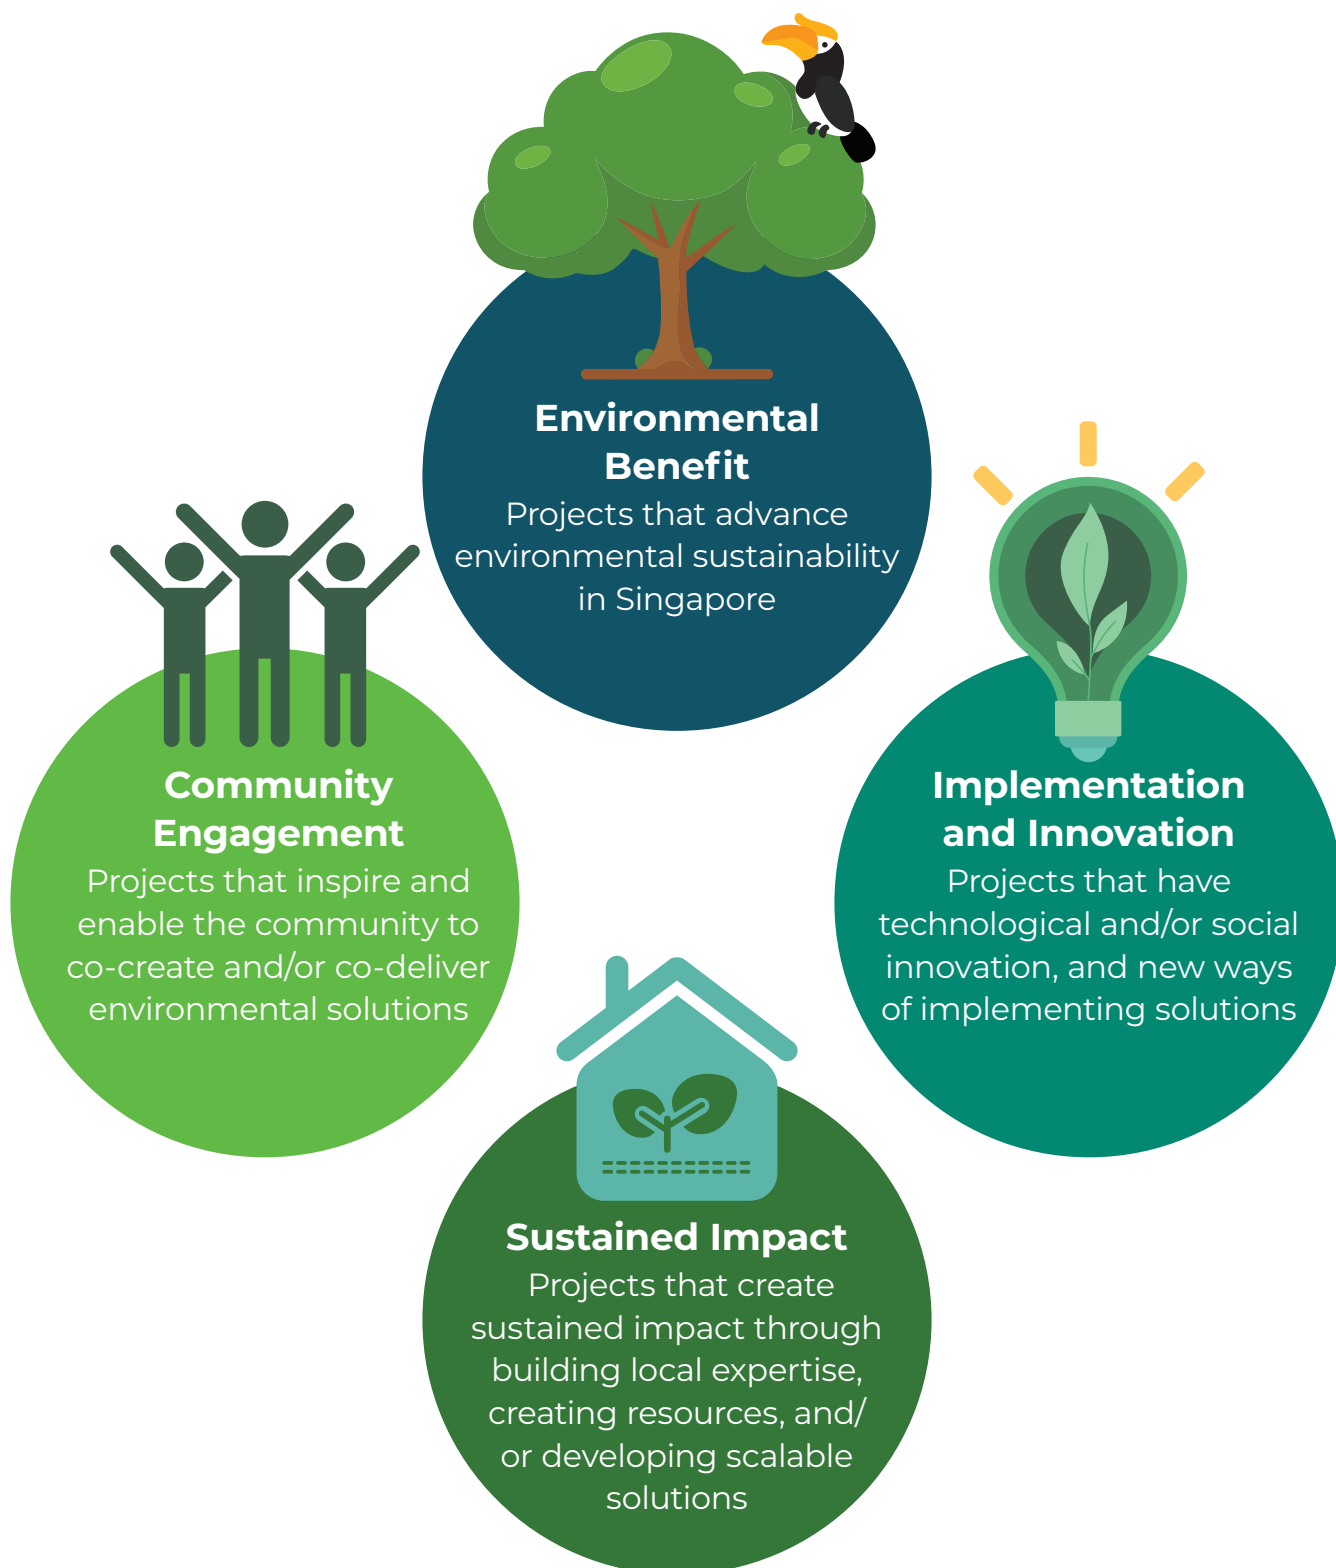

To enable our community to build a sustainable and green Singapore.

## Funding Principles:

We adopt four funding principles to guide the type of projects we support.

# Chairman's Message

In 2025, we commemorate the 60th anniversary of Singapore's independence (SG60) and the 5th anniversary of the SG Eco Fund. Although SG Eco Fund is still relatively young, it has grown from strength to strength and become a source of support for community efforts to promote environmental sustainability and climate resilience.

Over the years, we have seen increasingly ambitious and creative proposals from grant applicants. This demonstrates a growing understanding of environmental issues and our community's interest in contributing to efforts to address climate change. This can also be partly attributed to our collaborative efforts of working with grant applicants, through workshops and consultations, to improve the design of their projects to enhance their viability.

While the Fund has supported numerous projects over the years, our measure of success extends beyond the number of grants awarded to also focus on community participation. Our grant recipients are reaching out to more members of the community than ever, sharing ideas and inspiring others towards a more environmentally sustainable lifestyle and climate resilient Singapore. Feedback from the ground has been encouraging, with many participants sharing that they feel they can make a real difference to environmental issues. Many also express how participation in their projects have changed their perspectives and further inspired them about environmental action.

The past year marked another significant milestone as we welcomed more strategic partners with extensive networks and expertise in different sectors. We thank our partners who have helped us empower our grant recipients to scale their initiatives, tap into broader resources, and engage with diverse stakeholders from creative communities to corporate partners across Singapore.

In celebration of SG60, we have increased the maximum grant amount of the Sprout category to \$30,000, for qualifying projects submitted in 2025. This reflects our commitment to empowering ground-up initiatives that contribute to Singapore's sustainability goals during this significant national milestone. We hope this increase will boost the reach and impact of these projects, helping more people to contribute to Singapore's sustainability journey. As we look to the future, we remain committed to working alongside members of the sustainability community to make Singapore a more sustainable home for all Singaporeans!

**Mr Stanley Loh**  
*Board Chairman*

# Governance Structure

## Governance Structure

**The SG Eco Fund is governed by a Board of Trustees and supported by an Advisory Committee. All members do not receive remuneration for their service.**

### Board of Trustees

The Board of Trustees oversees the Fund's strategic objectives, directions, and values. They also approve grant distributions, monitor the Fund's activities, and oversee financial reporting and compliance. The Trustees meet at least once a year, where the quorum for each meeting is a minimum of three Trustees.

A Board meeting was conducted in January 2024, with full attendance from all Trustees.

Name	Board Appointment as of 31 Dec 2024	Designation	Date of Appointment
<b>Mr Stanley Loh</b>	Chairman	Permanent Secretary, Ministry of Sustainability and the Environment (MSE)	6 Apr 2022
<b>Mr Chaly Mah</b>	Member	Chairman, Netlink NBN Management Pte Ltd and Surbana Jurong Pte Ltd	24 Nov 2020
<b>Mdm Zuraidah Abdullah</b>	Member	CEO, Yayasan MENDAKI	24 Nov 2020
<b>Mr Joseph K.H. Koh</b>	Member	Chairman, Board of Trustees, WWFS Conservation Fund	24 Nov 2023
<b>Ms Susan Leong</b>	Member	CEO, Adsan Law LLC	24 Nov 2023

**Mr Stanley Loh**

**Mr Chaly Mah**

**Mdm Zuraidah Abdullah**

**Mr Joseph K.H. Koh**

**Ms Susan Leong**

## Advisory Committee

The Advisory Committee comprises members from the people, private, and public sectors. They advise the Trustees on the strategic direction of the Fund, as well as provide technical and domain expertise to assess grant applications.

Co-Chairpersons	Designation	Date of Appointment
<b>Mr Lim Tuang Liang</b>	Government Chief Sustainability Officer, Ministry of Sustainability and the Environment	1 Jan 2023
<b>Ms Fang Eu-Lin</b>	Sustainability and Climate Change Practice Leader, PwC Singapore	Appointed as Member on 25 Nov 2020  Appointed as Co-Chair on 1 Mar 2022

Members	Designation	Date of Appointment
<b>Ms Esther An</b>	Chief Sustainability Officer, City Developments Limited	25 Nov 2020
<b>Mr Heng Whoo Kiat</b>	Senior Director, Bay East Project Office, Gardens by the Bay	25 Nov 2020
<b>Dr Elmie Nekmat</b>	Associate Professor, Department of Communications and New Media, National University of Singapore	25 Nov 2020
<b>Ms Andie Ang</b>	President, Board of Directors, Jane Goodall Institute Singapore	25 Nov 2023
<b>Mr David Chua</b>	CEO, National Youth Council	25 Nov 2023
<b>Mr Lenard Raymond Pattiselanno</b>	Senior Director, Community Leadership & Partnerships, National Volunteer & Philanthropy Centre	25 Nov 2023
<b>Ms Cecilia Tan</b>	Vice President, Government Relations & Public Policy, Procter & Gamble Asia Pacific, Middle East & Africa	25 Nov 2023
<b>Ms Claire Wong-Low</b>	Executive Director, DBS Foundation	25 Nov 2023

## Trust Secretariat

The Trust Secretary, Ms Phua Mei Pin, Director of the Sustainability Partnerships Office, Ministry of Sustainability and the Environment, oversees the Trust Secretariat in administering the Fund.

# Funding Ground-up Sustainability Projects

# Highlights of 2024

- SG Eco Fund announced a two-year partnership with CapitaLand to jointly curate events and engagement activities to enhance awareness of environmental issues, involve communities in sustainability initiatives, and spotlight both the SG Eco Fund and its grant recipients.

April  
2024

- From June to July 2024, SG Eco Fund grant recipients organised around 60 activities for Go Green SG.
- Partnered with CapitaLand to hold an SG Eco Fund project showcase as part of Project Green at Plaza Singapura. Senior Parliamentary Secretary Mr Baey Yam Keng visited the showcase and engaged with the SG Eco Fund grant recipients.

July  
2024

- SG Eco Fund Secretariat conducted an Ideation Workshop for interested applicants to share and refine their project ideas.
- SG Eco Fund grant recipients offered exciting programmes for the public as part of the national-level Go Green SG month. Minister Grace Fu attended the Trashion Week event by our grant recipients, That WKND Company and Stridy.
- Partnered with Open Government Products to organise a sustainability-themed run of the Build for Good Hackathon, catalysing innovative digital solutions to address our challenges.

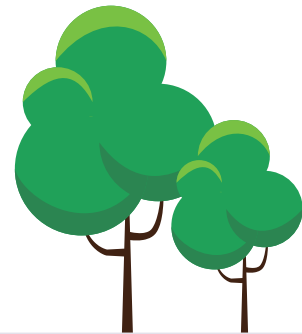

**August  
2024**

- Senior Minister of State Dr Koh Poh Koon, together with the Trustees, launched Vidacity's sustainability programmes at the former Loyang Primary School.
- Co-organised a sharing session by grant recipients on using insects for their projects and provided networking opportunities for individuals to exchange ideas and best practices.

**November  
2024**

- Partnered with EB Impact for a youth-focused hackathon, Sustainability Exchange Season 4.

**December  
2024**

- Announced the SG Eco Fund's enhanced Sprout category grant amount of \$30,000 for SG60, during a visit by new grant recipients to Terra SG's Common Space Carbon Gallery at Vidacity.

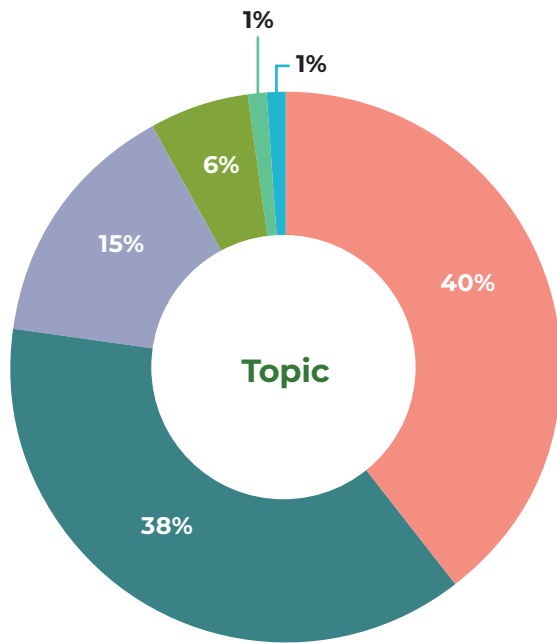

In 2024, the SG Eco Fund awarded grants to 88 projects across a range of topics, such as waste, food, and outreach on sustainability. Grant recipients in 2024 aim to engage more than 96,000 people through their projects.

**GRANT AWARDED  
\$3,952,418**

**PROJECTS FUNDED  
88**

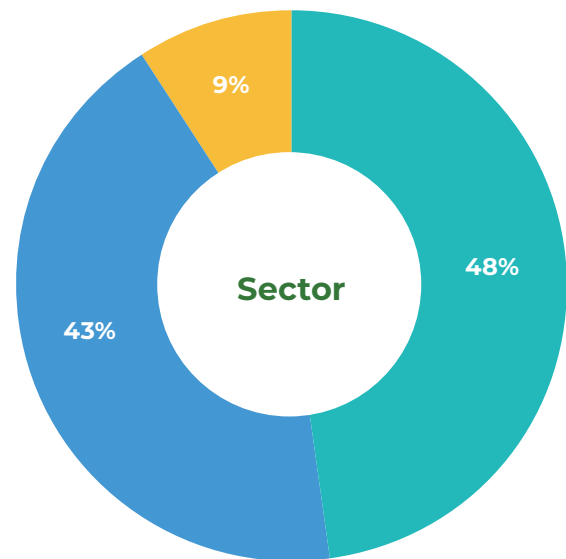

**TARGET OUTREACH  
More than  
96,000 people**

## Funded Projects by Topic and Sector

- Educating on General Sustainability
- Reduction/Recycling of Waste
- Growing of Food
- Stewarding Nature and Biodiversity
- Enhancing Water Conservation/Quality
- Tackling Environmental Pollution

- Private: Corporates, Private Schools, Social Enterprises
- People: Individuals, Non-Profit Organisations, Grassroots Organisations
- Public: Statutory Boards, Public Schools, Institutes of Higher Learning

# Featured Projects from 2024

Through the SG Eco Fund, passionate individuals and groups have turned their environmental aspirations into tangible community action. Here, our grant recipients share their journeys of creating lasting impact and inspiring others to join the sustainability movement.

# Sew Can I

by Image Mission Ltd

Image Mission's project taught women from disadvantaged backgrounds to transform used garments into practical, everyday items such as bags and household accessories. This initiative fostered a vibrant online community where participants could showcase their creations, exchange ideas and champion mindful textile consumption. The project reduced 500 kg of textile waste and engaged around 90 people over a year.

## Pang Li Kin

Founder, Image Mission

“With the SG Eco Fund, we reduced textile waste by upcycling clothing donations and at the same time, involved our community in learning a new skill. The funding gave us the foundation to continue the project and continue to contribute to the sustainability movement. The response was overwhelming, and we wished we had applied for a bigger fund to accommodate more participants, so a key learning point is to not limit your potential by the funding quantum.”

## Workshop participant

“This awareness could make a difference to save the earth by recycling our old, unused fabric materials into useful items that can be used daily. Instead of having to spend money to buy new bags, I can now sew more and save money.”

# Yuhua Agri-tech - Solar (YAS) Living Lab

by Yuhua Citizens' Consultative Committee (CCC)

YAS Living Lab converted a carpark rooftop into Singapore's first integrated agritech-solar testbed, combining vegetable growing with solar energy harvesting, while fostering community engagement.

With the SG Eco Fund's support, the Lab enabled eight groups, from institutions like Singapore Polytechnic to social organisations like Kampung Senang, to experiment with sustainable farming and solar technologies, contributing to food security and renewable energy goals. The project engaged 2,000 visitors over eight months, and produced over 500 kg of vegetables, demonstrating how urban spaces can be optimised for dual-use in food production and energy generation.

## Prof Ang Hak Seng

Chairman of YAS Living Lab, and Professor of Social Entrepreneurship (SUSS)

“Beyond the innovations in hydroponics, solar panels, and greenhouse technology, the most exciting part of our YAS lab is witnessing how the simultaneous application of all three technologies boosts our ability to produce more crops, better crops, with enhanced resource utilisation.”

# Jalan Journey – Sustainability World

by Ng Kao Jing, Chong Yin Kai Harrison and Sricharan Bala

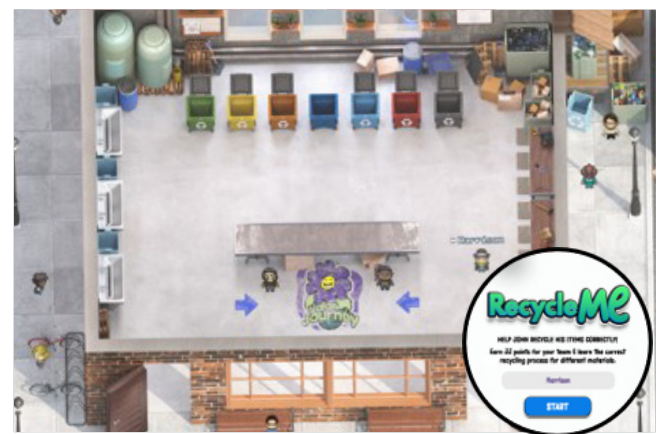

This youth team developed and launched Sustainability World, a virtual platform that uses storytelling to engage students on sustainability topics and their environmental impact. They engaged more than 300 secondary school students during their project and continue to offer interactive programmes. Sustainability World has since impacted more than 1,000 students, furthering Jalan Journey's commitment to environmental education among youth and showcasing the catalytic impact of the Fund.

## Harrison Chong

Co-Founder, Jalan Journey

“The SG Eco Fund has been instrumental in supporting the development of our Sustainability World game series, connecting us with subject matter experts and providing strategic guidance that helped us reach more schools.

Future grantees should seek advice from the SG Eco Fund team, leveraging the available resources and broader ecosystem of support. Meeting with other SG Eco Fund grantees also created valuable opportunities and fostered meaningful connections.”

## Student participant

“Jalan Journey introduced me to new sustainability concepts in a way I could remember and really understand. It was something I wouldn't have encountered otherwise.”

# Food Waste Upcycling and Community Education

by Holocene Pte Ltd

Holocene Pte Ltd implemented its in-house food waste solutions at Kim Tian West to collect food waste from residents while conducting educational workshops on recycling food waste into compost. Over a year, the initiative successfully engaged 100 residents and upcycled 140 kg of food waste into compost for use in community gardens.

**Ms Susan Teh**

CEO, Holocene Pte Ltd

“We are deeply grateful to the SG Eco Fund for enabling us to expand our outreach. Our workshops on community gardening sessions and composting have helped participants to cultivate their own greens and share the harvest with those in need, while contributing to Singapore’s sustainability goals.

Our programmes highlight how small, everyday actions can positively impact the environment and the community. With continued support from the SG Eco Fund, we remain committed to driving meaningful change across Singapore and fostering a more sustainable, circular economy.”

**Annabelle Ang**

Workshop participant and volunteer

“Holocene’s workshops completely transformed my perspective on food waste. What I once saw as mere trash, I now recognise as a valuable resource with incredible upcycling potential. Through this experience, I have learned how to convert food waste into compost, helping to cultivate local edible crops instead of simply discarding it. I really enjoyed the workshop sessions that Holocene conducted.”

# PERGAS Green Space

by Singapore Islamic Scholars and Religious Teachers Association (PERGAS)

With the support of the SG Eco Fund, PERGAS transformed an unused corridor into a space for the Malay-Muslim community to learn sustainable gardening practices. Over two years, PERGAS engaged over 260 people, yielding 60 kg of produce from their eco-friendly garden setup. Through hands-on education, participants learnt practical gardening skills while gaining awareness of environmental responsibility.

## Rooslina Binte Md Nor

Corporate Services Executive and  
Green Ambassador of PERGAS

“PERGAS Green Space thrives as a community-driven initiative supported by volunteers. A key milestone was our participation in the Singapore Garden Festival, where volunteers ensured plant care and visitor engagement. Beyond the festival, the garden fosters collaborations with people from all walks of life, promoting sustainable urban gardening.

Our SG Eco Fund project highlighted the importance of community-building, volunteer engagement, and integrating hobbies into sustainability efforts. Future grantees should prioritise long-term sustainability through training and collaboration opportunities.”

## Mdm Siti Nur Zahirah

Volunteer

“It's been a truly fruitful and eye-opening experience to learn about plants. From sowing the seeds, watering it, watching it grow and finally harvesting it. Taking care of plants is therapeutic and fulfilling.”

## Mdm Rossuita

Volunteer

“I enjoyed very much the great experience I gained, and I will continue to contribute as and when necessary to PERGAS Green Space.”

# Living Seawalls: Coastal Protection and Reef Ecosystem Creation for Environmental and Socio-Economic Benefits

by Witteveen+Bos South-East Asia Pte Ltd

This pilot reef restoration initiative by Witteveen+Bos South-East Asia explored using oyster reefs for local coastal protection and biodiversity enhancement. They collected 130 kg of oyster shell waste from hotels and restaurants, turning them into a living seawall. Using biodegradable mesh bags, the reef encouraged oysters, which have a natural ability to filter water and stabilise our shorelines, to grow by providing a substrate for larvae to latch on to.

Volunteers from diverse backgrounds, including students and parents from Rainbow Centre, helped in cleaning and packaging oyster shells. Citizen scientists conducted monthly reef monitoring. In total, more than 100 people were engaged and involved in this project.

## Erika Ng

Ecologist, Witteveen+Bos South-East Asia Pte Ltd

“The SG Eco Fund enabled us to test our artificial oyster reef project, demonstrating its success in enhancing marine biodiversity and naturally recruited baby oysters. The Fund's community engagement sessions connected us with diverse individuals from the hospitality sector, students and citizen scientists. Our findings have kickstarted collaborations with agencies, academia and industry partners for nature-based coastal protection solutions. In the face of climate change, we hope that artificial oyster reefs will be able to contribute to the enhancement of Singapore's coastal resilience.”

## Yonas Ngaturi

Citizen Scientist

“Being a part of the oyster reef project allowed me to learn new skills and contribute to marine and coastal environment conservation.”

## An

Citizen Scientist

“Volunteering for the man-made oyster reef in Singapore strengthened my connection to marine conservation and filled me with hope.”

# Singapore Eco Arts Festival

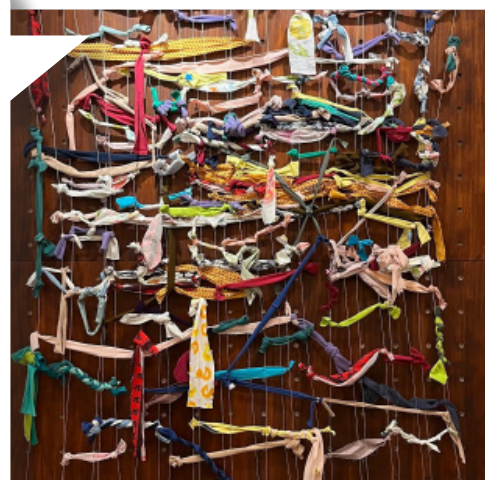

by Tay Wee Leng and Natalia Tan

**This team of individuals organised an Eco Arts Festival to engage the public about environmentally-friendly art from waste materials. They conducted workshops facilitated by experienced artists and showcased the artworks created, as well as sustainability-themed artworks by other creative practitioners, at library@orchard. Through this one-year project, they engaged over 1,800 people and connected them with the arts community and upcycled about 350 kg of waste materials such as textiles, plastics and glass.**

## Natalia Tan

“The Singapore Eco Arts Festival sought to bring people from all walks of life together with creative practitioners to inspire eco-conscious community action and impart upcycling skills through interactive experiences. The SG Eco Fund helped launch and expand the festival, making our workshops and art experiences accessible to the public.

We appreciated how the SG Eco Fund process helped us to refine and articulate the project mission and impact objectives, and connected us to key stakeholders in sustainability. We encourage future grantees to work closely with the SG Eco Fund team to identify opportunities to widen their reach, tailor their messaging for greater impact, and explore meaningful approaches to building a greener world together.”

## Linette

Workshop participant

“It was really interesting gaining a new awareness about how the everyday little objects have a much bigger impact on the world. Beyond learning about upcycling, I also really enjoyed the element of art therapy in the Art of Vinyl workshop. I took away a lot from it.”

# Aquaponics Farming on SGH Campus Rooftop

by National Cancer Centre of Singapore Pte Ltd

Led by the SingHealth Duke-NUS Institute of Biodiversity Medicine (BD-MED), this project saw the implementation of a community-based rooftop aquaponics farm and horticultural therapy and sustainability programmes at the Singapore General Hospital (SGH). The project engaged 380 people over 2 years and produced 200 kg of vegetables over 4 months of partial operation, with the potential to ramp up to over 2,000 kg monthly at full operational capacity, and provide fresh vegetables to the SGH Central Kitchen for in-patients' meals.

## Professor Teh Bin Tean

Director, SingHealth Duke-NUS  
Institute of Biodiversity Medicine

“Without SG Eco Fund's support, we could quite literally not have been able to get the project started at this large scale! They helped us to outreach to both SingHealth staff and the public on food resilience and food biodiversity within a healthcare setting. It has inspired a lot of people, especially staff, to be more engaged in their efforts and also start their own journey to grow their own food.

For those looking to conduct large scale infrastructural projects, early engagement with the various civil and regulatory agencies is essential to avoid delays.”

## Aquaponics workshop and tour participant

“Thank you for the tour - had a lovely time. Presenters were friendly, passionate, knowledgeable and insightful. 10/10 would recommend.”

## Aquaponics workshop and tour participant

“It was so lovely and I was so inspired by our facilitators' passion! I loved the tour - thank you to all of you who organised it!”

# Vintagewknd Trashion Week

by That WKND Company

With the support of the SG Eco Fund, That WKND Company organised street cleanups at various locations and featured the events on social media. They also encouraged participants to dress up in upcycled fashion items based on the theme of the session (e.g. beach-inspired outfits for beach cleanup). Over four weeks, more than 100 people were engaged to collect over 65 kg of trash from our streets. The videos highlighting upcycled fashion and the cleanups garnered over 1.2 million impressions on social media.

## Eden Tay

Co-Founder, That WKND Company

“SG Eco Fund’s support enabled Trashion Week to reach over 100 physical participants and achieve over 1 million impressions on social media, successfully amplifying our message of sustainability and public hygiene.

The SG Eco Fund team’s guidance was invaluable in assisting us through our application with a tight timeline. We also attended a workshop held by the team on how to effectively apply for funding. We’re happy to mention that after this project, we foresee more upcoming collaborations and bringing more partners onboard with the SG Eco Fund.”

## Participant who regularly attends cleanups

“Very interesting activity, different from regular beach cleanups and the fashion is very interesting. We enjoy seeing more varied people participating in green activities.”

# Banner Upcycling

by Lions Befrienders Service Association (Singapore)

This voluntary welfare organisation worked with more than 50 seniors to upcycle discarded banners into usable products such as carrier bags. The upcycled products were distributed to the community and banner donors and showcased at educational exhibitions at participating Active Ageing Centres, highlighting the seniors' efforts alongside educating the wider public. A total of 590 people were engaged through this project, with more than 130 used banners being upcycled.

## Muhammad Hazwan Bin Ismail

Lead Innovation Catalyst, Tech Care  
Lions Befrienders Singapore

“The act of sewing has always been of interest to our seniors. With the help of the SG Eco Fund, we were able to integrate the upcycling of waste materials and educate the seniors about environmental sustainability. A key takeaway from this experience is that we should never assume seniors are uninterested in learning about saving the environment. The reality is, they often lack a platform to engage with this topic. By integrating this learning into activities they already love, we can easily enhance their understanding and enthusiasm for environmental issues.”

## Ong Hoo June

Participant

“Knowing that I am doing something beneficial for our environment while doing something that I love on a daily basis, I feel happy and excited to share with more seniors and help them learn sewing.”

## Chan Chin Hua

Participant

“As a guy, I never needed to sew. Now that Lions Befrienders has organised this for us, I am happy to say that I now know how to make my own reusable tote bag and putting in an effort to save the Earth!”

# Financial Information

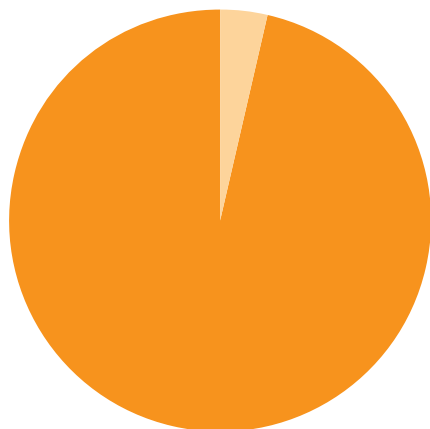

## Financial Information

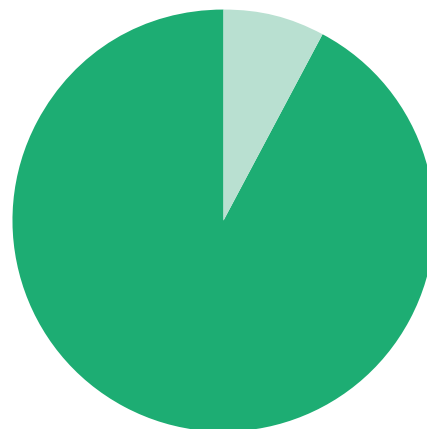

The SG Eco Fund supports community projects that improve the environment or advance environmental sustainability in Singapore. At the close of the financial year, we held total assets of \$45,675,556. This sum includes \$1,036,903 cash and cash equivalents, \$38,653 other current assets, and \$44,600,000 investment in Special Singapore Government Securities (SSGS).

**TOTAL EXPENDITURE IN FY2024:**  
**\$2,767,872**

**TOTAL INCOME IN FY2024:**  
**\$3,005,292**

Operating Expenses	\$100,100
Grant Disbursement	\$2,667,772

Investment and Other Income	\$237,420
Grant Income	\$2,767,872

The bulk of FY2024 expenditure was for grant disbursement, made to grant recipients who had met the deliverables of their projects.

# Conclusion

## Conclusion

**As we move forward, the SG Eco Fund stands ready to nurture ground-up initiatives that strengthen Singapore's environmental resilience. By supporting diverse voices and fresh approaches to sustainability challenges, we aim to catalyse meaningful change across our communities and build a greener, more sustainable home for all.**

# Annex: List of Projects Awarded in 2024

## Annex: List of Projects Awarded in 2024

Note: Some projects are no longer in progress. They may have been completed, withdrawn or terminated due to unforeseen circumstances.

S/N	Recipient/Organisation	Project Title and Summary
1.	Advance Recycling Enterprise Pte Ltd	<b>Advance Recycling Education Outreach Campaign</b> <ul style="list-style-type: none"> <li>Implement an interactive exhibition in the heartlands to educate the public on the importance of recycling and upcycling.</li> <li>Conduct sustainability activities to engage the public and collect e-waste for recycling.</li> </ul>
2.	Animal Welfare Academy	<b>Beach Clean Ups and Marine Biodiversity Educational Talks</b> <ul style="list-style-type: none"> <li>Conduct beach clean-ups and marine biodiversity educational talks with preschoolers.</li> <li>Set up collection points in preschools and engage children to collect plastic recyclables.</li> </ul>
3.	Apeiron Agrocommodities Pte Ltd	<b>Community UCO Machines</b> <ul style="list-style-type: none"> <li>Organise workshops and roadshows to address the lack of awareness and accessible infrastructure for responsible used cooking oil (UCO) disposal among households and small food businesses.</li> <li>Deploy a reverse UCO vending machine in the community to make the collection of used cooking oil more convenient.</li> </ul>
4.	Ariessa Koh Hwi-Eun	<b>Sustainable Living Workshops and Roadshows</b> <ul style="list-style-type: none"> <li>Engage communities through interactive talks to empower individuals to make conscious consumer choices and adopt sustainable lifestyles.</li> <li>Enable participants to create their own eco-friendly alternatives to conventional products like soap and recycled paper and plastics through workshops.</li> </ul>
5.	Bishan East-Sin Ming (BESM) Citizens' Consultative Committee	<b>Repair Kampung Singapore (RKgS)</b> <ul style="list-style-type: none"> <li>Empower the community to repair household items and provide a resource-sharing platform.</li> <li>Conduct training sessions for resident volunteers and provide basic home repair services and tools.</li> </ul>
6.	Boon Lay Zone D Residents' Network	<b>Kindness Farm</b> <ul style="list-style-type: none"> <li>Raise awareness of food resilience and food waste through building an edible garden with sustainable farming systems.</li> <li>Involve elderly residents and vulnerable families in growing edibles.</li> </ul>

S/N	Recipient/Organisation	Project Title and Summary
7.	Bukit Panjang Government High School	<b>BPGHS Eco Stewardship Programme</b> <ul style="list-style-type: none"> <li>• Introduce a food sustainability programme for students through farming and composting.</li> <li>• Work with community partners to raise awareness in the wider community on the importance of food sustainability.</li> </ul>
8.	Bukit Panjang Government High School	<b>Eco-Stewardship @ BPGHS</b> <ul style="list-style-type: none"> <li>• Educate and involve students in water conservation activities.</li> <li>• Students will be tasked to plan and conduct age-appropriate water conservation activities for partner preschools.</li> </ul>
9.	Bukit Purmei Zone A Residents' Network	<b>Smart Farm Initiative (August 2024 – August 2025)</b> <ul style="list-style-type: none"> <li>• Set up an indoor hydroponics system to grow vegetables in a community space at a residential block's void deck.</li> <li>• Conduct workshops and visits to a local farm to educate residents about growing vegetables.</li> </ul>
10.	Bukit View Secondary School	<b>Cultivating Sustainability Awareness and Adoption Amongst our School Community</b> <ul style="list-style-type: none"> <li>• Conduct a sustainability campaign focusing on food composting, reducing food and general waste.</li> <li>• Students will volunteer in environment-related activities.</li> </ul>
11.	Chong Pang Zone 3 Residents' Committee	<b>Chong Pang Zone 3 RC Book Exchange Corner</b> <ul style="list-style-type: none"> <li>• Collect used books from residents and set up a self-run book exchange library corner at an HDB void deck.</li> </ul>
