1) Download and install PocketBook reader from App Store

a. Open App store and search for “PocketBook reader”.

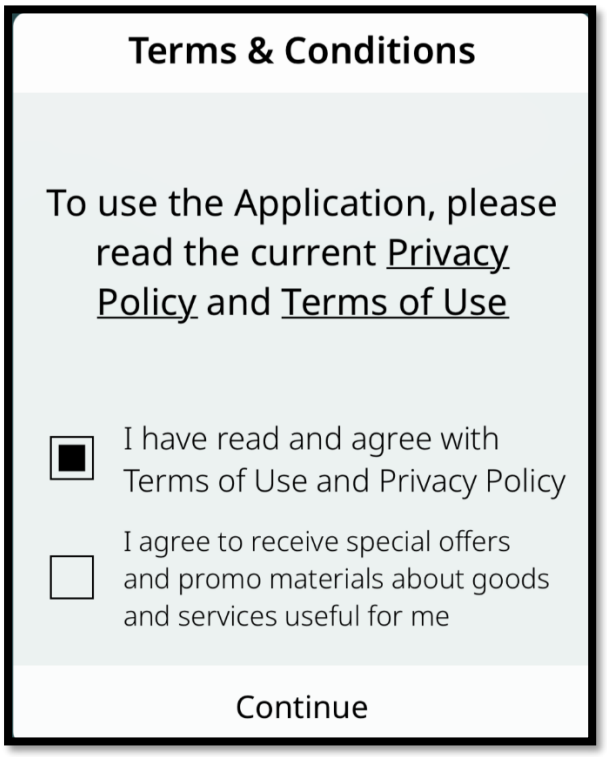

b. **Download and install**

c. Open once installation is completed

2) Initiate PocketBook reader

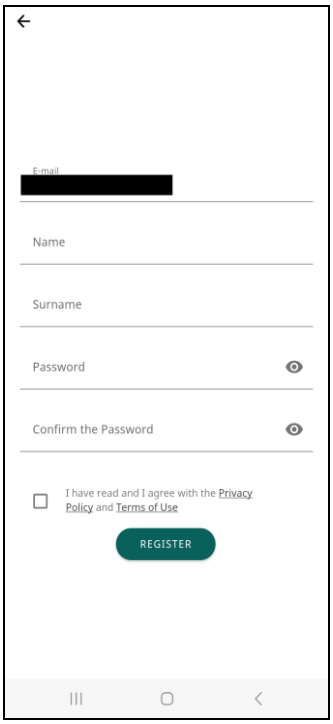

a. Tick and accept the policy and terms of use

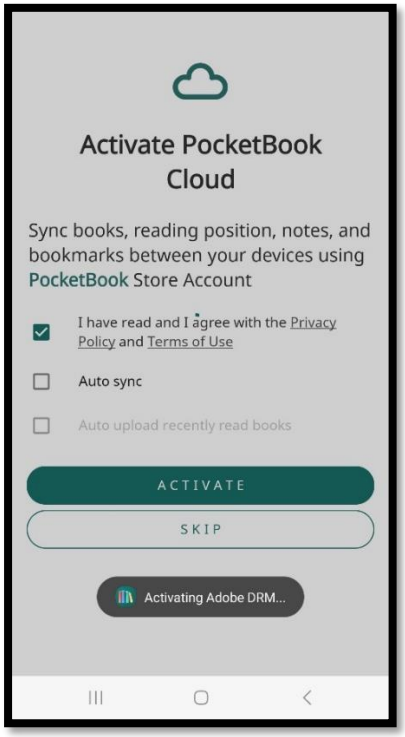

3) Create PocketBook Account

a. Fill up the email address you would like to use to create “PocketBook” account. Fill in the details and preferred password.

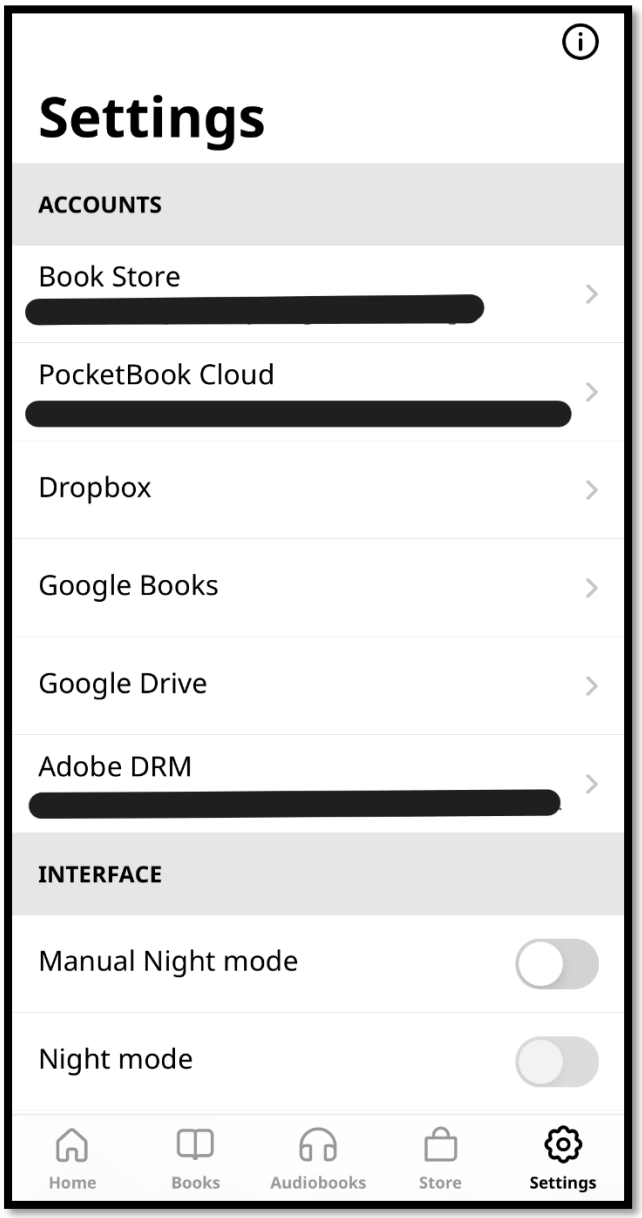

b. Tick and accept the policy and terms of use. If you would like to synchronise your ebooks automatically through different devices, please tick “Auto sync” or see step 10 to activate later.

4) Add Adobe account to PocketBook

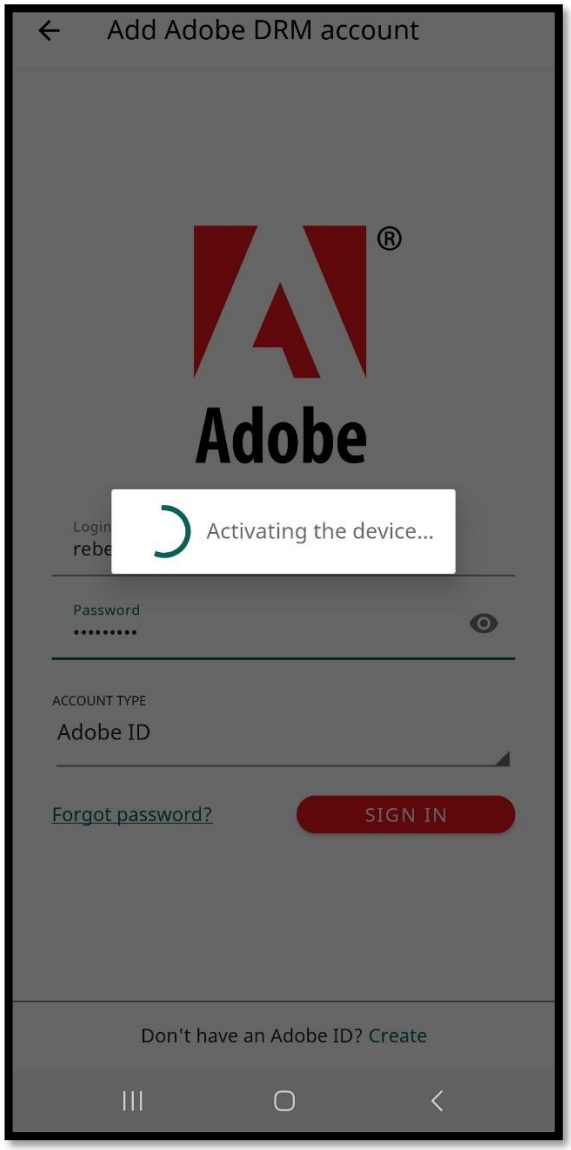

a. Select “settings” >> “Adobe DRM”

b. Click on “+” sign at the top right and add your Adobe account

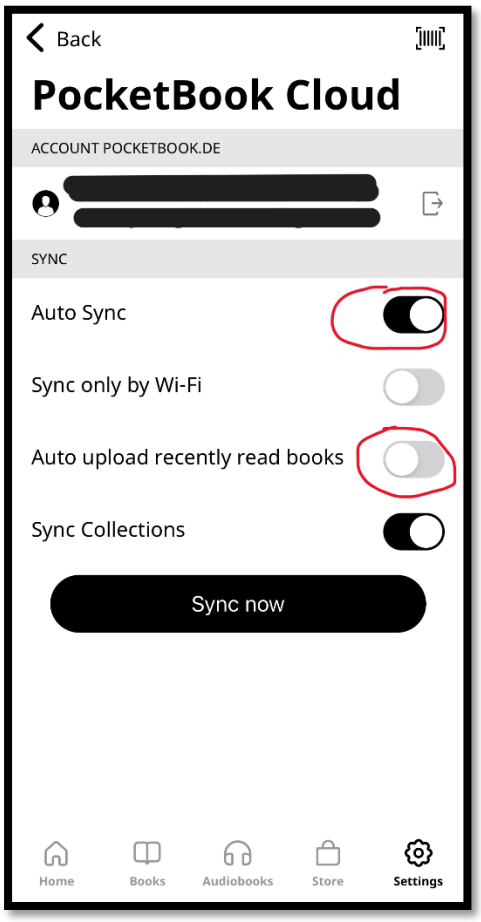

5) Synchronise PocketBook from device to device

a. **If you would like to synchronise all your ebooks automatically from PocketBook of one device to the PocketBook of this device, you may go to "settings" >> "Pocketbook Cloud" >> tick "Auto sync".**

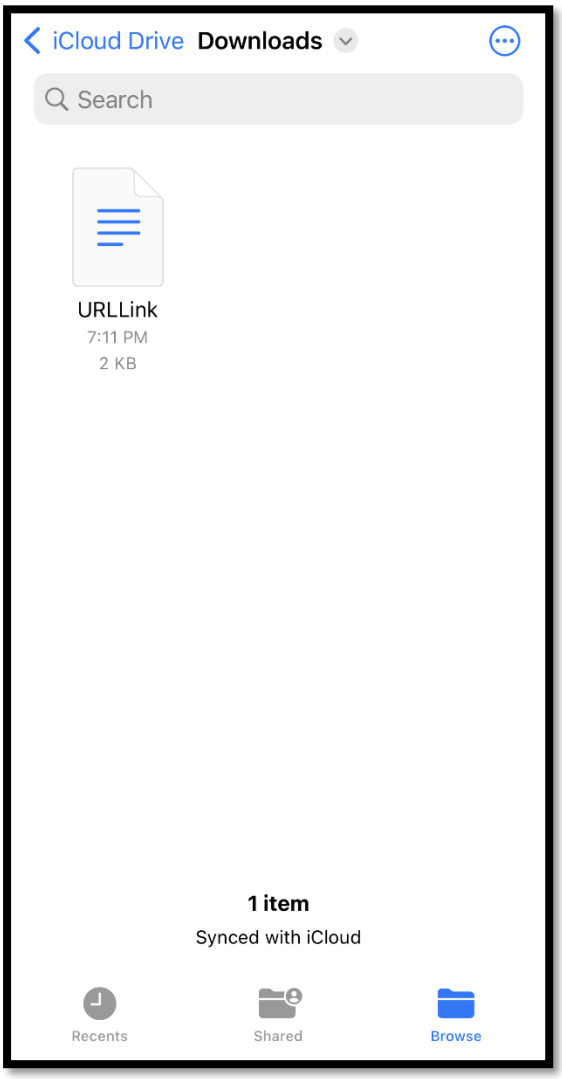

Please make sure your other devices with PocketBook setting is set to "Auto upload recently read books".

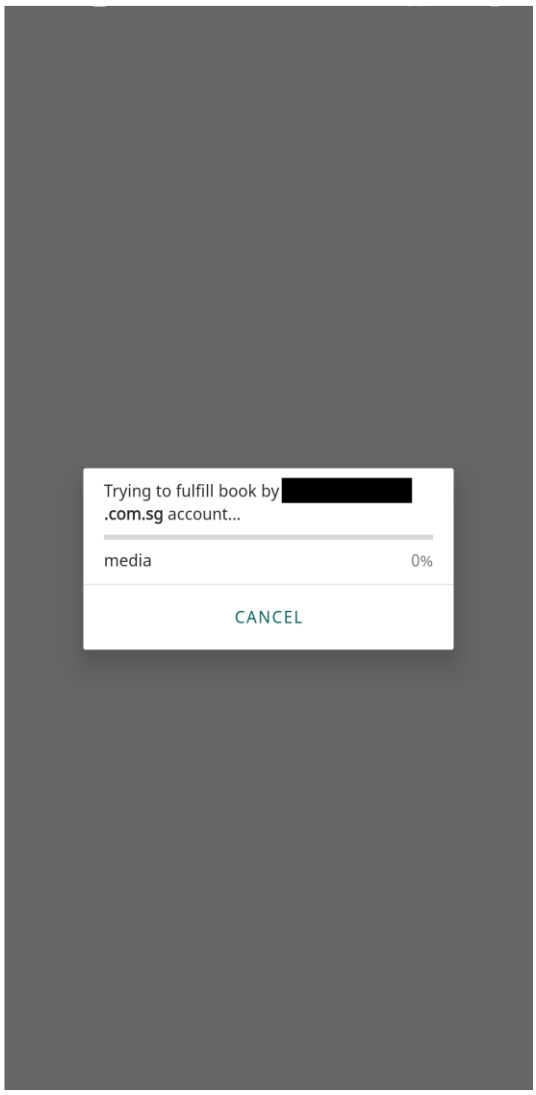

6) Synchronise ebooks from Adobe Digital Editions in PC to PocketBook in mobile.

a. To synchronise the ebooks from your PC to your mobile, move the .acsm file from your PC to your mobile.

b. Open the .acsm file in PocketBook app.

c. **Once it is completed, you will be able to read the ebook. At the home page, you will be able to see your bookshelf with the downloaded ebook.**
