

# Shaping the Future of Transport

Strengthening Singapore's long-term economic competitiveness through a world-class and future-ready transport system

## Building Today for Our Next Generation

- \$800M RIE Flagship: Double our investment in research and innovation for transport and connectivity under RIE2030
- Building key capabilities in Autonomy and Digital Twins for Connectivity to transform our ecosystem
- Deepening capabilities in our aviation, maritime and land sectors
- Enhancing our strong infrastructure, integrated transport and connectivity ecosystems, and international partnerships

## Enabling Workers to Take On New Opportunities

- Creating good jobs in the transport sector for our people
- New and higher-value roles from automation & technology
- Enable job transition and upskilling for transport workers amidst workforce transformation
