Yummy Buddies comic

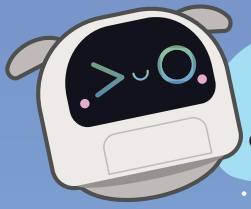

Cyber Wellness

Protecting Personal Information

It is easy to share information online without realising how much it can reveal about us.

Through these comics, discover what personal information is, why it is important to protect it, and how to make safer choices online.

Poodle the A.I dogbot

Ms G the teacher

Meet the Yummy Buddies!

Merry the watermelon

Bouncy the fishball

Flip the roti prata

Wata the water bottle

Coco the choco stick

Pok Pok the curry puff

Inside this booklet:

- Protecting your personal information
- Choosing safe usernames
- Creating strong passwords and keeping them safe

Use See-Think-Wonder to encourage your child to think about these situations

See

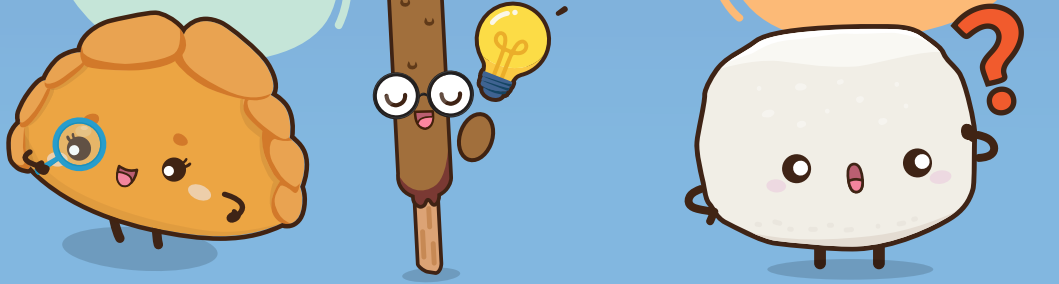

What happened in the comics?

Think

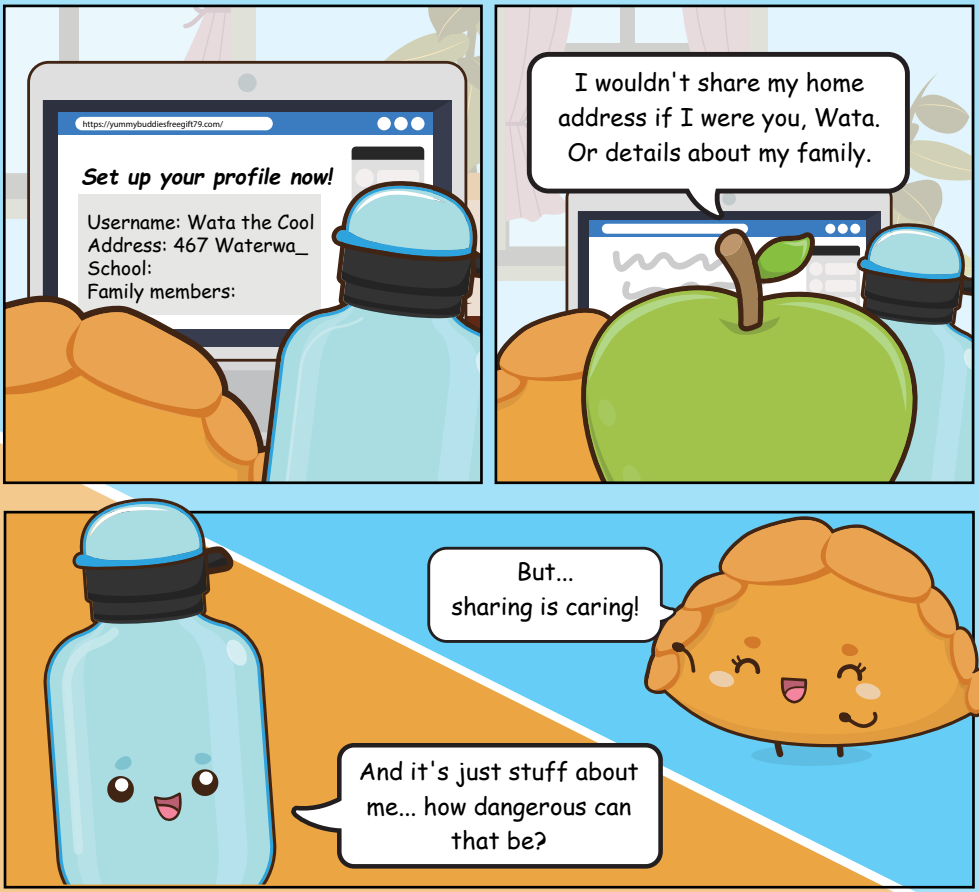

What could happen if I share my personal information with strangers?

Wonder

What other information should we not share online?

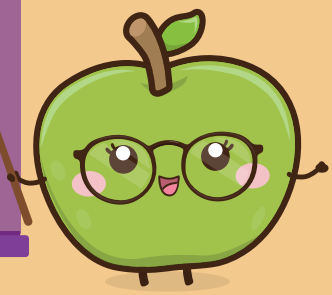

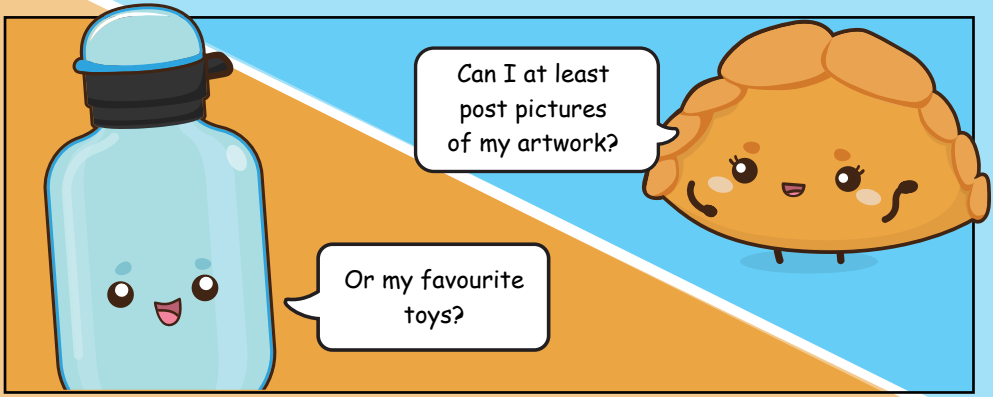

What can we share safely?

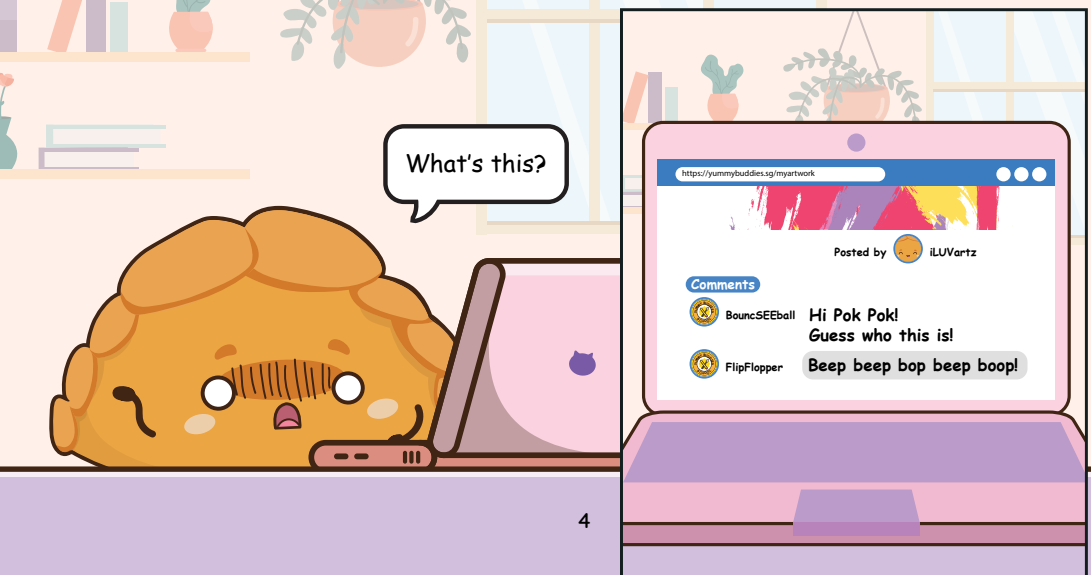

Cybercriminals can use personal information like your address or full name to find out where you live or who you are - and use that to trick or harm you or your family.

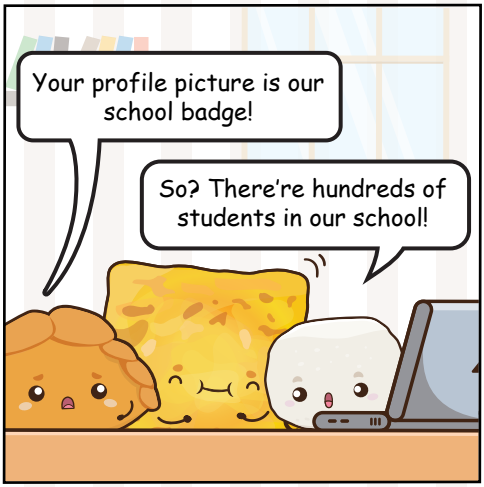

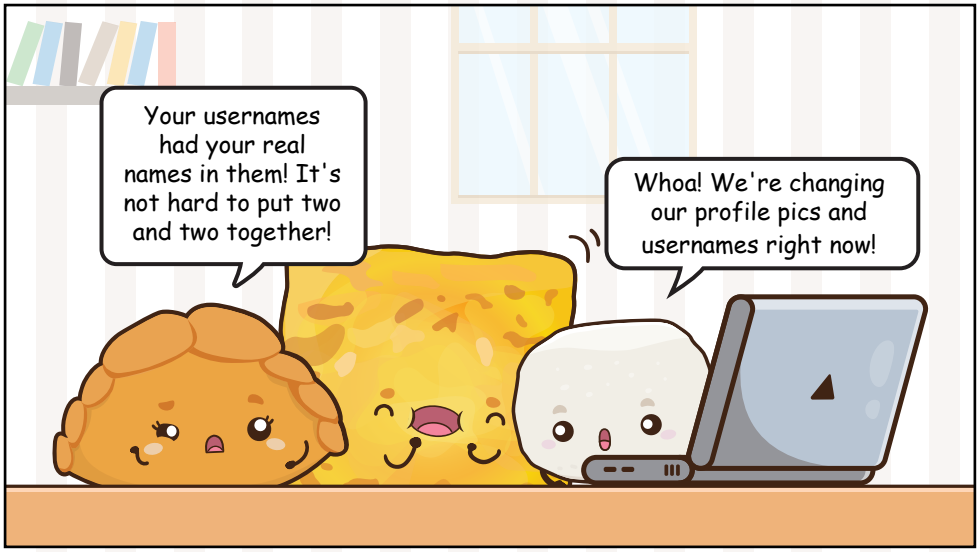

What's in a username?

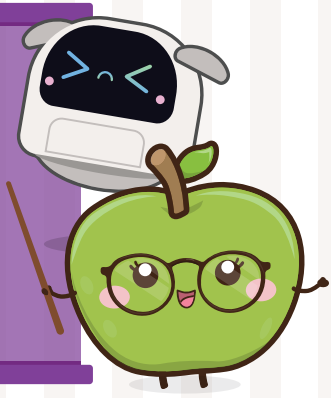

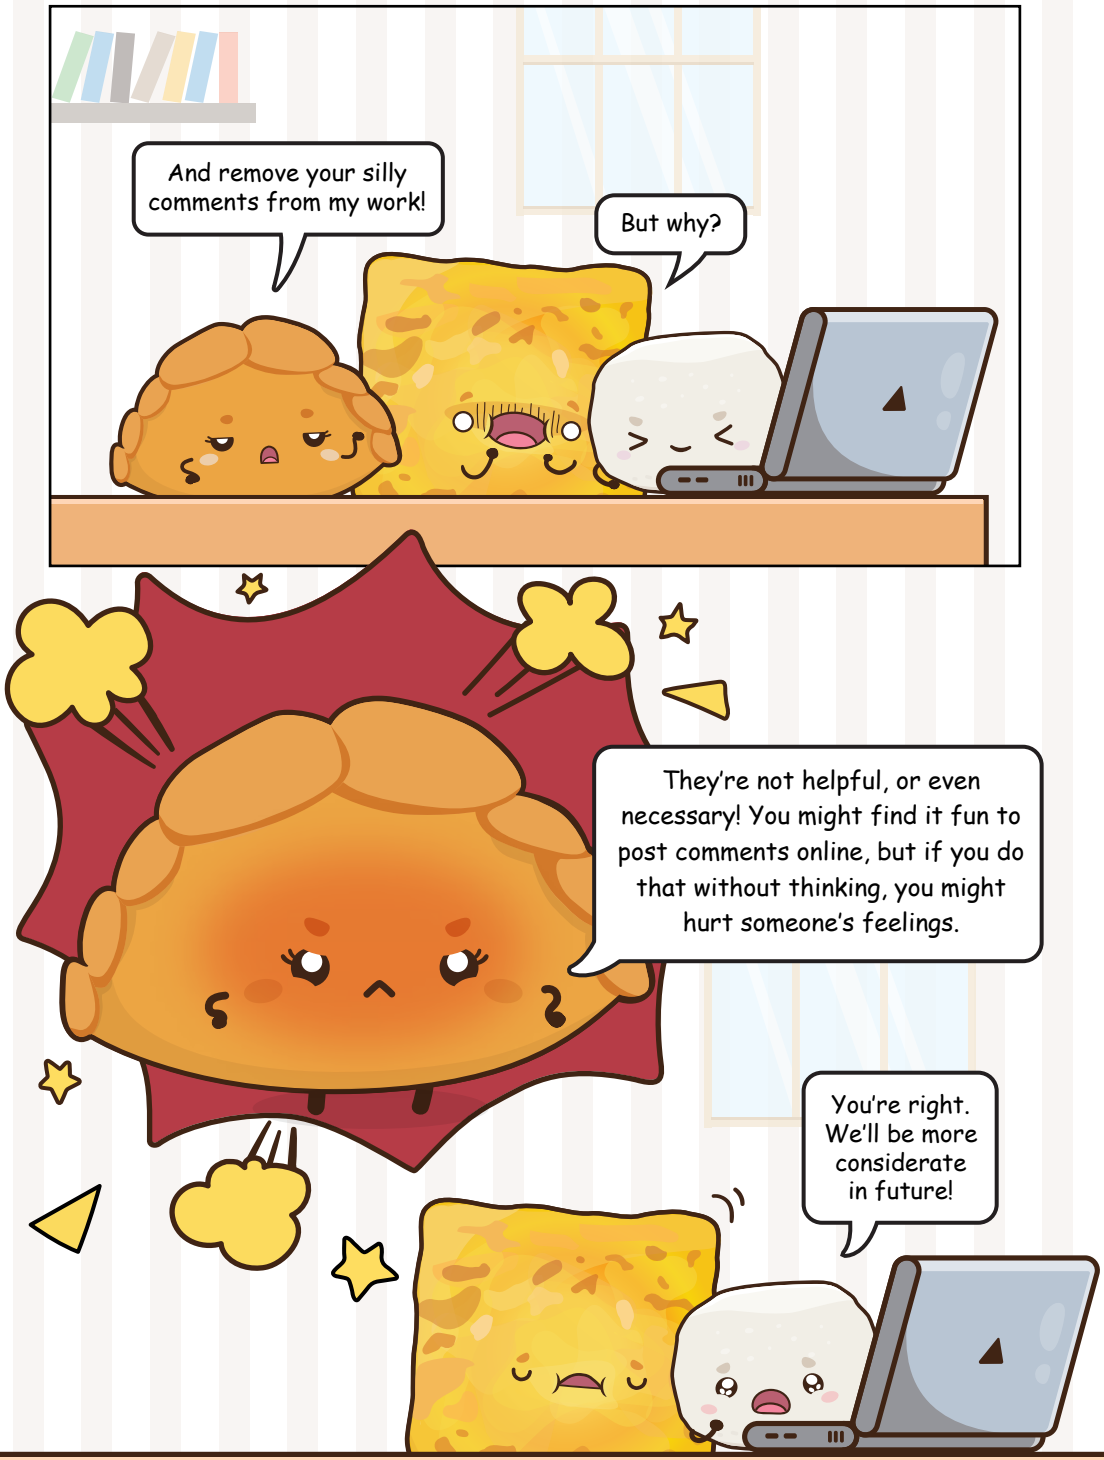

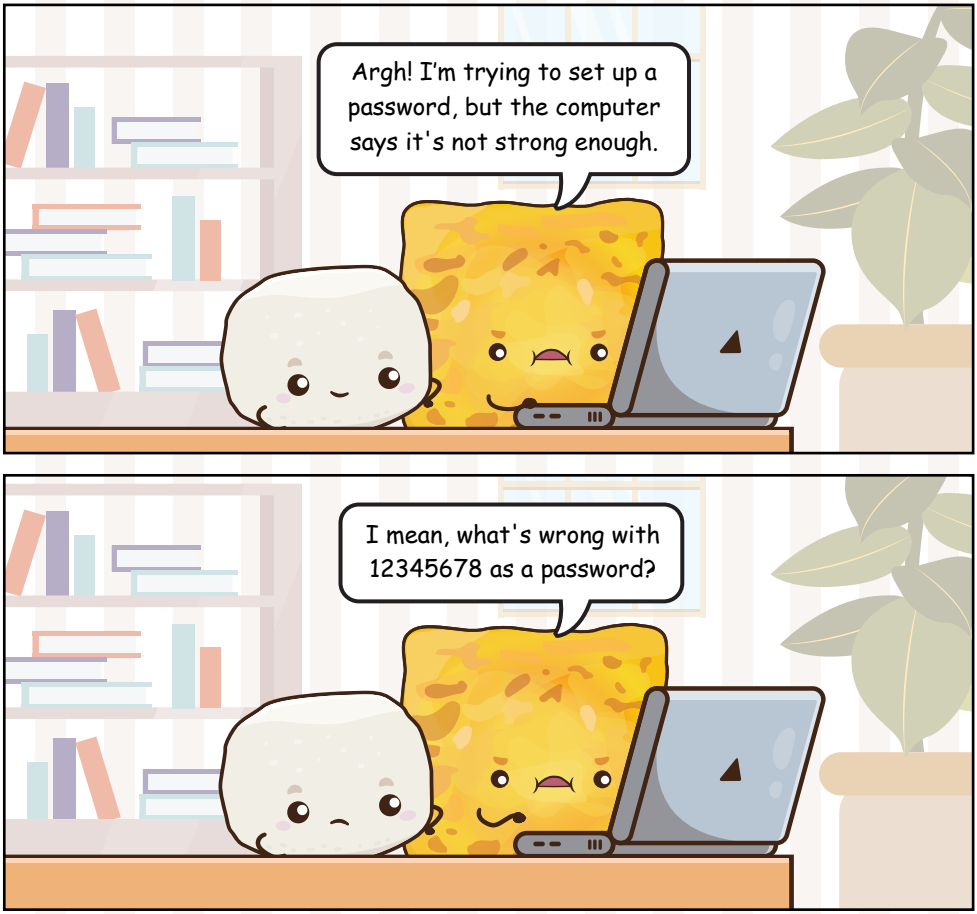

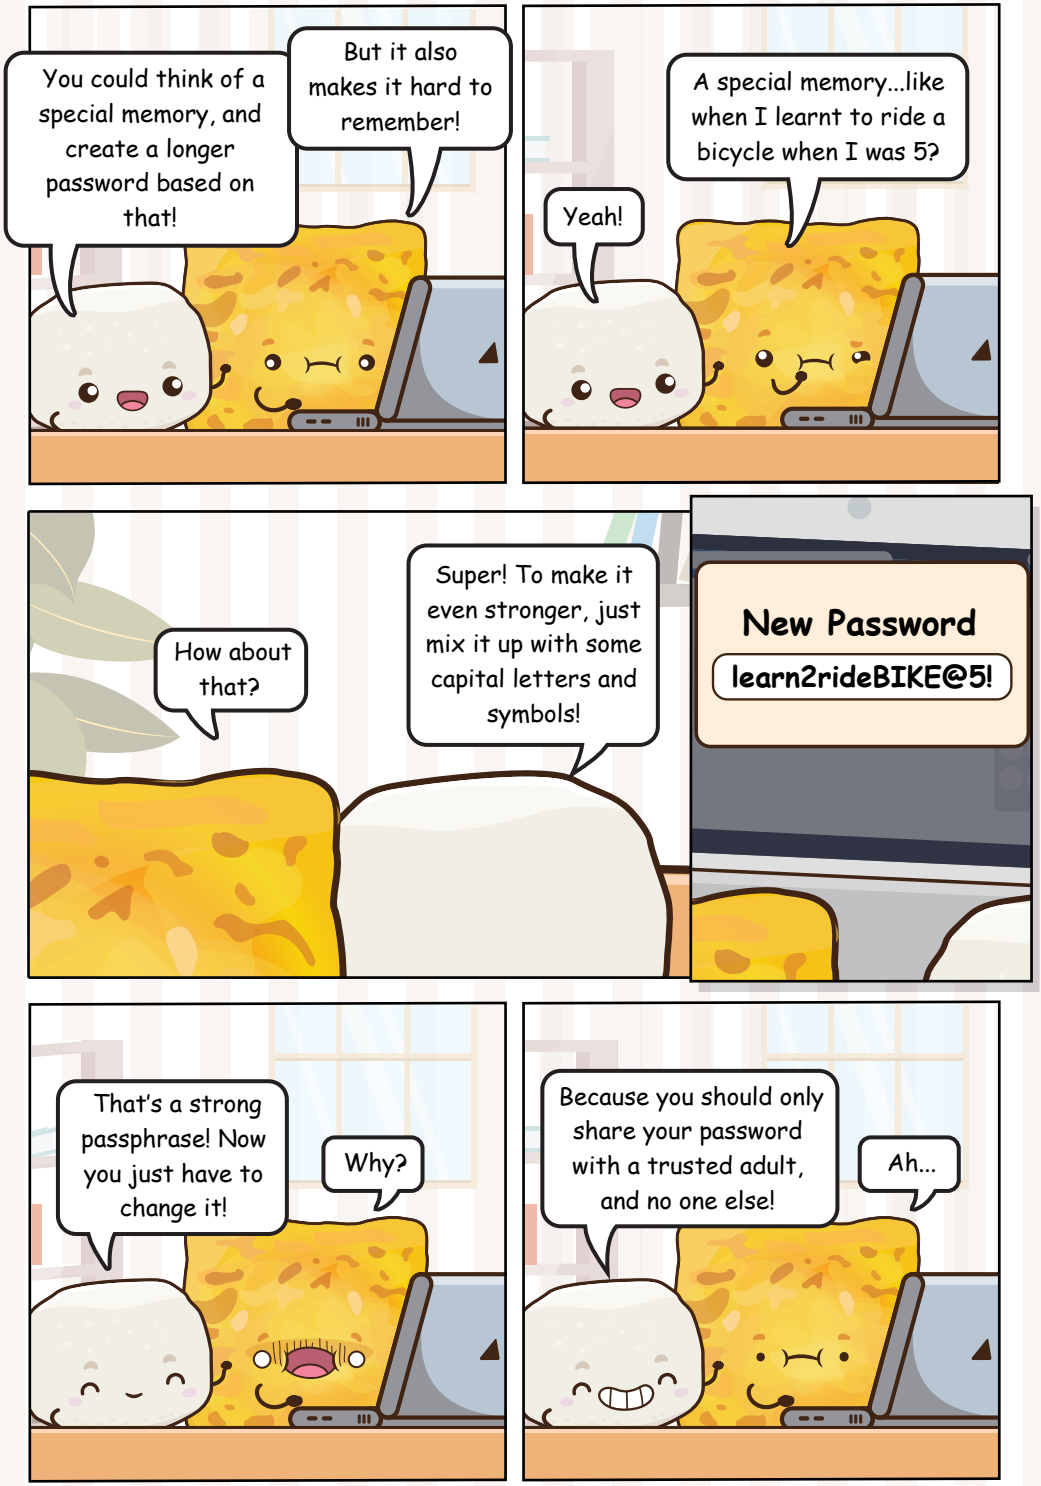

Make sure your online profile does not reveal sensitive personal information. For example, avoid user IDs that include your real name, or profile pictures that show where you live or study - you might be sharing more than you realise! Keeping this information private makes it harder for strangers or cybercriminals to find out who you are or where to find you in real life.

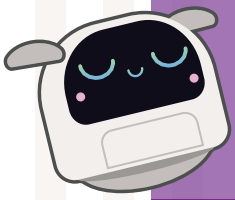

And remove your silly comments from my work!
But why?
They're not helpful, or even necessary! You might find it fun to post comments online, but if you do that without thinking, you might hurt someone's feelings.
You're right. We'll be more considerate in future!

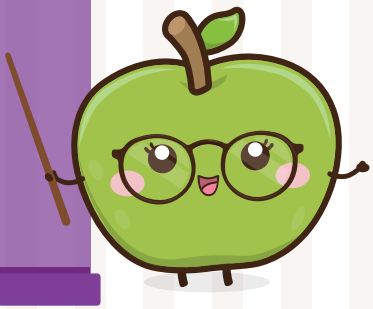

How strong is your password?

You could think of a special memory, and create a longer password based on that!
But it also makes it hard to remember!
A special memory...like when I learnt to ride a bicycle when I was 5?
Yeah!
How about that?
Super! To make it even stronger, just mix it up with some capital letters and symbols!
New Password
learn2rideBIKE@5!
That's a strong passphrase! Now you just have to change it!
Why?
Because you should only share your password with a trusted adult, and no one else!
Ah...

Strong passwords prevent others from getting into your accounts without you knowing. Create a strong password with upper case letters, lower case letters, numbers or symbols. And don't share it with anyone, except a trusted adult!

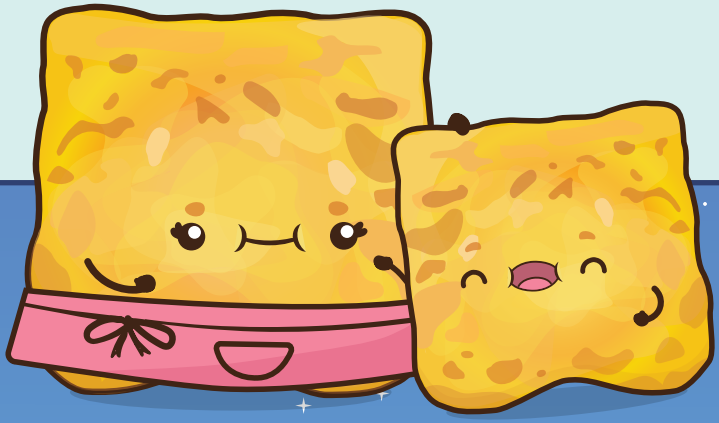

Have a chat with your child

After reading the comics, ask your child:

- What personal information should you never share with strangers online, and why?
- What should you do if you think someone else knows your password?
- Who can you talk to if you are unsure whether something is safe to share?
