

PACK WHAT YOU NEED.

CHOOSE AN IP RIDER THAT
FITS YOUR NEEDS.

Many Singaporeans are paying premiums for riders without considering what they really need, with costs often tripling once they turn 50.

Riders can be more expensive than Integrated Shield Plans (IPs). Is the extra coverage worth the extra premiums?

For most large private hospitalisation bills, the bulk of the bill is paid by the IP rather than the rider.

Moreover, about half of all patients with IPs and riders opt for subsidised care, which MediShield Life and MediSave sufficiently cover.

Do you need your IP rider? If yes, which IP rider better suits your needs?
