

Your Guide to Mental Health Services in Singapore

MINISTRY OF HEALTH
SINGAPORE

An initiative under the
National Mental Health and Well-being Strategy

Support That Meets Your Needs

No concern is too small, and your feelings always matter — especially when it comes to your mental health.

Learn tips for mental well-being

You can explore self-help tools, join workshops, or take part in community events.

Feeling stressed and need someone to talk to?

Reach out to the First Stop for Mental Health. Trained care professionals are ready to listen and support you.

Feeling overwhelmed several days a week?

You can get help from community mental health teams, General Practitioners (GPs) or polyclinics. They offer various services to help improve your condition.

Is your emotional health affecting your daily life?

You may need more specialised services from care professionals in hospitals to help you feel better and regain control.

“

Back in 2017, I had a panic attack during dinner with my children. The next day at work, I spent the whole time trying not to break down in tears. Things continued to go downhill from there.

Eventually, I felt like I was a burden to everyone around me. But somehow, I found the strength to call a helpline. The care professional listened to me and gently guided me to approach services that saved my life.

To anyone who is struggling, please know that there's no shame in seeking help. ”
