

KNOW YOUR MEDS

KNOW About Importance of Medication Review

Meet Auntie Tan! She is back for a follow-up appointment with her pharmacist ...

Speak to your pharmacist about a medication review to ensure your medication are still right for you.

Your pharmacist can help to

Simplify your medication routine

Address your concerns about medication side-effects

You may benefit from a medication review if you

Take several medication and are unsure whether you still need all of them

Feel unwell or experience anything unusual with your medication

Often forget or have difficulties taking your medication as instructed

Do not stop or change your medication without checking with your doctor or pharmacist!
