

## Doctors fee benchmarks for surgeries

The recommended benchmarks for surgeon fee and anaesthetist fee for surgeries are based on the procedures in the Table of Surgical Procedures (TOSP) and should be read in conjunction with the following points:

1. **Reference but not fee cap** - The benchmarks serve as a reference of reasonable fee ranges in the private sector, and are not a cap. Charges that are higher than the benchmarks may not be unreasonable, particularly where a case is unusual in its context or complexity and require significantly more time or effort. Doctors can charge outside of the fee benchmarks, with valid justification. However, they should inform the patient and the insurer (where applicable) before the procedure is carried out, except when circumstances do not permit him / her to do so.
  
2. **Typical cases** - The benchmarks are meant to cover routine and typical cases. Each benchmark is a range of fees, to cater for some variation in patients' conditions, but they exclude patients whose conditions are of exceptional complexity or who may be very ill.
  
3. **Emergency and after-office hours services** - Doctors are advised to explain to patients in advance, where possible, if their fees for cases requiring emergency and after-office hours would exceed the benchmarks.
  - a. **Where a procedure is typically performed as an emergency** (e.g. appendicectomy), the fee range would apply for most office hours and after-office hours cases performed before midnight.
  
  - b. **Where a procedure is commonly performed under elective circumstances (i.e. not an emergency)** (e.g. cholecystectomy), urgent cases performed after office hours may be above the fee benchmark range. Doctors may reasonably factor in the time of the procedure in such cases.
  
4. **When more than one surgical procedure is carried out** - The recommended benchmarks are for cases in which only a single procedure is performed on the patient on any one occasion. However, in some cases, it could be in patients' interest to perform more than one procedure in the same sitting. In general, if the combination of procedures results in savings in time and effort, e.g. surgery performed through the same incision, the fees should not be the sum of individual fees should the procedures be carried out on separate occasions. Nonetheless, where doctors assess that a "1+1" computation is fair, e.g. if performing the combination of procedures together in a sitting involves higher complexity, effort, risk and time than if done separately, they can do so with proper justification. Doctors are reminded to use only one TOSP code where a single procedure sufficiently caters or describes what was being carried out.

5. **Goods and Services Tax (GST)** - The benchmarks exclude GST.

#### Surgeon fee benchmarks

6. **Surgeon fee benchmarks cover the total professional fees of the surgeon for the operation.** This includes fees associated with the assistant doctors and nurses brought in by the primary surgeon for the operation, as well as professional charges for sedation performed by the surgeon. During financial counselling, doctors are advised to inform patients of the total professional fees and how they compare with MOH's fee benchmarks.

7. **How to use the fee range** – The lower end of the fees is generally associated with less complex cases, whereas the higher end of fees is associated with more complex ones.

#### Anaesthetist fee benchmarks

8. **Only for anaesthetist providing anaesthesia support** – The use of the anaesthetist fee benchmarks is intended only for anaesthetists providing anaesthesia support for procedures. Specifically, they are not intended for other specialties providing procedural sedation; and/or in procedures where no anaesthetist is in attendance (except for normal vaginal deliveries, where the anaesthetist may leave after providing epidural).

9. **Mode of anaesthesia** – The fee benchmarks are **not** intended to influence clinical practice as to the choice of a particular mode of anaesthesia (general anaesthesia / regional anaesthesia / monitored anaesthesia care).

10. **What the fee range covers** – The fee range covers the single continuous episode of anaesthetic care in support of the surgical procedure, including :

- a. Pre-operative anaesthesia consultation immediately before the surgical procedure;
- b. Intra-operative anaesthetic management (i.e. at the time of operation); and
- c. Immediate post-operative care and monitoring of the patient in the recovery unit.

#### **The fee benchmarks exclude :**

d. Pre-operative consultations on the same or different day for the purpose of complete evaluation of patients who might be at increased risk of anaesthesia due to the presence of medical comorbidities or other reasons where a separate anaesthesia consultation is necessary; and

e. Post-operative consultation after discharge from recovery unit.

11. **How to use the fee range** – The anaesthetist fee benchmarks take into account the risks, expertise and time associated with anaesthetic care for an expected range of patients for a procedure; where the:

a. **Lower bound:** Represents cases for a healthy patient; or where no anaesthetic problems are identified; or is ASA<sup>[1]</sup> 1 or equivalent. For certain procedures (e.g. Arteriovenous fistula creation, Coronary Artery Bypass Graft), where the baseline patient is not healthy (e.g. patient with progressive renal failure and ischaemic heart disease respectively), the lower bound would apply for patients with the baseline condition which required the procedure, and without other anaesthetic problems identified.

b. **Midpoint:** Represents cases whereby the patient has mild and controlled disease; or has presence of anaesthetic issues, e.g. anaesthetic problems such as severe post-operative nausea vomiting, physical abnormalities, difficult intravenous access, latex allergies; or is ASA 2 or equivalent.

c. **Upper bound:** Represents more complex cases where the patient has poorly controlled, severe or multiple medical conditions that significantly increase the risk and/or effort of anaesthetic care; or has serious anaesthetic issues, e.g. airway problems, anaphylaxis; or is ASA 2 with presence of other anaesthetic issues or multiple medical conditions; or is ASA 3 or equivalent.

If a case departs from the routine, e.g. the patient is an ASA 1, but due to unforeseen circumstances, the duration of the surgery is significantly longer than usual, **the anaesthetist has the discretion to vary the fees to reflect the added risk, effort and time required.**

*[1] Refers to the American Society of Anesthesiologists (ASA) classification that assesses and communicates a patient's pre-anaesthesia medical co-morbidities.*

Prostate		Integumentary	SA702R	Radiotherapy, Interstitial Brachytherapy (Without Open Surgery): Prostate	5A	6,800	11,700	Not available	Not available	
Skin / Soft tissue		Integumentary	SA702S	Skin And Subcutaneous Tissue, Tumor/Cyst/Ulcer/Scar, Excision Biopsy, Lesion Size More Than 15mm In Diameter	1B	1,000	2,100	550	900	Note: Higher end of surgeon fees may be associated with a location of higher morbidity such as the face or a joint flexure.
Cervix		Integumentary	SA703R	Radiotherapy, Intracavitary Brachytherapy (Multi-Channel): Cervix, Others	2C	1,800	3,600	Not available	Not available	
Breast		Integumentary	SA704B	Breast, Lumps, Imaging Guided Vacuum Assisted Biopsy, Single Lesion	2B	1,700	3,000	600	750	Note: Higher end of surgeon fees may be associated with more inaccessible locations.
Uterus		Integumentary	SA704R	Radiotherapy, Intracavitary Brachytherapy (Single Channel): Endometrium, Others	2A	1,100	2,500	Not available	Not available	
Skin / Soft tissue		Integumentary	SA704S	Skin Cancer, Mohs Micrographic Surgery Without Reconstruction	2B	900	1,800	Not available	Not available	
Breast		Integumentary	SA705B	Breast, Lump (Removal) With Parenchymal Flap Closure (Unilateral)	4A	4,800	9,000	1,200	1,700	Note: Higher end of surgeon fees may be associated with recurrent surgery, locations that are harder to access and larger, odd-shaped defects that require greater expertise for flap closure.
Breast	Intestine	Integumentary	SA705R	Radiotherapy, Intra-Operative Radiotherapy (Electrons Or Kilovoltage): Breast, Sarcoma, Upper GI, Lower GI, Other Sites	3A	2,500	4,100	Not available	Not available	
Skin / Soft tissue		Integumentary	SA705S	Skin, Defect, Distant Skin Flaps	4B	6,700	9,000	Not available	Not available	
Breast		Integumentary	SA706B	Breast, Lumps, Imaging Guided Vacuum Assisted Biopsy, > 1 Lesions	2C	2,300	4,700	650	800	Note: Surgeon fees are typically higher when more biopsies are performed. Higher end of surgeon fees may be associated with 4 or more lesions, whereas the lower end of fee range may be associated with 2 lesions or less.
Skin / Soft tissue		Integumentary	SA706S	Skin, Defect, Neurovascular Island Flap	5A	6,700	9,400	Not available	Not available	
Breast	Lymphatic system	Integumentary	SA707B	Breast, Tumor (Malignant), Wide Excision/ Lumpectomy/Segmental Mastectomy/ Partial Mastectomy, With Sentinel Node Biopsy/ Axillary Node Sampling	4A	6,000	10,300	1,300	1,900	Note: Higher end of surgeon fees may be associated with lesions in locations that are harder to access, and defects that require mobilization of breast tissue for a more cosmetically acceptable appearance. Higher surgeon fees can also be associated with more sentinel nodes or challenging locations.
Skin / Soft tissue	Nerve	Integumentary	SA707S	Skin, Neuromas/Hemangiomas, Excision/Vaporisation By Laser And Other Ablative Modalities, Therapeutic	1C	900	1,500	550	900	Note: Higher end of fees may be associated with procedures involving a larger number or area of lesions.
Skin / Soft tissue		Integumentary	SA708S	Skin, Surgical Treatment For Vitiligo (Involving Non-Cultured Cellular Grafting) (<20 sq cm)	3C	3,400	5,200	Not available	Not available	
Breast		Integumentary	SA709B	Breast, Various Lesions, Trucut Biopsy, Ultrasound Guided Or Stereotactic (Multiple)	1C	1,000	2,500	750	1,000	Note: Higher end of surgeon fees may be associated with lesions that are more complex to biopsy (e.g. small size in inaccessible location)
Skin / Soft tissue		Integumentary	SA709S	Skin, Surgical Treatment For Vitiligo (Involving Non-Cultured Cellular Grafting) (>40 sq cm)	4B	4,800	7,200	Not available	Not available	
Breast		Integumentary	SA710B	Breast, Various Lesions, Trucut Biopsy, Ultrasound Guided Or Stereotactic (Single)	1B	850	1,300	600	750	Note: Higher end of surgeon fees may be associated with lesions that are more complex to biopsy (e.g. small size in inaccessible location).

## Fee benchmarks for Doctors' Inpatient Attendance Fees

The recommended fee benchmarks for inpatient attendance fees should be read in conjunction with the following points:

1. **What is an inpatient attendance** – Inpatient attendances cover professional consultations or reviews for a patient who is already hospitalised, during which the doctor evaluates the patient's health-related issues, formulates a management plan in relation to one or more health-related issues for the patient, provides advice to the patient, including appropriate preventive health care, and records the clinical detail of the service provided to the patient.
2. **Reference but not fee cap** – The benchmarks serve as a reference of reasonable fee ranges in the private sector and are not a cap. Charges that are higher than the benchmarks may not be unreasonable, particularly where a case is unusual in its context or complexity and requires significantly more time or effort. Doctors can charge outside of the fee benchmarks, with valid justification. However, they should inform the patient and the insurer (where applicable) before or during the admission, except when circumstances do not permit him / her to do so.
3. **Typical cases** – The benchmarks are meant to cover routine cases (that are typical for the specialty). Each benchmark is a range of fees, to cater for some variation in patients' conditions, but they exclude patients whose conditions are of high complexity or very ill.
4. **What the fee range covers** –
  - a. The fee covers the professional consultation only and does not include costs of medications, injections, operations,
  - b. Fee ranges are applicable for all specialists, regardless of specialty.

*For ICU fee range*

  - c. The ICU fee benchmarks is applicable only for ICU cases requiring lower intensity of management and monitoring. This may include patients who require post-surgical monitoring and observation, or with single organ failure and/ or impending or established respiratory failure requiring the use of ventilatory support (invasive/non-invasive) for acute respiratory conditions.

d. The ICU fee range is NOT applicable to medium to high intensity ICU cases. This may include patients with 2 or more acute organ failures, and/ or additional management involving the use of extracorporeal membrane oxygenation, and renal replacement therapy, etc.

e. The lower end of the ICU fee benchmark would be more relevant if a doctor's effort for the professional attendance is similar to a routine consultation in the general ward.

5. **How to use the fee range** –

a. The lower end of the fee benchmark is generally for straightforward professional consultations or reviews which involve short visits, a short patient history and if required, limited examination and management, for example, a routine post-operation review.

b. The higher end of the fee benchmark is generally for the first consultation and/or cases requiring more complex or extended consultations where more time and expertise are needed for extensive history-taking, clinical examination, arranging any necessary investigation, diagnosis, implementing a treatment or management plan, and advice or discussion with the patient and family.

6. **Goods and Services Tax (GST)** – The benchmarks exclude GST.

**Doctors' inpatient attendance fee benchmarks** (as of 1 January 2025)

Ward Type	Office Hours	After-office Hours	
		Before midnight	After midnight
	<i>per day</i>	<i>per visit</i>	
General Ward	\$210 to \$420	\$210 to \$320	\$320 to \$420
High Dependency Unit	\$260 to \$530	\$260 to \$370	\$370 to \$530
Intensive Care Unit (Lower intensity ICU cases)	\$320 to \$630	\$320 to \$480	\$480 to \$630

**Office hours:** The fee range for office hours is for daily fees covering the routine number of visits a doctor may make to see the patient within the day. This includes both the first visit and repeat visits, for the management of the patient on the same day. Office hours may vary depending on the doctor's practice, but typically around 9- to 10-hour cycle on a weekday (e.g. 8am to 6pm).

**After office hours:** The fee range for after-office hours and after midnight hours is for each visit a doctor may be called back for a review or consultation on top of the day's routine consultations or visits during office hours. For call-back charges after-office hours, doctors may reasonably factor in the time of the visit, as well as the effort and duration required for the visit. In such cases, doctors are advised to clearly inform patients of their office hours and the additional charges.

## Hospital fee benchmarks

The recommended fee benchmarks for hospital fees should be read in conjunction with the following points:

### 1. Fee components covered by the benchmarks.

a. Hospital fee benchmarks inform what a reasonable fee range for items billed by the hospital is. This is a non-exhaustive list that includes fee components such as hospital room charges, surgical facilities and equipment (e.g. use of operating theatre), implants, consumables<sup>[1]</sup>, investigations (e.g., radiology and laboratory tests), general nursing services<sup>[2]</sup> and treatment, and medication. Hospital fee benchmarks exclude doctors' professional fees (i.e., surgeon, anaesthetist and doctors' inpatient attendance fees),

*[1] Consumables are items used for the treatment of patients, e.g. gauze, swabs, needles and dressing sets.*

*[2] General nursing services and treatments include basic monitoring, taking regular blood test, administering drugs and/ or fluids prescribed.*

**b. While the fee components (e.g., hospital room charges, implants) stated above collectively form hospital fee benchmarks, some components could be charged by the treating doctor but billed through the hospital. Notwithstanding this, the hospital fee benchmarks provides a common reference for the reasonableness of the total hospital fee billed by the hospital, regardless of the charging party.**

c. Doctors and hospitals are strongly encouraged to be transparent and upfront on the fee components that charged by them.

d. Doctors and hospitals are reminded that the hospital bill claim should only include expenses incurred by the patient during hospitalisation for the purpose of medical treatment. Pre- and post- hospitalisation costs are not to be included in the hospital bill claim, unless specifically required for the treatment episode (e.g. pre-admissions tests for surgery and post-discharge medication).

2. Ward type and setting covered by the benchmarks. The recommended hospital fee benchmarks are specific to the setting and ward type, and are set for cases of similar nature. Benchmarks for inpatient setting are relevant for only 1-bedded ward type, which is the most common in the private sector.

3. Reference but not fee cap - The benchmarks serve as a reference of reasonable fee ranges in the private sector, and are not a cap that has to be strictly adhered to. Charges that are higher than the benchmarks may not be unreasonable, particularly where a case is unusual in its context or complexity and require significantly more time or effort. Hospital providers / doctors can charge outside of the fee benchmarks, with valid justification. However, they should inform the patient and the insurer (where applicable) before the procedure is carried out, except when circumstances do not permit him/her to do so.

4. **Typical cases** - The benchmarks are meant to cover routine and typical cases. Each benchmark is a range of fees to cater for some variation in patients' conditions, but they exclude patients whose conditions are of high complexity or who may be very ill.
5. **Goods and Services Tax (GST)** - The benchmarks exclude GST.

<b>CCS Category</b>	<b>ICD Code</b>	<b>Diagnosis Description</b>
Acute and chronic tonsillitis	J03	Acute tonsillitis
Acute and chronic tonsillitis	J038	Acute tonsillitis due to other specified organisms
Acute and chronic tonsillitis	J039	Acute tonsillitis, unspecified
Acute and chronic tonsillitis	J36	Peritonsillar abscess
Acute bronchitis	J200	Acute bronchitis due to Mycoplasma pneumoniae
Acute bronchitis	J204	Acute bronchitis due to parainfluenza virus
Acute bronchitis	J205	Acute bronchitis due to respiratory syncytial virus
Acute bronchitis	J206	Acute bronchitis due to rhinovirus
Acute bronchitis	J208	Acute bronchitis due to other specified organisms
Asthma	J45	Asthma
Asthma	J450	Predominantly allergic asthma
Asthma	J459	Asthma, unspecified
Intestinal infection	A00	Cholera
Intestinal infection	A000	Cholera due to Vibrio cholerae 01, biovar cholerae
Intestinal infection	A001	Cholera due to Vibrio cholerae 01, biovar eltor
Intestinal infection	A009	Cholera, unspecified
Intestinal infection	A01	Typhoid and paratyphoid fevers
Intestinal infection	A010	Typhoid fever
Intestinal infection	A011	Paratyphoid fever A
Intestinal infection	A012	Paratyphoid fever B
Intestinal infection	A013	Paratyphoid fever C
Intestinal infection	A014	Paratyphoid fever, unspecified
Intestinal infection	A02	Other salmonella infections
Intestinal infection	A020	Salmonella enteritis
Intestinal infection	A022	Localised salmonella infections
Intestinal infection	A028	Other specified salmonella infections
Intestinal infection	A029	Salmonella infection, unspecified
Intestinal infection	A03	Shigellosis
Intestinal infection	A030	Shigellosis due to Shigella dysenteriae
Intestinal infection	A031	Shigellosis due to Shigella flexneri
Intestinal infection	A032	Shigellosis due to Shigella boydii
Intestinal infection	A033	Shigellosis due to Shigella sonnei
Intestinal infection	A038	Other shigellosis
Intestinal infection	A039	Shigellosis, unspecified
Intestinal infection	A04	Other bacterial intestinal infections

Intestinal infection	A040	Enteropathogenic Escherichia coli infection
Intestinal infection	A041	Enterotoxigenic Escherichia coli infection
Intestinal infection	A042	Enteroinvasive Escherichia coli infection
Intestinal infection	A043	Enterohaemorrhagic Escherichia coli infection
Intestinal infection	A044	Other intestinal Escherichia coli infections
Intestinal infection	A045	Campylobacter enteritis
Intestinal infection	A046	Enteritis due to Yersinia enterocolitica
Intestinal infection	A047	Enterocolitis due to Clostridium difficile
Intestinal infection	A048	Other specified bacterial intestinal infections
Intestinal infection	A049	Bacterial intestinal infection, unspecified
Intestinal infection	A05	Other bacterial food-borne intoxications, not elsewhere classified
Intestinal infection	A050	Food-borne staphylococcal intoxication
Intestinal infection	A051	Botulism
Intestinal infection	A052	Food-borne Clostridium perfringens [Clostridium welchii] intoxication
Intestinal infection	A053	Food-borne Vibrio parahaemolyticus intoxication
Intestinal infection	A054	Food-borne Bacillus cereus intoxication
Intestinal infection	A058	Other specified bacterial food-borne intoxications
Intestinal infection	A059	Bacterial food-borne intoxication, unspecified
Intestinal infection	A06	Amoebiasis
Intestinal infection	A060	Acute amoebic dysentery
Intestinal infection	A061	Chronic intestinal amoebiasis
Intestinal infection	A062	Amoebic nondysenteric colitis
Intestinal infection	A063	Amoeboma of intestine
Intestinal infection	A068	Amoebic infection of other sites
Intestinal infection	A069	Amoebiasis, unspecified
Intestinal infection	A07	Other protozoal intestinal diseases
Intestinal infection	A070	Balantidiasis
Intestinal infection	A071	Giardiasis [lamblia]s]
Intestinal infection	A072	Cryptosporidiosis
Intestinal infection	A073	Isosporiasis
Intestinal infection	A078	Other specified protozoal intestinal diseases
Intestinal infection	A079	Protozoal intestinal disease, unspecified
Intestinal infection	A08	Viral and other specified intestinal infections
Intestinal infection	A080	Rotaviral enteritis
Intestinal infection	A081	Acute gastroenteropathy due to Norwalk agent
Intestinal infection	A082	Adenoviral enteritis
Intestinal infection	A083	Other viral enteritis
Intestinal infection	A084	Viral intestinal infection, unspecified
Intestinal infection	A085	Other specified intestinal infections
Intestinal infection	A09	Other gastroenteritis and colitis of infectious and unspecified origin

Intestinal infection	A090	Other gastroenteritis and colitis of infectious origin
Intestinal infection	A099	Gastroenteritis and colitis of unspecified origin
Intestinal infection	A213	Gastrointestinal tularaemia
Intestinal infection	A222	Gastrointestinal anthrax
Intestinal infection	B770	Ascariasis with intestinal complications
Intestinal infection	B780	Intestinal strongyloidiasis
Intestinal infection	B810	Anisakiasis
Intestinal infection	B811	Intestinal capillariasis
Intestinal infection	B812	Trichostrongyliasis
Intestinal infection	B813	Intestinal angiostrongyliasis
Intestinal infection	B814	Mixed intestinal helminthiases
Intestinal infection	B818	Other specified intestinal helminthiases
Intestinal infection	B82	Unspecified intestinal parasitism
Intestinal infection	B820	Intestinal helminthiasis, unspecified
Intestinal infection	B829	Intestinal parasitism, unspecified
Nonspecific chest pain	R071	Chest pain on breathing
Nonspecific chest pain	R073	Other chest pain
Nonspecific chest pain	R074	Chest pain, unspecified
Viral infection	A90	Dengue fever [classical dengue]
