

Trap-Neuter-Rehome/Release-Manage (TNRM) Programme for Community Cats

The Animal & Veterinary Service (AVS) implemented the TNRM Cats programme on 1 September 2024. TNRM is a humane, science-based approach to sustainably manage the community cat population, whereby cats are trapped, sterilised and microchipped before being rehomed or released. The TNRM Cats Grant is open to all AVS Animal Welfare Group partners for application.

Funding Support under AVS

Grant partners can seek reimbursement from AVS by submitting the required documentation (e.g. certificates and invoices).

Item	Reimbursement Cap per Cat (GST Inclusive)
Microchipping	Up to \$30
Sterilisation (Male routine)	Up to \$110
Sterilisation (Female routine)	Up to \$230
Sterilisation (Complex - e.g., pregnant, cryptorchid)	Up to \$350
Necessary Treatment for/after Sterilisation	Up to \$110
Pre- and Post-Sterilisation Boarding/Hospitalisation - Male: max. 1 day pre-sterilisation and max. 1 day post-sterilisation - Female: max. 1 day pre-sterilisation and max. 2 days post-sterilisation	Up to \$40/day
Trapping (Adult - over 6 months)	Up to \$100
Trapping (Kitten - 6 months of age or less)	Up to \$30

Trapping and Sterilisation Support for Cat Caregivers

The Cat Welfare Society (CWS) is AVS' Lead Partner for TNRM Cats. CWS accepts requests from members of the public to trap, microchip and sterilise community cats. Send your request to info@catwelfare.org with information such as the specific location, times when the cats are seen, feeder details, and photos or videos.

If you have secured an unsterilised community cat and wish to have it microchipped and sterilised for free at CWS' partner clinics, you can make an online application at www.catwelfare.org/catsnip.
