

8 WAYS TO BE A GOOD TERRAPIN OWNER

1 Give Your Terrapin an Appropriately Sized Tank

Provide your terrapin with a tank large enough for it to swim easily and submerge fully.

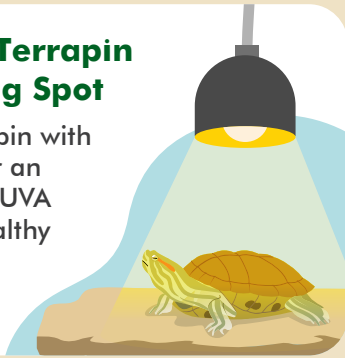

2 Give Your Terrapin a Platform to Get Out of the Water

Terrapins are semi-aquatic animals and need to get out of the water to rest.

3 Provide Your Terrapin With a Basking Spot

Provide your terrapin with natural sunlight or an artificial UVB and UVA light to ensure healthy shell growth.

4 Clean Your Terrapin's Enclosure Regularly

Use an aquarium filter and deep clean the enclosure when necessary to maintain cleanliness of the water and reduce the risks of illnesses.

5 Keep Your Terrapin's Tank in a Safe Environment

Keep your terrapin safely indoors and away from rain and other larger pets.

6 Provide Appropriate Terrapin Food

Feed your terrapin a nutritionally well-balanced and age-appropriate food to ensure its health. Supplement its diet with live prey and fresh vegetables.

7 Spend Quality Time With Your Terrapin

Play and interact with your terrapin to bond with it. Take the opportunity to check on it or any signs of illness.

8 Bring Your Terrapin to the Vet When Necessary

If your terrapin is unwell or injured, bring it to a vet experienced with terrapins for treatment.
