

Media Statement – 28 November 2025

As provided for under the Trap-Neuter-Rehome/Release-Manage (TNRM) programme, the Animal & Veterinary Service (AVS) has handed over the two dogs trapped from Seletar West Farmway to animal welfare group partners after they requested to take over the dogs.

One of the dogs was handed over to Oasis Second Chance Animal Shelter (OSCAS) on 27 November 2025 while the other was handed over to Causes for Animals Singapore (CAS) on 28 November 2025.

During the time when the dogs were with AVS, we had conducted a health check, vaccination, parasite preventatives and blood test for the dogs. Both dogs were observed to be alert and generally well, although the blood tests detected the presence of *Babesia gibsoni*, a parasite that is transmitted mainly through ticks. AVS had started treatment for both dogs and we have shared the medical results with the animal welfare groups' identified veterinary clinics for them to continue with the treatment.

Members of the public who are interested to adopt dogs from the TNRM programme can approach our TNRM animal welfare group partners.
