ANNEX D - Caring SG Commuters Badge

The Public Transport Council and St John Singapore launched the Caring SG Commuters Badge for St John Brigade cadets on 21 November 2026. The badge builds on St John Brigade's commitment to community care and cadet development and seeks to equip cadets with the empathy, awareness and skills to contribute towards a more gracious, caring and inclusive public transport culture.

Through the badge programme, cadets will learn about the needs of different commuters and understand the functions and purposes of Heart Zones, which are connecting points at public transport nodes for commuters to help other commuters. Cadets will also design and conduct empathy activities based on public transport situations, engage their peers, and reflect on how they can contribute towards a more caring commuting culture.
