

INDUSTRIALISED CONSTRUCTION

1 Product-led Design Approach

Benefits

- Integrated project delivery
- Cost & quantity forecasting
- Less downstream issues
- Design with value
- Carbon footprint calculation

2 Manufacturing Discrete & Integrated Products

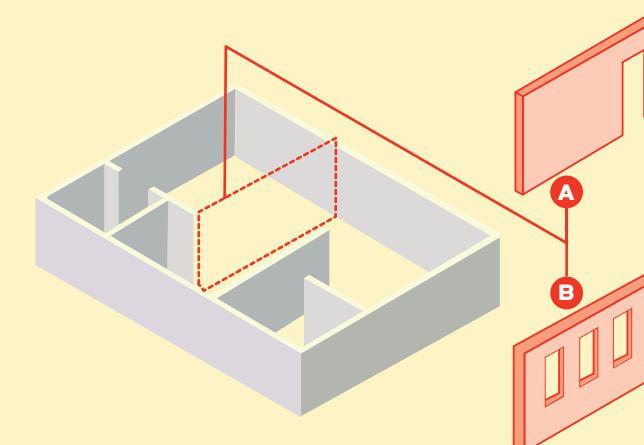

Benefits

- Faster clearance & Better quality
- Efficient mould usage
- Optimise manpower
- Lesser wastage
- Tracking of Production, Inventory and Logistics schedule
- Less carbon emission

MANUFACTURE

DESIGN

3 Interchangeable Building Products

Benefits

- Faster assembly & shorter programme
- Less error in pre-casting
- Circularity - future disassembly
- Less defects
- Less manpower & minimal retraining
- Predictable project outcome
