

## CYBER TIP ADD SCAMSHIELD AND ANTI-VIRUS APPS

### HOW YOU CAN SECURE YOUR DEVICES:

- Add the ScamShield app to detect scam messages and block scam calls.

- Install anti-virus apps which can detect malware and malicious phishing links.

- Do not download apps from unofficial sources. Only use app stores such as Google Play Store (Android) or Apple App Store (iOS), as these platforms have measures in place to detect and remove malicious apps.

- Stick to well-known app developers, check the number of downloads and user reviews.
