

### List of Resources on Singapore Digital Gateway

| S/No.                               | Overview Strategies  |   |
|-------------------------------------|--|---|
| Artificial Intelligence             |  |   |
| 1                                   | National AI Strategy 2.0   | Singapore's strategy to harness AI as a necessity—advancing talent, trust, and innovation for global excellence and public good.              |
| 2                                   | AI Playbook for Small States                                     | A comprehensive guide to AI development, governance, and implementation in small states.  |
| AI Governance Frameworks and Guides |  |   |
| 3                                   | Model AI Governance Framework for Traditional AI                 | A framework that translates high-level AI governance principles into best practices for companies to adopt.                                   |
| 4                                   | Model AI Governance Framework for Generative AI                  | A framework for AI stakeholders, outlining 9 dimensions for a balanced approach to address GenAI concerns, to foster a trusted AI ecosystem.  |
| 5                                   | ASEAN Guide on AI Governance and Ethics                          | A practical guide that provides principles and best practices on how to implement trustworthy AI in the region.                               |
| 6                                   | Expanded ASEAN Guide on AI Governance and Ethics – Generative AI | This guide provides a view of the opportunities and risks of Gen AI and recommends a range of policy actions to support responsible adoption. |
| 7                                   | Guidelines and Companion Guide on Securing AI Systems            | A community-driven guide that complements the AI security guidelines, curating practical controls and best practices.                         |
| LLM & Capability Development        |  |   |
| 8                                   | Starter Kit for Safety Testing LLM-Based Apps                    | A set of voluntary guidelines that combines emerging best practices and methodologies for the safety testing of LLM-based applications.       |
| 9                                   | Lionguard  | A contextualised LLM moderation classifier to detect unsafe Singapore slang or references.  |
| 10                                  | Project Moonshot   | An evaluation toolkit to help companies conduct benchmarking and red teaming for their Gen AI models and applications.                        |
| 11                                  | AI Verify Testing Framework and Toolkit                          | A testing framework and software toolkit to help companies assess their AI systems against internationally recognised principles.             |

| S/No.                       | Overview Strategies   |  |
|-----------------------------|---|--|
| 12                          | SEA-LION LLM  | A family of open-source LLMs that better understands Southeast Asia's (SEA) diverse contexts, languages, and cultures.                           |
| 13                          | Litmus & Sentinel   | Testbed and monitoring tools to trial emerging tech, manage AI risks, and build safe, trusted innovation.  |
| 14                          | AISG AI Apprenticeship Programme (AIAP)                         | AIAP blends theory with hands-on training, equipping aspiring AI engineers to master and apply AI in real-world challenges.                      |
| Digital Government          |   |  |
| 15                          | Smart Nation 1.0  | Singapore's first Smart Nation vision, launched in 2014, drove digital adoption and transformed domains like health, transport, and education.   |
| 16                          | Smart Nation 2.0  | Launched in 2024, Smart Nation 2.0 steers digital development around Trust, Growth, and Community to build a thriving digital future for all.    |
| 17                          | Digital Government Blueprint 1.0                                | Strategic roadmap guiding public service digitalisation, for a cohesive and citizen-centric digital government.                                  |
| 18                          | Building an Agile Development Team                              | Singapore's agile development team; OGP's hiring, talent and culture management resource for building high-performing digital teams.             |
| Digital Access & Identity   |   |  |
| 19                          | Singpass  | A personal authentication system that enables users to access various services online.   |
| 20                          | Corppass  | Corporate authorisation framework that enables organisations to transact with digital services from the Singapore Government.                    |
| 21                          | MyInfo  | Allows Singaporeans to manage personal data and auto-fill forms to streamline interactions with government, banks, and service providers.        |
| 22                          | World Bank Case Study: National Digital Identity & Data Sharing | Explore how Singpass (NDI) and APEX established secure digital identity and data sharing systems for resilient, trusted public service delivery. |
| Citizen & Business Services |   |  |
| 23                          | LifeSG  | A platform that unifies 100+ gov services, helping users navigate key life stages through a single, needs-based platform.                        |

| S/No.                                  | Overview Strategies                           |   |
|--|---|---|
| 24                                     | GoBusiness                                    | A digital platform that helps businesses access government e-services, licenses, and grants, simplifying and streamlining business interactions.      |
| 25                                     | RedeemSG                                      | A national voucher platform that lets agencies distribute and track digital vouchers, seamlessly connecting residents and merchants.                  |
| 26                                     | Open Digital Platform                         | A next-gen middleware for OT systems—built to enable smart districts and scalable, cross-domain integration across sectors.                           |
| <b>Productivity Tools</b>              |   |   |
| 27                                     | GoGovSG                                       | An open-source link shortener for creating trusted links for sharing with citizens.   |
| 28                                     | FormSG  | An open-source no-code platform that allows public officers to create secure digital forms in minutes.  |
| 29                                     | Plumber                                       | An open-source no-code tool to create customised, automatic workflows for a public officer's daily tasks.   |
| <b>Information &amp; Communication</b> |   |   |
| 30                                     | AskGov  | One-stop portal for all government related questions and answers.   |
| 31                                     | Isomer  | An open-source government static website builder that offers secure, reliable, accessible, and cost-effective sites to members of the public.         |
| <b>Playbooks &amp; Guides</b>          |   |   |
| 32                                     | Incident Management Guide                     | An example of a tried and tested reference guide on how to recognise, respond, and learn from production incidents to maintain reliability and trust. |
| 33                                     | Production Guide                              | A framework for ensuring production services meet high standards of availability, security, and maintainability.                                      |
| 34                                     | Retrieval-Augmented Generation (RAG) Playbook | A playbook that provides practical guidance on how to build, evaluate and improve RAG systems effectively, grounded in government-specific use cases. |

| S/No.              | Overview Strategies  |   |
|--------------------|----------------------|---|
| Innovation Culture |                      |   |
| 35                 | Hack for Public Good | Annual hackathon where officers prototype citizen-centric public services, developing tools grounded in real community needs.                       |
| 36                 | {build} Hackathon    | GovTech’s annual hackathon and incubation programme, which aims to build the next generation of products for GovTech, Public Officers and Citizens. |
