

# MOBILE INPATIENT CARE@HOME

## WHAT IS MIC@HOME ?

Mobile Inpatient Care at Home (MIC@HOME) is an alternative inpatient care delivery model that offers suitable patients the option of being hospitalised in their own homes, instead of a hospital ward. You will be provided with clinical care by a professional care team including doctors, nurses and pharmacists. The care you receive is similar to that in the hospital.

## HOW WILL YOU BE CARED FOR AT HOME?

- 24/7 access to the care team
- Combination of teleconsultations and/or home visits until fit for discharge
- Alerts sent to care team immediately for abnormal vital signs
- Immediate response by care team to address medical needs if condition deteriorates

## BENEFITS OF MIC@HOME

- Improved patient experience
- Reduced risk of adverse events
- Reduced risk of hospital acquired infections and complications

Cost of MIC@HOME will be similar to or lower than normal hospital ward  
Medisave, Medishield and Integrated Shield Plan coverage will apply

## ✓ ELIGIBILITY

Patients who:

- Are clinically stable
- Are not anticipated to require intensive hospital care
- Are independent or have adequate caregiving support at home
- Are able to medicate independently
- Have telecommunication access (i.e. stable internet connection at home)

Please consult your doctor to determine your eligibility for this programme.

## THE MIC@HOME JOURNEY

### 1 ADMISSION TO MIC@HOME

- Fulfill MIC@HOME admission criteria
- Counsel patient on the programme
- Arrange logistics (e.g., supplying monitoring devices, installing applications)

### 2 MIC@HOME

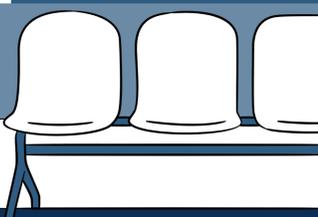

- Round-the-clock access to care team
- Regular teleconsultations and remote patient monitoring
- Simple procedures / blood tests (if any)

### 3 DISCHARGE

- Discharge plan (including arrangement of medication delivery and follow-up consultations)

# 居家病房

## 什么是居家病房？

居家病房（简称 MIC@HOME）是一项以居家护理形式进行的医疗护理服务。适合参与的病患无需入住医院，能选择在家中接受治疗。您能在家中享有相同于在医院提供的医疗服务与照顾（包括医疗护理，药物管理）

## 参与居家病房计划的条件

病患必需符合以下的条件：

- 身体状况稳定
- 预计无需急性医疗服务
- 独立自主或有居家看护
- 能遵照医嘱服药
- 拥有上线设施（稳定的互联网连接）

若想详细了解您是否符合参与条件，  
请咨询向您的主治医疗团队。

## 您在家中能如何接受治疗？

- 医疗团队将全天24小时候命
- 通过远程会诊和家访结合的方式在家疗养，直到适合出院
- 若您的生命体征出现异常，医疗团队将即刻收到警报
- 若您的病情恶化，您将即刻转诊医院接受治疗

## 居家病房的益处

- 提升患者就医体验
- 减少住院相关的不良事件的风险
- 减少院内感染的风险

费用相等于普通住院费

能使用终身健保 (MediShield)、保健储蓄 (MediSave) 和综合健保计划 (Integrated Shield Plan) 支付医疗费用

## 您的康复路线

### 1 参与居家病房服务

- 签同意书、注册和财务辅导
- 物流安排（比如提供监控设备和下载所需要的程序）

### 2 居家病房

- 医疗团队全天24小时候命
- 定期线上会诊
- 远程病人监护
- 静脉药物注射、抽血检验等（若有需要）

### 3 出院手续

- 出院计划（包括安排药物递送服务及复诊）

请咨询您的主治医生以确认您是否符合参与居家病房计划的条件：<https://moht.com.sg/mic-home/>
