# QUICK START IMPLEMENTATION GUIDE FOR HEALTHCARE PROVIDERS \*Tan Tock Seng

## TTSH DM Toolkit

A simple, clinic-ready kit to help non-Endocrine SOCs confidently start GLP1-RA and insulin, refer to same-day DNE and DFS — leading to real, measurable impact.

It's called the DM Bag

#### WHO CAN USE IT?

- Non-endocrinology Specialists in Tertiary Care
- Polyclinic Family Physicians (\*Adapted)
- Private General Practitioners (\*Adapted)

#### **OUTCOMES**

Effective in improving HbA1c and provider behaviour:

**ii** HbA1c: **↓ from 10.0% to 9.1%** 

🕷 Provider Behaviour:

GLP1-RA Prescriptions: ↑ 51.7%

Insulin (Glargine) Orders: 13.3%

(Based on Mar 24 to Feb 25 results)

### WHAT IS IN THE DM KIT

The DM Bag is a kit that contains the following:

Demo kits (e.g., Trulicity, Humalog, Lantus)

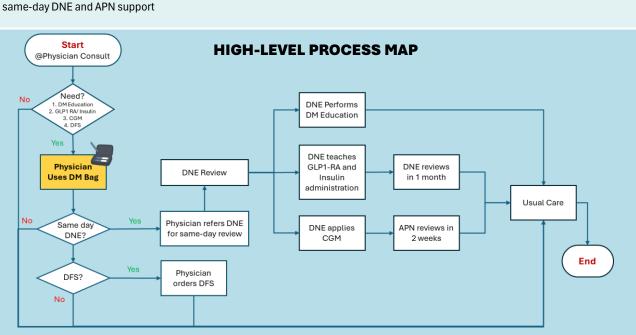

QR-code consolidated Patient education leaflets

Blood glucose logbooks + SMBG starter packs (optional)

## **VOICES FROM THE GROUND**

"At least we have your ("DM Kit") now. I used to really hate initiating insulin in clinic and didn't even know if I was teaching the right things".

Ready to Adopt the DM Bag in Your Clinic? We've done the testing. You can plug and play.
