Digital Technologies contributing to productivity growth

United States and Western Europe, productivity growth potential
Percentage points

Online Safety,
Compliance Application
and Registration System

1. Allows better tracking of your past FSCA report submission. Easily filter for cases that are still opened and require your follow-up.

2. Digitizes the current Reporting Process. Our aim is to make the FSCA submission process intuitive and easy to use where OSCAR becomes a one-stop platform for everything related to FSCA.

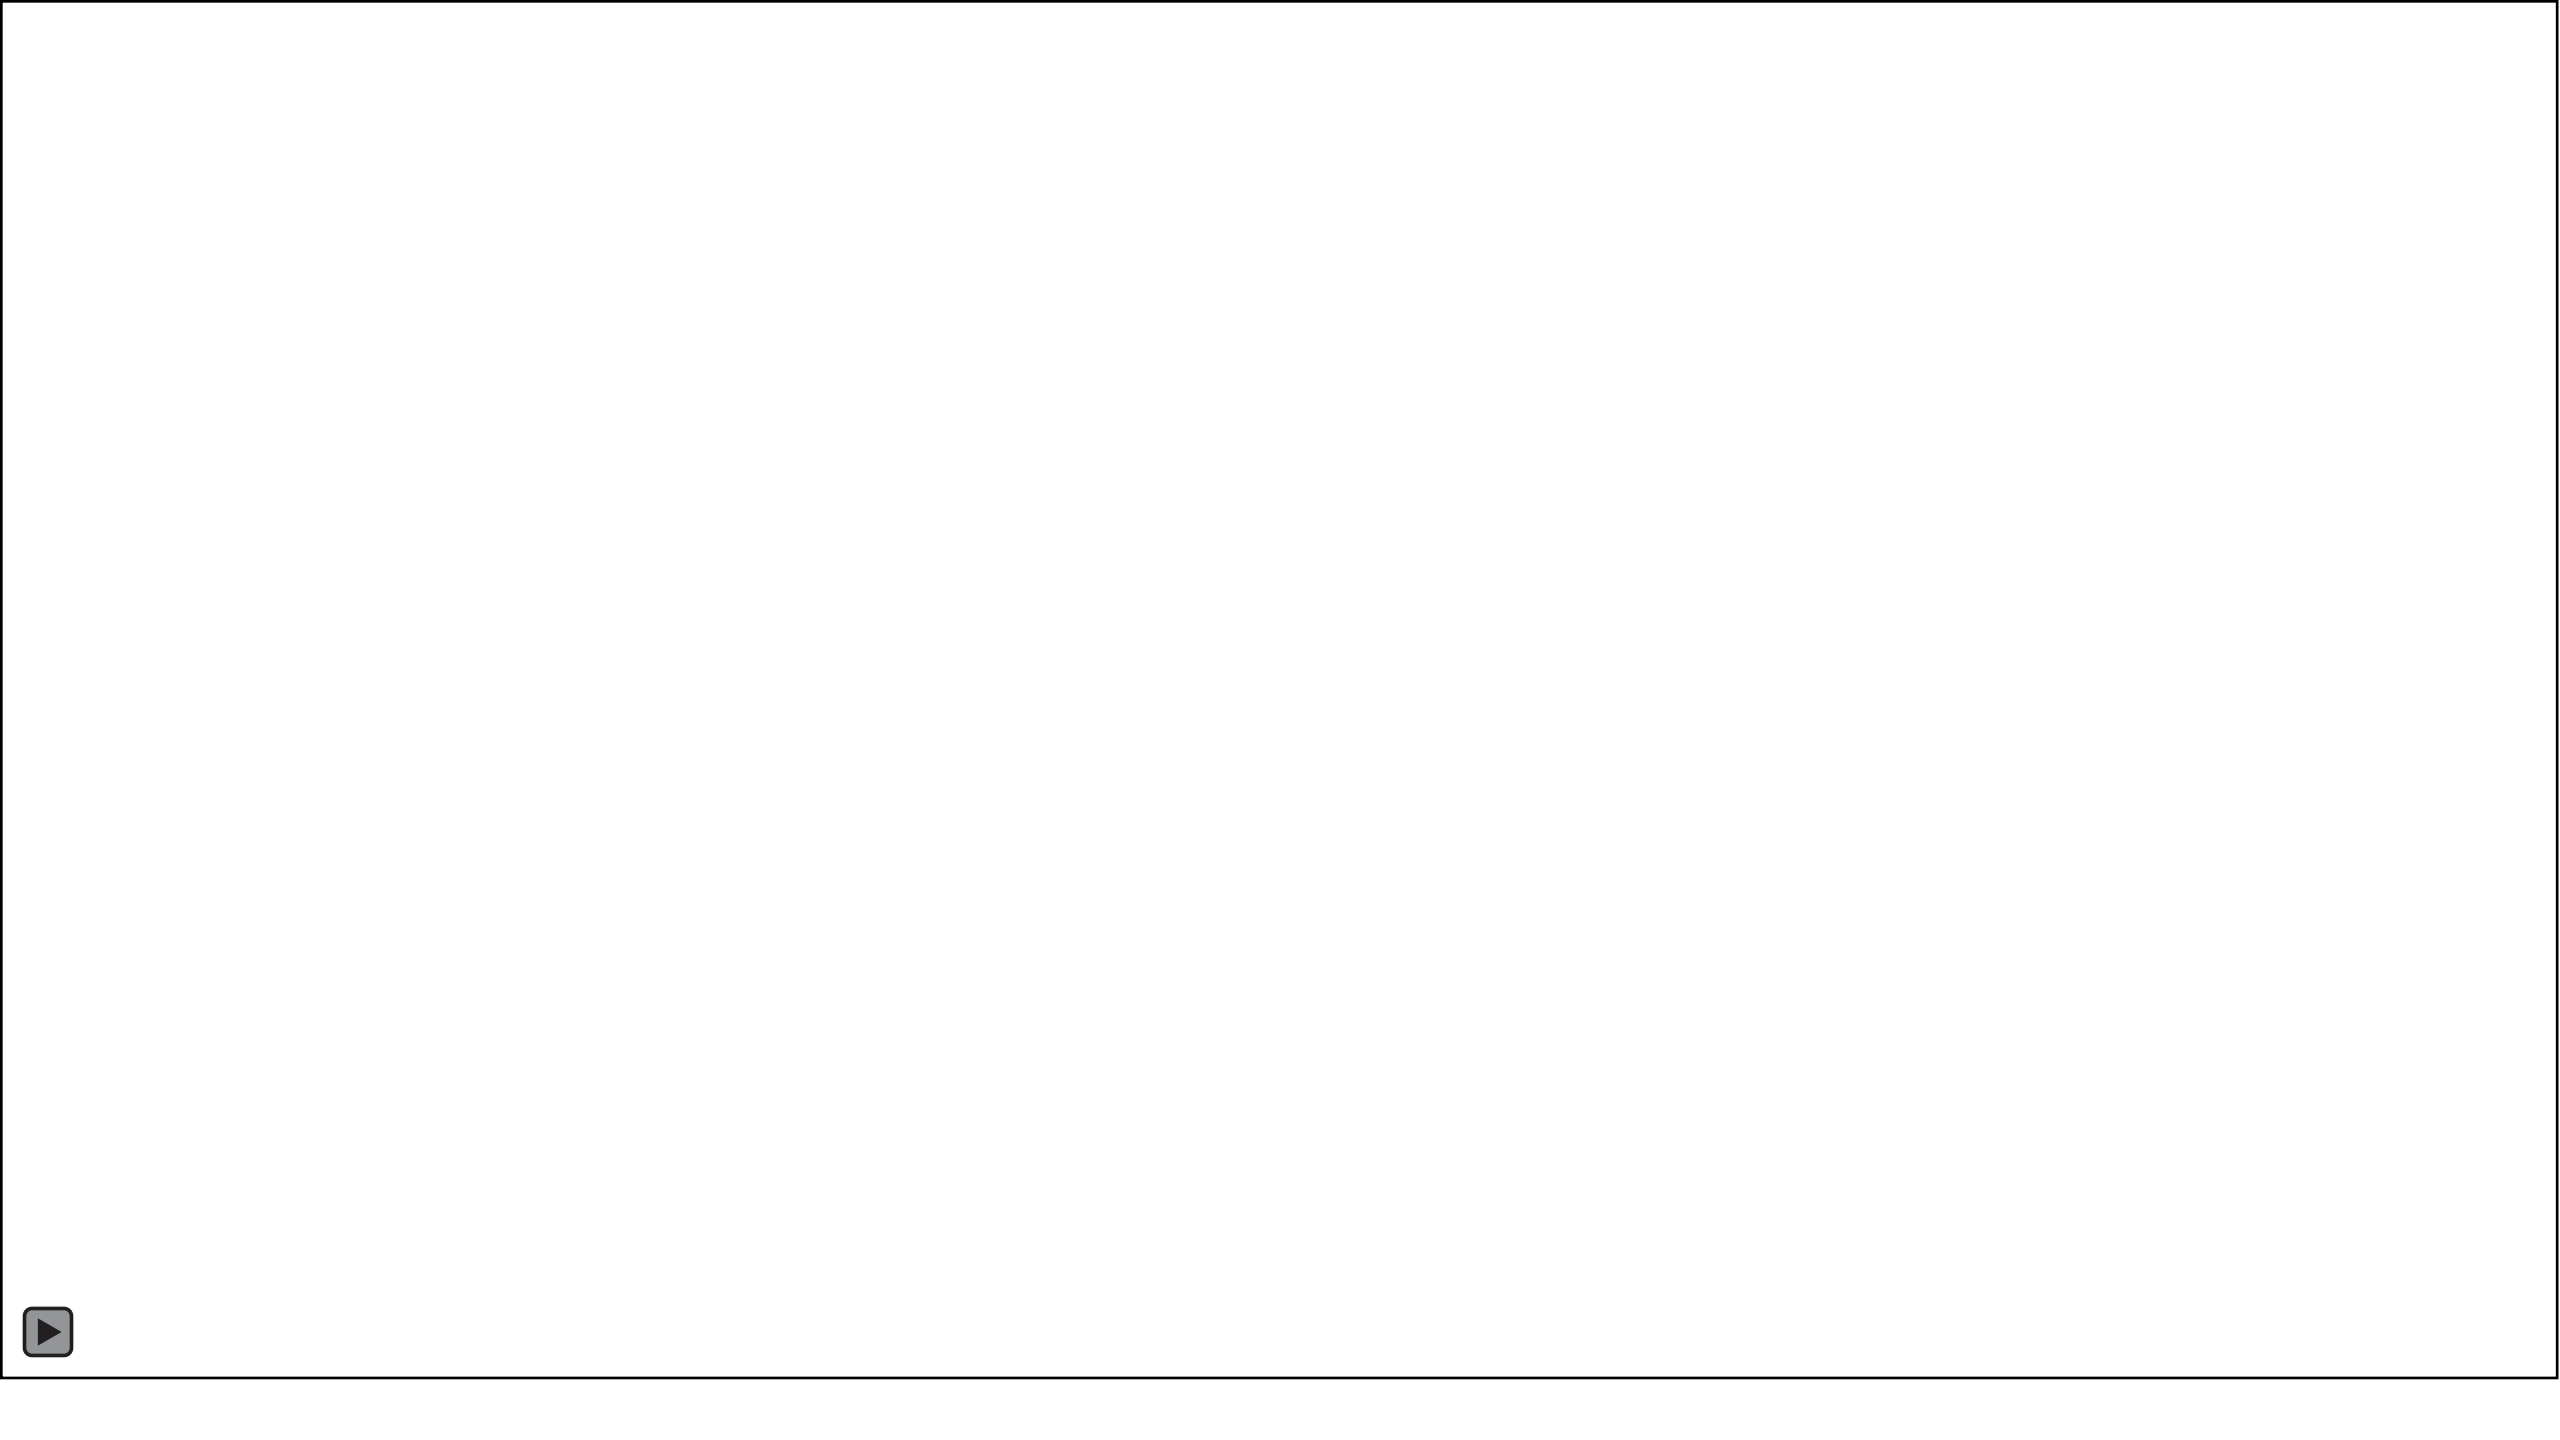

3. Streamlines our internal FSCA processing which allows your FSCA reports to be reviewed and cleared more efficiently.

4. Ultimately, at the core of our mission which is to safeguard public health, the faster processing will ensure recall and device correction are initiated in a more efficient and timely manner so as to not compromise patient safety in Singapore
