

## ANNEX A

### LIST OF NEW SKILLSFUTURE WORK-STUDY PROGRAMMES LAUNCHED THIS YEAR

INSTITUTE	PROGRAMME	DESCRIPTION
<b>Ngee Ann Polytechnic (NP)</b>	SkillsFuture Work-Study Post-Diploma (Specialist Diploma in Youth Development & Mental Wellness)	The SkillsFuture Work-Study Post-Diploma (Specialist Diploma in Youth Development & Mental Wellness) equips professionals with essential skills to support the mental well-being and development of today's youth. It combines theoretical understanding with practical application, preparing graduates to comprehend youth development and foster emotional resilience among youth through programme development, communication, and behavioural management strategies. Through this work-study pathway, participants can immediately apply their learning in real-world settings while engaging effectively with families, educators, and community partners, meeting Singapore's growing need for qualified youth development professionals.
<b>Republic Polytechnic (RP)</b>	SkillsFuture Work-Study Certificate leading to Diploma in Digital Media and Communication	The SkillsFuture Work-Study Certificate leading to Diploma in Digital Media and Communication prepares students for the dynamic media and communication industry. Learners gain a competitive edge by mastering communication through multiple perspectives: business strategy, emerging technologies, data analytics, and corporate sustainability. This comprehensive programme develops analytical and problem-solving capabilities essential for thriving in digital business environments, both locally and globally. Graduates emerge ready to tackle complex communication challenges with innovative solutions, backed by practical skills and strategic thinking.
	SkillsFuture Work-Study Certificate leading to Diploma in Accounting and Corporate Secretarial Practice	The SkillsFuture Work-Study Certificate leading to Diploma in Accounting and Corporate Secretarial Practice aims to provide adult learners with accessible pathways to pursue careers in accounting or corporate secretarial practice, addressing the sector's talent gap and ensuring a continuous pipeline of skilled professionals to support future growth.

	SkillsFuture Work-Study Certificate leading to Diploma in Music and Sound Production	The SkillsFuture Work-Study Certificate leading to Diploma in Music and Sound Production develops professionals who can excel in today's digital audio landscape. Through hands-on workshops and industry-standard training, students master audio content creation while building expertise in live sound, studio recording, sound design, and media production. The programme emphasises creative innovation and technical proficiency, preparing graduates for diverse roles in entertainment, broadcasting, and digital media. Students graduate with a robust portfolio of work, practical industry experience, and the versatile skills needed to shape compelling audio content across broadcast, digital platforms, and live performances.
<b>Singapore Polytechnic (SP)</b>	SkillsFuture Work-Study Post-Diploma (Specialist Diploma in Data Science (Artificial Intelligence))	<p>The SkillsFuture Work-Study Post-Diploma (Specialist Diploma in Data Science (Artificial Intelligence)) supports fresh local graduates from the Polytechnics in acquiring and deepening their skills in AI application and machine learning. Participants can look forward to equipping themselves with knowledge and skills on Statistics and Programming for Data Science, feature engineering, machine learning model training and inferencing, enabling human and AI interactions through virtual/conversational agents, deep learning models for computer vision and natural language processing, etc.</p> <p>AI is a technical area that requires knowledge of computer science and statistics. Participants will gain the opportunity to prepare for job roles such as AI engineer and Machine Learning engineer in the Information and Communications industry, as well as other sectors such as Semiconductor, Electronics, FinTech and Human Resource, as these sectors value job roles that require technical skills and critical core skills in data science and AI.</p>
