

CLINICAL TRIALS BASICS FOR INVESTIGATORS

DURATION

4 weeks e-learning + 2 days classroom-based

PROGRAMME FEES

Full Price	S\$1,900 (incl. GST)
Employees of Singapore's Public Healthcare Clusters under MOH Holdings (after subsidy)	S\$1,100 (incl. GST)

The Clinical Trials Basics for Investigators programme equips clinicians with the essential knowledge and practical skills to conduct clinical trials responsibly and effectively.

Whether you're new to clinical research or preparing to take on investigator responsibilities, this programme is your launchpad.

REGISTER NOW!

Key Programme Modules

A foundational programme designed to equip clinicians with the knowledge and confidence to conduct clinical trials.

INTRODUCTION TO CLINICAL TRIALS

Gain an overview of clinical trials, key stakeholders and the Institutional Review Board (IRB) process.

DEFINE RESEARCH QUESTIONS

Discover research opportunities through systematic review and develop clear, effective research protocols.

STUDY DESIGN

Learn key clinical trial designs and statistical methodologies, from standard RCTs to adaptive approaches.

CLINICAL TRIAL OPERATIONS

Develop GCP-compliant trial management across operational domains throughout the study lifecycle.

LEGAL ASPECTS OF CLINICAL TRIALS

Understand clinical trial insurance, research agreements and the fundamentals of grant management.

EXPERIENTIAL SHARING

Gain insights and lessons from an experienced trial investigator.

What You'll Gain

- ✓ Confidence in trial initiation
- ✓ First-hand exposure to clinical trial investigator roles and responsibilities
- ✓ Insights into regulatory, ethical and operational frameworks
- ✓ Real-world perspectives from experienced investigators

Who Should Attend

-  Residents
-  Junior Doctors
-  Clinicians
-  Aspiring Clinical Trial Investigators

WHAT OUR PARTICIPANTS SAY

“

As an aspiring Principal Investigator, I found the programme highly valuable in equipping me with updated knowledge, practical skills, and a clearer understanding of the research landscape. The expert guidance and real-world insights have given me greater confidence in leading future research studies.

Dr Lam Man Sze
Senior Acupuncturist
Changi General Hospital

“

I found the course very purposeful and practical in the selection of its topic for such a short course. The people selected to give the lectures were also appropriate and very engaging and helped me understand a great deal.

Dr Jerold Loh Wei Zhe
Associate Consultant
National University Cancer
Institute, Singapore

“

An excellent primer for anyone intending to embark on a research journey – compact and impactful content by subject matter experts. Covers practical and essential topics from trial design to IRB application and grant management, very useful and applicable on the ground. Thoughtfully curated, well-delivered, and thoroughly enjoyable!

Dr Selene Teoh Tse Yen
Senior Consultant
Khoo Teck Puat Hospital
