

## **Appendix 2 - CCCS's Leniency Programme**

CCCS's Leniency Programme affords lenient treatment to businesses that are part of a cartel agreement or concerted practice (or trade associations that participate in or facilitate cartels), when they come forward to CCCS with information on their cartel activities.

Due to the secret nature of cartels, businesses participating or which have participated in them are given an incentive to come forward and inform CCCS of the cartel's activities. The policy of granting lenient treatment to these businesses which co-operate with CCCS outweighs the policy objectives of imposing financial penalties on such cartel participants.

Where eligible for lenient treatment, businesses can be granted total immunity or be granted a reduction of up to either 100% or 50% in the level of financial penalties, depending on whether CCCS has already begun an investigation and the timing of the leniency application. For more information, please refer to CCCS's website [here](#).
