

Other recommended guidelines for customer-facing operations

A. Encourage online retail, and “click & collect” for goods and delivery

- Encourage online retail and click-and-collect from store, to reduce dwell time
- Where practicable, collection and delivery from the store must be spaced out and contactless.
- Take reasonable steps to ensure that delivery personnel observe at least one-metre spacing at all times and do not cluster together.
- Refer to the [Advisory for Delivery Businesses](#) for guidelines on delivery requirements.

B. Use of retail establishments as a third-party venue for work-related events

- If a retail outlet is used as a third-party event space, as a best practice, only one event should be held in the outlet at a time. If not feasible, each third-party event should be clearly demarcated from the others, as well as from the main consumer shopping area. Each area should be kept completely separate by either a solid partition (at least 1.8-metre high, from wall to wall), or a minimum 3-metre spacing demarcated by continuous physical barriers (e.g. plexiglass screens, barricade tape, queue poles). There should be no mixing or intermingling of guests from separate events. Food and drinks must not be served.
