

Details on SafeEntry Check-in

- With TraceTogether-only SafeEntry (TT-only SE) implemented at F&B establishments, SafeEntry check-in can only be done by:
 - i) Scanning the SafeEntry QR code using the TraceTogether App;
 - ii) Presenting the TraceTogether Token QR code to the camera/2D scanner linked to SafeEntry (Business) App for scanning; or
 - iii) Bringing the TraceTogether Token or App close to a SEGW.
- F&B establishments are required to deploy SafeEntry via TT-only SE to log the check-in of customers and visitors to their premises, with the exception of those that only provide takeaway and/or delivery, with no dine-in services. However, all F&B establishments must require their employees and vendors to do SafeEntry check-in via TT-only SE.
- In addition, F&B establishments required to deploy SafeEntry for customers and visitors need to provide the SEGW as an additional option for SafeEntry check-in. SEGW is available as a feature within the SafeEntry (Business) App (updated to the latest version) and as a physical standalone device (SEGW Box). These F&B establishments may apply for a free SEGW Box¹.
- **To facilitate more precise contact tracing efforts, SafeEntry check-out is also encouraged.** Businesses can facilitate check-out for their customers by toggling to the SEGW check-out function within the SafeEntry (Business) App. Businesses with a higher throughput of visitors and places where people are likely to be in close proximity for prolonged periods with masks off will also be eligible for SEGW Check-out Boxes².
- For avoidance of doubt, TraceTogether Token check-in and SEGW both refer to the mode of check-in, while TT-only SE refers to the overall programme which will permit only TraceTogether modes of check-in (i.e. TraceTogether App or Token).
