Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearance 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Construction	Accidental injury or mortality	High	Medium	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Medium	Medium	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Construction	Accidental injury or mortality	High	Low	Species that are mobile but possibly susceptible to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	NA	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	NA	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Ceriatrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grissette	Least Concern	Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Construction	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Minor	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	Low	Low	Less likely	Minor

Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Construction	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from construction activities (large vehicles, excavation, piling, etc.) and roadkills:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Implement wildlife response plan and conduct pre-felling inspections before clearance	Moderate	1. Directional site clearacne 2. Use biodegradable erosion control blankets 3. Regularly inspect hording and maintain its structural integrity 4. Regular fauna site inspection 5. Ensure good housekeeping practices 6. Conduct biodiversity awareness training for site personnel 7. Road calming measures	High	High	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Apus nipalensis</i>	House swift	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Bird	<i>Ardea purpurea</i>	Purple heron	Least Concern	Endangered	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Blrd	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor

Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Construction	Human disturbance	High	Negligible	Species that are slightly sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Hoard up construction site	Negligible	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Negligible	Very Low	Unlikely	Negligible

Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Construction	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	NA	Construction	Human disturbance	High	High	Species that are extremely sensitive to human presence, and nesting birds	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	High	High	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	NA	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Ceragrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor

Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Construction	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Minor	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Low	Low	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Construction	Human disturbance	High	Medium	Species that are sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Hoard up construction site	Moderate	1. Restrict entry of site personnel into forested areas and stream outside of construction zone 2. No encroachment into retained areas 3. Ensure good housekeeping practices	Medium	Medium	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by construction personnel, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict:	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	Medium	Medium	Less likely	Minor
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Apus nipalensis</i>	House swift	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ardea purpurea</i>	Purple heron	Least Concern	Endangered	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible

Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Asictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness training for site personnel	Negligible	Very Low	Unlikely	Negligible
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Construction	Human-wildlife conflict	High	Medium	Species that are not perceived as nuisances or threats by construction personnel:	Medium	Unlikely	Impact is not expected to affect this species during the construction phase of the project		Negligible			Unlikely	Negligible	

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Construction	Human-wildlife conflict	High	High	Species that are typically perceived as both nuisances and threats by construction personnel, highly tolerant of human presence and urban environments, and are frequently implicated in human-wildlife conflict	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	High	High	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, less tolerant of human presence and urban environments:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, less tolerant of human presence and urban environments:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, less tolerant of human presence and urban environments:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, less tolerant of human presence and urban environments:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	NA	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, less tolerant of human presence and urban environments:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	NA	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, less tolerant of human presence and urban environments:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Ceriagrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Construction	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by construction personnel:	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Establish wildlife response plan	Negligible	Conduct biodiversity awareness trianing for site personnel	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by construction personnel, highly tolerant of human presence and urban environments, and are frequently implicated in human-wildlife conflict:	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Minor	Conduct biodiversity awareness trianing for site personnel	Low	Low	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Construction	Human-wildlife conflict	High	High	Species that are typically perceived as both nuisances and threats by construction personnel, highly tolerant of human presence and urban environments, and are frequently implicated in human-wildlife conflict:	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project	Establish wildlife response plan	Moderate	Conduct biodiversity awareness trianing for site personnel	High	High	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, most aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Negligible	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, most aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Negligible	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, most aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Negligible	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, most aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Negligible	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Construction	Light disturbance	High	High	Species that are extremely sensitive to changes in light levels: nocturnal, crepuscular fauna and nesting/hatching sea turtle species, migratory birds	High	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Major	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Construction	Light disturbance	High	High	Species that are extremely sensitive to changes in light levels: nocturnal, crepuscular fauna and nesting/hatching sea turtle species, migratory birds	High	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Major	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Construction	Light disturbance	High	High	Species that are extremely sensitive to changes in light levels: nocturnal, crepuscular fauna and nesting/hatching sea turtle species, migratory birds	High	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Major	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor

Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor

Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Construction	Light disturbance	High	Medium	Species that are not sensitive to changes in light levels: aculeate hymenopterans, most aquatic and marine species	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Ceriatrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor

Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Construction	Light disturbance	High	High	Species that are extremely sensitive to changes in light levels: nocturnal, crepuscular fauna and nesting/hatching sea turtle species, migratory birds	High	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Major	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Construction	Light disturbance	High	High	Species that are extremely sensitive to changes in light levels: nocturnal, crepuscular fauna and nesting/hatching sea turtle species, migratory birds	High	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Major	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Construction	Light disturbance	High	High	Species that are extremely sensitive to changes in light levels: nocturnal, crepuscular fauna and nesting/hatching sea turtle species, migratory birds	High	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Major	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	High	High	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Construction	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Low	Low	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Construction	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles and mammals	Medium	Likely	Impact is a common occurrence during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Moderate	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Medium	Medium	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Construction	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, most aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the construction phase of the project	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas	Negligible	1. No night works and restrict working hours to 0800h - 1800h where possible 2. Point lighting away from retained areas 3. Lighting equipment to be turned off when not in use 4. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible	Negligible	Very Low	Unlikely	Negligible

Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Very Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Negligible	Very Low	Less likely	Negligible
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	-	High	High	Possible	Moderate
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Very Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	Negligible	Very Low	Less likely	Negligible
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	Negligible	Very Low	Less likely	Negligible
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Medium	Medium	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	NA	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	NA	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Ceriatrigon chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	Medium	Medium	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Considerable changes in waterbody that may affect connectivity for aquatic species	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Considerable changes in waterbody that may affect connectivity for aquatic species; Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Considerable changes in waterbody that may affect connectivity for aquatic species	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Construction	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the construction phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Medium	Medium	Certain	Major
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Medium	Medium	Certain	Major
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Medium	Medium	Certain	Major
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major

Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	NA	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	NA	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Negligible	No loss of habitat, raptor nests, or roosts	Very Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Minor	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Minor
Odonata	<i>Ceragrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Medium	Medium	Certain	Major
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Medium	Medium	Certain	Major
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate

Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	High	Loss of >40% of habitat or roosts; loss of any raptor nests	High	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	High	High	Certain	Major
Odonata	<i>Devadatta argyroides</i>	Malayan grissette	Least Concern	Endangered	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Low	Low	Certain	Moderate
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Construction	Loss of/reduction in habitats and food sources	High	Medium	Loss of 10–40% of habitat, or roosts	Medium	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Major	1. Retain native-dominated secondary forest where possible. 2. Reforest retained urban vegetation and scrubland to increase forested areas. 3. When constructing parks and parks amenities, avoid native-dominated secondary forest and vegetated areas where possible to minimise vegetation clearance 4. Facilitate access to alternate habitat for the displaced animals	Medium	Medium	Certain	Major
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Construction	Loss of/reduction in habitats and food sources	High	Low	Loss of <10% of habitat, or roosts	Low	Certain	Impact is a continual or repeated process during the construction phase of the project	Demarcate working space to prevent excessive vegetation clearing	Moderate	1. Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Medium	Species that are mobile but possibly susceptible to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Medium	Medium	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Ceragrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Coelliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Operational	Accidental injury or mortality	High	Low	Species with low susceptibility to accidental injury/mortality from operation activities, roadkills, and collision with buildings.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	Low	Low	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Operational	Accidental injury or mortality	High	High	Species with high susceptibility to accidental injury/mortality from operation activities and roadkills, and collision with buildings.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Bird-friendly building design 2. Speed bumps 3. Colugo poles and culverts	High	High	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Apus nipalensis</i>	House swift	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Bird	<i>Ardea purpurea</i>	Purple heron	Least Concern	Endangered	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Operational	Human disturbance	High	Negligible	Species that are not sensitive to human presence	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Negligible	Very Low	Unlikely	Negligible
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Operational	Human disturbance	High	Medium	Species that are slightly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Operational	Human disturbance	High	High	Species that are sensitive to human presence	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	High	High	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	High	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Ceragrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisetite	Least Concern	Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Operational	Human disturbance	High	Low	Species that are slightly sensitive to human presence	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Low	Low	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Operational	Human disturbance	High	Medium	Species that are possibly sensitive to human presence	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Maintain a 30m buffer between infrastructures (e.g. residential buildings) and retained forest 2. Conduct random patrols to ensure park visitors stay on the designated trails	Medium	Medium	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as nuisances and possibly as threats by members of the public, highly tolerant of human presence and urban environments, and frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Apus nipalensis</i>	House swift	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ardea purpurea</i>	Purple heron	Least Concern	Endangered	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Asictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Cephenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible

Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Operational	Human-wildlife conflict	High	Medium	Species that are typically perceived as both nuisances and threats by members of the public, highly tolerant of human presence and urban environments, and are frequently implicated in human-wildlife conflict.	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Medium	Medium	Less likely	Minor
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Operational	Human-wildlife conflict	High	High	Species that are typically perceived as both nuisances and threats by members of the public, highly tolerant of human presence and urban environments, and are frequently implicated in human-wildlife conflict.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	High	High	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Ceriatrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Devadatta argyroides</i>	Malayan grisetite	Least Concern	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Operational	Human-wildlife conflict	High	Negligible	Species that are not perceived as nuisances or threats by members of the public	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	Low	Species that are possibly perceived as both nuisances and threats by members of the public, less tolerant of human presence and urban environments.	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	Low	Low	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Operational	Human-wildlife conflict	High	High	Species that are typically perceived as both nuisances and threats by members of the public, highly tolerant of human presence and urban environments, and are frequently implicated in human-wildlife conflict.	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	Put up educational signboards on the appropriate behaviour when encountering wildlife including 'no feeding' signs	High	High	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor

Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Spiornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Operational	Light disturbance	High	Negligible	Species that are not sensitive to changes in light levels: aculeate hymenopterans, aquatic and marine species	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Negligible	Very Low	Unlikely	Negligible
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrm lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Cerriagrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Operational	Light disturbance	High	Low	Species that are slightly sensitive to changes in light levels: odonates, butterflies	Low	Certain	Impact is a continual or repeated process during the operation phase of the project		Moderate	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Low	Low	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Operational	Light disturbance	High	High	Species that are slightly sensitive to changes in light levels: odonates, butterflies	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Operational	Light disturbance	High	High	Species that are highly sensitive to changes in light levels: nocturnal, crepuscular fauna	High	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	High	High	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Operational	Light disturbance	High	Medium	Species that are sensitive to changes in light levels: diurnal birds, reptiles, and mammals	Medium	Certain	Impact is a continual or repeated process during the operation phase of the project		Major	1. Avoid high UV and broad-spectrum lights; warm lighting <2700k to be used where possible 2. Keep lighting close to the ground, directed and shielded to reduce light spill especially near retained forest 3. Restrict the entry of retained forest at night (1900-0700h) 4. Keep building height low at areas near retained forest where possible	Medium	Medium	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Apus nipalensis</i>	House swift	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ardea purpurea</i>	Purple heron	Least Concern	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor
Bird	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Medium	Medium	Less likely	Minor
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Medium	Medium	Less likely	Minor
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Medium	Medium	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Medium	Medium	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Low	Low	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Low	Slightly dependent on connected habitats for dispersal and adaptable to traverse urban infrastructures if needed	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Minor	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	High	High	Less likely	Minor
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Negligible	Very Low	Unlikely	Negligible
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Medium	Medium	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Considerable changes in waterbody that may affect connectivity for aquatic species	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	-	High	High	Possible	Moderate
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Plant flowering shrubs in parks and along the streets	Negligible	Very Low	Unlikely	Negligible
Mammal	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Negligible	Not dependent on connected habitats for dispersal and able to traverse urban infrastructure	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project		Negligible	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	Negligible	Very Low	Unlikely	Negligible
Mammal	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	Medium	Medium	Less likely	Minor
Mammal	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Mammal	<i>Unidentified Sciuridae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Mammal (bat)	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	Medium	Dependent on connected habitats for dispersal	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	Medium	Medium	Less likely	Minor
Mammal (bat)	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	High	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Mammal (bat)	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Odonata	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Ceragrion chaoi</i>	Fiery coraltail	Least Concern	Vulnerable	Yes	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Coeliccia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Drepanosticta quadrata</i>	Singapore shadowdamselfly	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact is not expected to affect this species during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR	High	High	Less likely	Minor
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Considerable changes in waterbody that may affect connectivity for aquatic species	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Considerable changes in waterbody that may affect connectivity for aquatic species	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Operational	Loss of/reduction in ecological connectivity for faunal movement	High	High	Highly dependent on connected habitats for dispersal	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project		Moderate	1. Retain vegetation to form a continuous 100m forested corridor at the periphery of the former Champions Golf Course to aid fauna movement 2. Re-establish connectivity outside the project area with CCNR and BTNR 3. Install culverts and structures to facilitate movement across roads	High	High	Less likely	Minor
Aculeata	<i>Amegilla insularis</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Anthidiellum smithii</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Ceratina fuliginosa</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Lipotriches takauensis</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile indonesica</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Megachile ramera</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Aculeata	<i>Parischnogaster unicuspata</i>	NA	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Alcedo atthis</i>	Common kingfisher	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Alcedo meninting</i>	Blue-eared kingfisher	Least Concern	Endangered	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Apus nipalensis</i>	House swift	Least Concern	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Ardea purpurea</i>	Purple heron	Least Concern	Endangered	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Chloropsis sonnerati</i>	Greater green leafbird	Endangered	Critically Endangered	No	Operational	Poaching	High	Medium	Species with negligible susceptibility to poaching	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Bird	<i>Chrysococcyx xanthorhynchus</i>	Violet cuckoo	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Collocalia affinis</i>	Plume-toed swiftlet	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Bird	<i>Copsychus malabaricus</i>	White-rumped shama	Least Concern	Endangered	Yes	Operational	Poaching	High	Medium	Species that are possibly susceptible to poaching; commonly traded as pets	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Bird	<i>Copsychus saularis</i>	Oriental magpie-robin	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Medium	Species that are possibly susceptible to poaching; commonly traded as pets	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Bird	<i>Corvus macrorhynchos</i>	Large-billed crow	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Cyornis brunneatus</i>	Brown-chested jungle flycatcher	Vulnerable	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Elanus caeruleus</i>	Black-winged kite	Least Concern	Vulnerable	No	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Halcyon coromanda</i>	Ruddy kingfisher	Least Concern	Critically Endangered	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Halcyon pileata</i>	Black-capped kingfisher	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Ixobrychus sinensis</i>	Yellow bittern	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Ketupa ketupu</i>	Buffy fish owl	Least Concern	Vulnerable	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Lanius cristatus</i>	Brown shrike	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Nisaetus cirrhatus</i>	Changeable hawk-eagle	Least Concern	Vulnerable	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Nycticorax nycticorax</i>	Black-crowned night heron	Least Concern	Endangered	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Ploceus philippinus</i>	Baya weaver	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Psilopogon rafflesii</i>	Red-crowned barbet	Near Threatened	Vulnerable	No	Operational	Poaching	High	Medium	Species that are possibly susceptible to poaching; commonly traded as pets	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Bird	<i>Psittacula longicauda</i>	Long-tailed parakeet	Vulnerable	Near Threatened	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Psittinus cyanurus</i>	Blue-rumped parrot	Near Threatened	Endangered	No	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Ptilinopus jambu</i>	Jambu fruit dove	Near Threatened	Vulnerable	Yes	Operational	Poaching	High	Medium	Species that are possibly susceptible to poaching; commonly traded as pets	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Bird	<i>Pycnonotus brunneus</i>	Asian red-eyed bulbul	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Bird	<i>Pycnonotus zeylanicus</i>	Straw-headed bulbul	Critically Endangered	Endangered	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Spilornis cheela</i>	Crested serpent eagle	Least Concern	Critically Endangered	No	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Strix seloputo</i>	Spotted wood owl	Least Concern	Vulnerable	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Bird	<i>Surniculus lugubris</i>	Square-tailed drongo-cuckoo	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Treron curvirostra</i>	Thick-billed green pigeon	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Bird	<i>Zosterops simplex</i>	Swinhoe's white-eye	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Medium	Species that are possibly susceptible to poaching; commonly traded as pets	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Butterfly	<i>Astictopterus jama jama</i>	Forest hopper	Not Listed	Endangered	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Catochrysops strabo strabo</i>	Forget-me-not	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Cephrenes acalle niasicus</i>	Plain palm dart	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Everes lacturnus rileyi</i>	Indian cupid	Not Listed	Endangered	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Halpe ormenes vilasina</i>	Dark banded ace	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas assamensis</i>	Great swift	Not Listed	Endangered	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Pelopidas conjunctus conjunctus</i>	Conjoined swift	Not Listed	Endangered	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Pemara pugnans</i>	Pugnacious lancer	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Pseudocoladenia dan dhyana</i>	Fulvous pied flat	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Rachana jalindra burbona</i>	Banded royal	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Taractrocera ardonia lamia</i>	Spotted grass dart	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Telicota augias augias</i>	Pale palm dart	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Butterfly	<i>Telicota linna</i>	Linna palm dart	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Butterfly	<i>Troides helena cerberus</i>	Common birdwing	Not Listed	Vulnerable	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Butterfly	<i>Ypthima pandocus corticaria</i>	Common three-ring	Not Listed	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Fish	<i>Betta imbellis</i>	Crescent betta	Least Concern	Endangered	Yes	Operational	Poaching	High	Medium	Species that are possibly susceptible to poaching; commonly traded as pets	Medium	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Medium	Medium	Less likely	Minor
Mammal	<i>Lutrogale perspicillata</i>	Smooth-coated otter	Vulnerable	Endangered	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
	<i>Macaca fascicularis</i>	Long-tailed macaque	Endangered	Least Concern	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
	<i>Manis javanica</i>	Sunda pangolin	Critically Endangered	Critically Endangered	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
	<i>Nycticebus coucang</i>	Sunda slow loris	Endangered	Endangered	Yes	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
	<i>Unidentified Scuriidae (flying)</i>	Unidentified flying squirrel	Least Concern	Endangered	Yes	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
	<i>Eonycteris spelaea</i>	Cave nectar bat	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Tylonycteris fulvida</i>	Lesser bamboo bat	Least Concern	Vulnerable	High	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Tylonycteris malayana</i>	Greater bamboo bat	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Amphicnemis gracilis</i>	Will-o-wisp	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Ceriatrigon chaoi</i>	Fiery coral-tail	Least Concern	Vulnerable	Yes	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Coellicia octogesima</i>	Telephone sylvan	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Copera vittata</i>	Variable featherlegs	Least Concern	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Devadatta argyroides</i>	Malayan grisette	Least Concern	Endangered	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Drepanosticta quadrata</i>	Singapore shadow-damselfly	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Gynacantha basiguttata</i>	Spoon-tailed duskhawker	Least Concern	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Lyriothemis cleis</i>	Bombardier	Least Concern	Endangered	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Macrogomphus quadratus</i>	Forktail	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Paragomphus capricornis</i>	Banded hooktail	Least Concern	Endangered	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
	<i>Pericnemis stictica</i>	Dryad	Least Concern	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible

Taxon	Receptor (scientific name)	Receptor (common name)	Global status (IUCN/CITES)	National status	Recorded species	Project Phase	Impact type	Sensitivity (S)	Impact intensity (I)	Rationale for impact intensity	Consequence (C = S × I)	Likelihood (L)	Rationale for likelihood	Key minimum controls	Impact significance (C × L)	Key mitigation measures	Residual impact intensity (I _R)	Residual consequence (C _R = S × I _R)	Residual likelihood (L _R)	Residual impact significance (C _R × L _R)
Odonata	<i>Podolestes orientalis</i>	Blue-spotted flatwing	Least Concern	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Prodasineura collaris</i>	Collared threadtail	Least Concern	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Prodasineura interrupta</i>	Interrupted threadtail	Not Listed	Critically Endangered	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Odonata	<i>Vestalis amethystina</i>	Common flashwing	Not Listed	Vulnerable	No	Operational	Poaching	High	Negligible	Species with negligible susceptibility to poaching	Very Low	Unlikely	Impact is not expected to affect this species during the operation phase of the project	Enact wildlife act	Negligible	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Negligible	Very Low	Unlikely	Negligible
Reptile	<i>Amyda cartilaginea</i>	Asian softshell turtle	Vulnerable	Vulnerable	No	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Reptile	<i>Cuora couro</i>	Malayan box terrapin	Endangered	Near Threatened	No	Operational	Poaching	High	High	Species that are highly susceptible to poaching; listed on CITES Appendix I or II	High	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Moderate	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	High	High	Less likely	Minor
Reptile	<i>Homalopsis buccata</i>	Puff-faced water snake	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor
Reptile	<i>Sibynophis melanocephalus</i>	Black-headed collared snake	Least Concern	Vulnerable	No	Operational	Poaching	High	Low	Species with low susceptibility to poaching; not commonly known to be traded as pets	Low	Possible	Impact could possibly happen or known to occur during the operation phase of the project	Enact wildlife act	Minor	1. Put up 'no poaching' signages and reminders of wildlife act 2. Conduct random patrols to ensure park visitors stay on designated trail and deter poaching activities	Low	Low	Less likely	Minor

CONSTRUCTION									
Pre mitigation					Post mitigation				
Impact Significance	Major	Moderate	Minor	Negligible	Major	Moderate	Minor	Negligible	Key minimum controls
Loss of/reduction in habitats and food sources	67	13	1	0	67	13	1	0	Demarcate working space to prevent excessive vegetation clearing
Accidental injury or mortality	0	9	72	0	0	0	81	0	Implement wildlife response plan and conduct pre-felling inspections before clearance
Human disturbance	0	38	35	8	0	0	73	8	Hoard up constrcution site
Human-wildlife conflict	0	9	7	65	0	0	16	65	Establish wildlife response plan
Light disturbance	20	53	0	8	0	0	73	8	Install noise barrier or opaque sheets at sufficient height along the hoarding to prevent light spillage into retained areas
Loss of/reduction in ecological connectivity for faunal movement	0	48	23	10	0	1	67	13	-
