**Design your own meadow memory: Take home a piece of the festival with you**

Join us for a hands-on workshop where creativity meets sustainability. Using offcuts from the meadow flowers from our installation, Take a walk through the meadow with me, craft personalised charms for yourself and your loved ones!

This workshop will explore how discarded materials have potential to be transformed into beautiful, functional pieces through thoughtful design.

Each participant will create a unique accessory whilst reflecting on the value of sustainability and creative reuse.

Take home not just a handmade charm, but a meaningful reminder of the installation's message — that with a little imagination, everyday waste can be turned into something truly special. This also echoes Singapore's ongoing journey as a “Nation by Design”, where thoughtful design can help us shape meaningful experiences and solutions for a more sustainable future.
