

From Evidence to Action: Transforming Advance Care Planning through Implementation Science in Singapore

Join us for **Session 2** of the Community of Practice (CoP) in Implementation Science (IS) for Geriatric Medicine as we explore **how IS principles were applied to develop Singapore's first national ACP Quality Framework**.

Participants can expect to gain practical insights on defining and prioritising implementation problems, navigating barriers, and engaging stakeholders, all grounded in the ACP Quality Framework as a live case study.

WHY JOIN OUR COP?

- Build practical Implementation Science knowledge and skills** to translate research into effective clinical practice.
- Learn from leading experts**, Professor Sharon Straus (Knowledge Translation Program, St. Michael's Hospital, Canada) and GERI's research team.
- Collaborate** with colleagues across Singapore's healthcare clusters to solve shared implementation challenges.

WHAT TO EXPECT?

- Hear **real-world examples** from fellow clinicians and researchers on **how IS is applied in real-world settings**
 - Got something to ask? Bring it!** Join open discussions with practitioners and researchers who may be facing the same challenges as you
- Our quarterly series covers topics in:*
- Preventive and care models** in geriatrics
 - Digital health/AI applications** in clinical practice to transform research insights into meaningful clinical impact

UPCOMING SESSIONS

Session 3: November 2026
Session 4: February 2027

PRESENTERS

A/Prof Tan Woan Shin

Deputy Executive Director & Lead Scientist
Geriatric Education & Research Institute (GERI)

Adjunct Associate Professor
Centre for Behavioural and Implementation Science Interventions (BISI)
Yong Loo Lin School of Medicine
National University of Singapore

Adj Asst Prof Raymond Ng

Senior Consultant & Chief
Palliative & Supportive Care,
Woodlands Hospital

Co-chair

National Advance Care Planning
Steering Committee
