

NATURE'S MIGHTY POLLINATORS!

Help pollinate the flowers by making your very own bumble bee pollinator!

ITEMS NEEDED:

Bee template

Flour

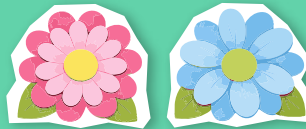

Tongue depressor

Black pipe cleaner

Bottle caps x 2

Paper flower template x 2

Glue

Scissors

INSTRUCTIONS:

Step 1

Glue the bee to one end of the craft stick.

Step 2

Cut the pipe cleaner in half. Wrap both pieces around the stick under the bee to make legs.

Step 3

Cut out the flowers from the template given and glue a bottle cap in the centre of each flower.

Step 4

Put flour (this is pollen) in one bottle cap. Dip the bee's legs in the powder and observe how it clings onto the pipe cleaner.

Step 5

Fly the bee to the second flower.

Step 6

Watch the powder transfer!

NATURE'S MIGHTY POLLINATORS!

DESIGN TEMPLATE

DID YOU KNOW?

As bees fly from flower to flower, the hairs on their bodies attract and trap pollen grains, which they then transfer to the pollen baskets for transport back to the hive.
