NUHS@Home

Hospital care in the comfort of your home

IT'S GREAT TO BE @HOME!

Am I suitable for hospital-at-home care with NUHS@Home?

NUHS@Home is for patients who are stable enough to be at home but still need hospital level care. Your doctor will assess your suitability for this service before enrolling with us.

How to begin:

Our NUHS@Home team will assess your needs and safety to ensure that you are suitable to receive hospitalisation care at home.

Once you are accepted into our programme, our team will make all the arrangements, and you can start your home recovery journey.

Your Care at Home

What Happens During Home Recovery?

Our multi-disciplinary medical team will look after you while you recover in the comfort of your own home.

1 Doctors will monitor your care.

They will oversee your treatment and check on your recovery process through daily video consultations or home visits where necessary.

2 Nurses will come to your home.

During these home visits, they will carry out procedures such as blood tests or administer IV drips as well as regular medical checks.

3 Therapists can do home visits too!

If your condition requires, we can bring physio and occupational therapy, rehabilitation and even nutrition support to your home.

Once you recover, you will be discharged from our care, just like you would be from a hospital stay.

Why Stay Home to Get Well?

Better recovery in familiar surroundings

Promotes faster healing with less stress, and reduced risk of hospital acquired infections.

Home is where the heart is

No restrictive visiting hours – just your loved ones, home-cooked meals and warmth!

Same treatment without the inconvenience

Our medical team brings treatment and care right to your doorstep.

Same subsidies as in-patient hospital care

NUHS@Home enjoys the same subsidies (i.e. MediSave and MediShield) and insurance coverage as in-hospital treatment.

Ready to see if you are eligible?

Thousands of patients in Singapore have already opted to be safely cared for in the comfort of their homes.
