

Are you timely privileged?

San See Wong, Salihah Begum, Heiser Kuah, Sylvia Leow, Tse Ert Chua, Khema Han, Raymond Teo, Marjorie Foo, Jeffrey Ong, Joanne Ng, Singapore General Hospital

INTRODUCTION

The manual generation of Annual Privileging (specialists accorded clinical privileges in Singapore General Hospital) Reports required substantial time and man-hours. Utilization of coding to improve the work process.

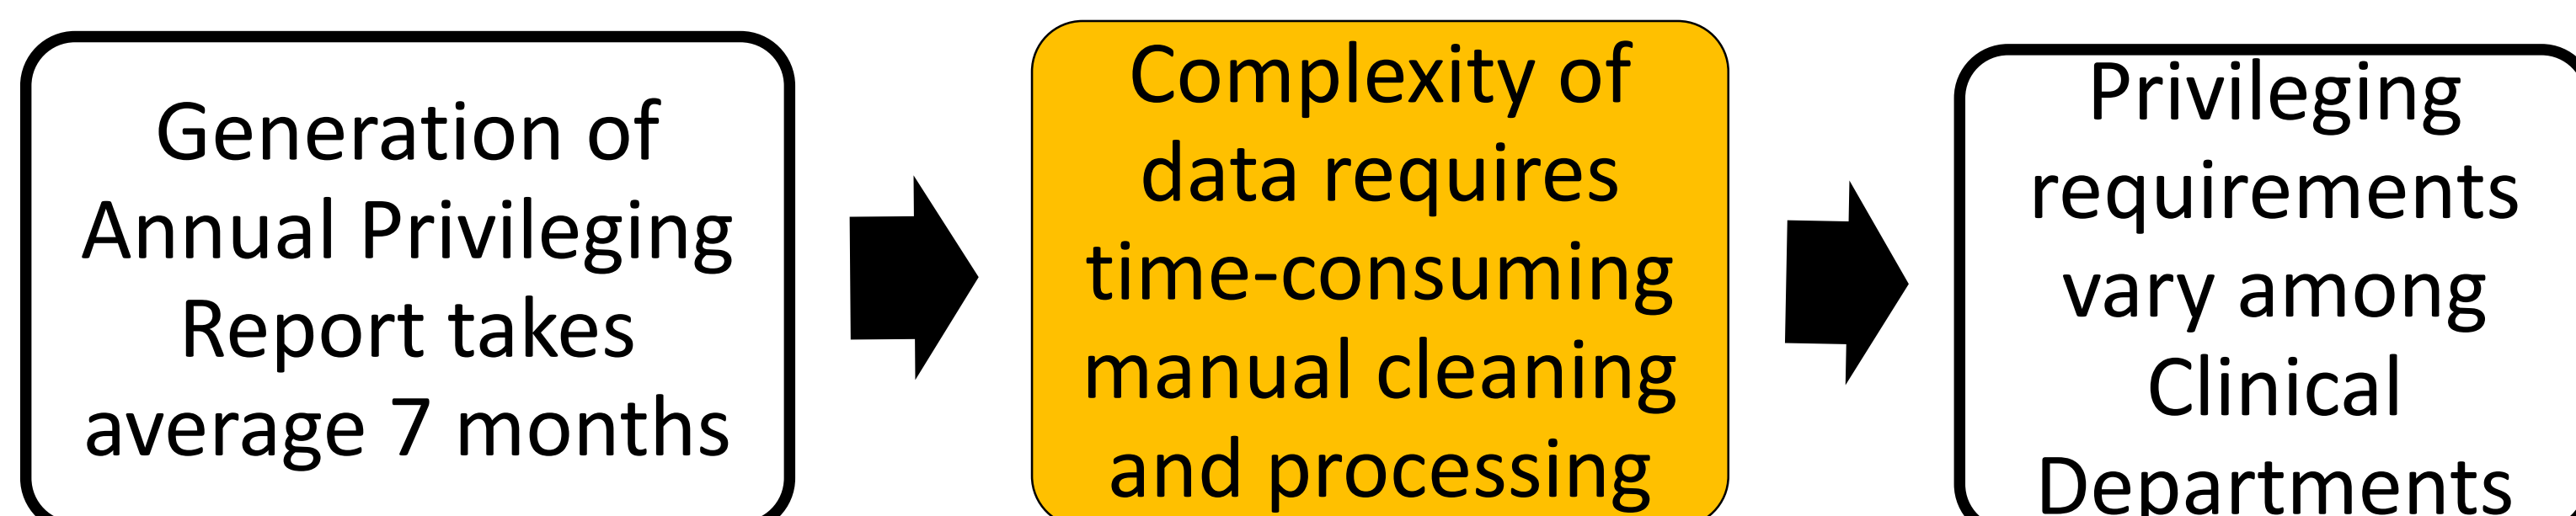

OBJECTIVES

AUTOMATE PROCESS. AMELIORATE TIME. ACCURATE RENEWAL.

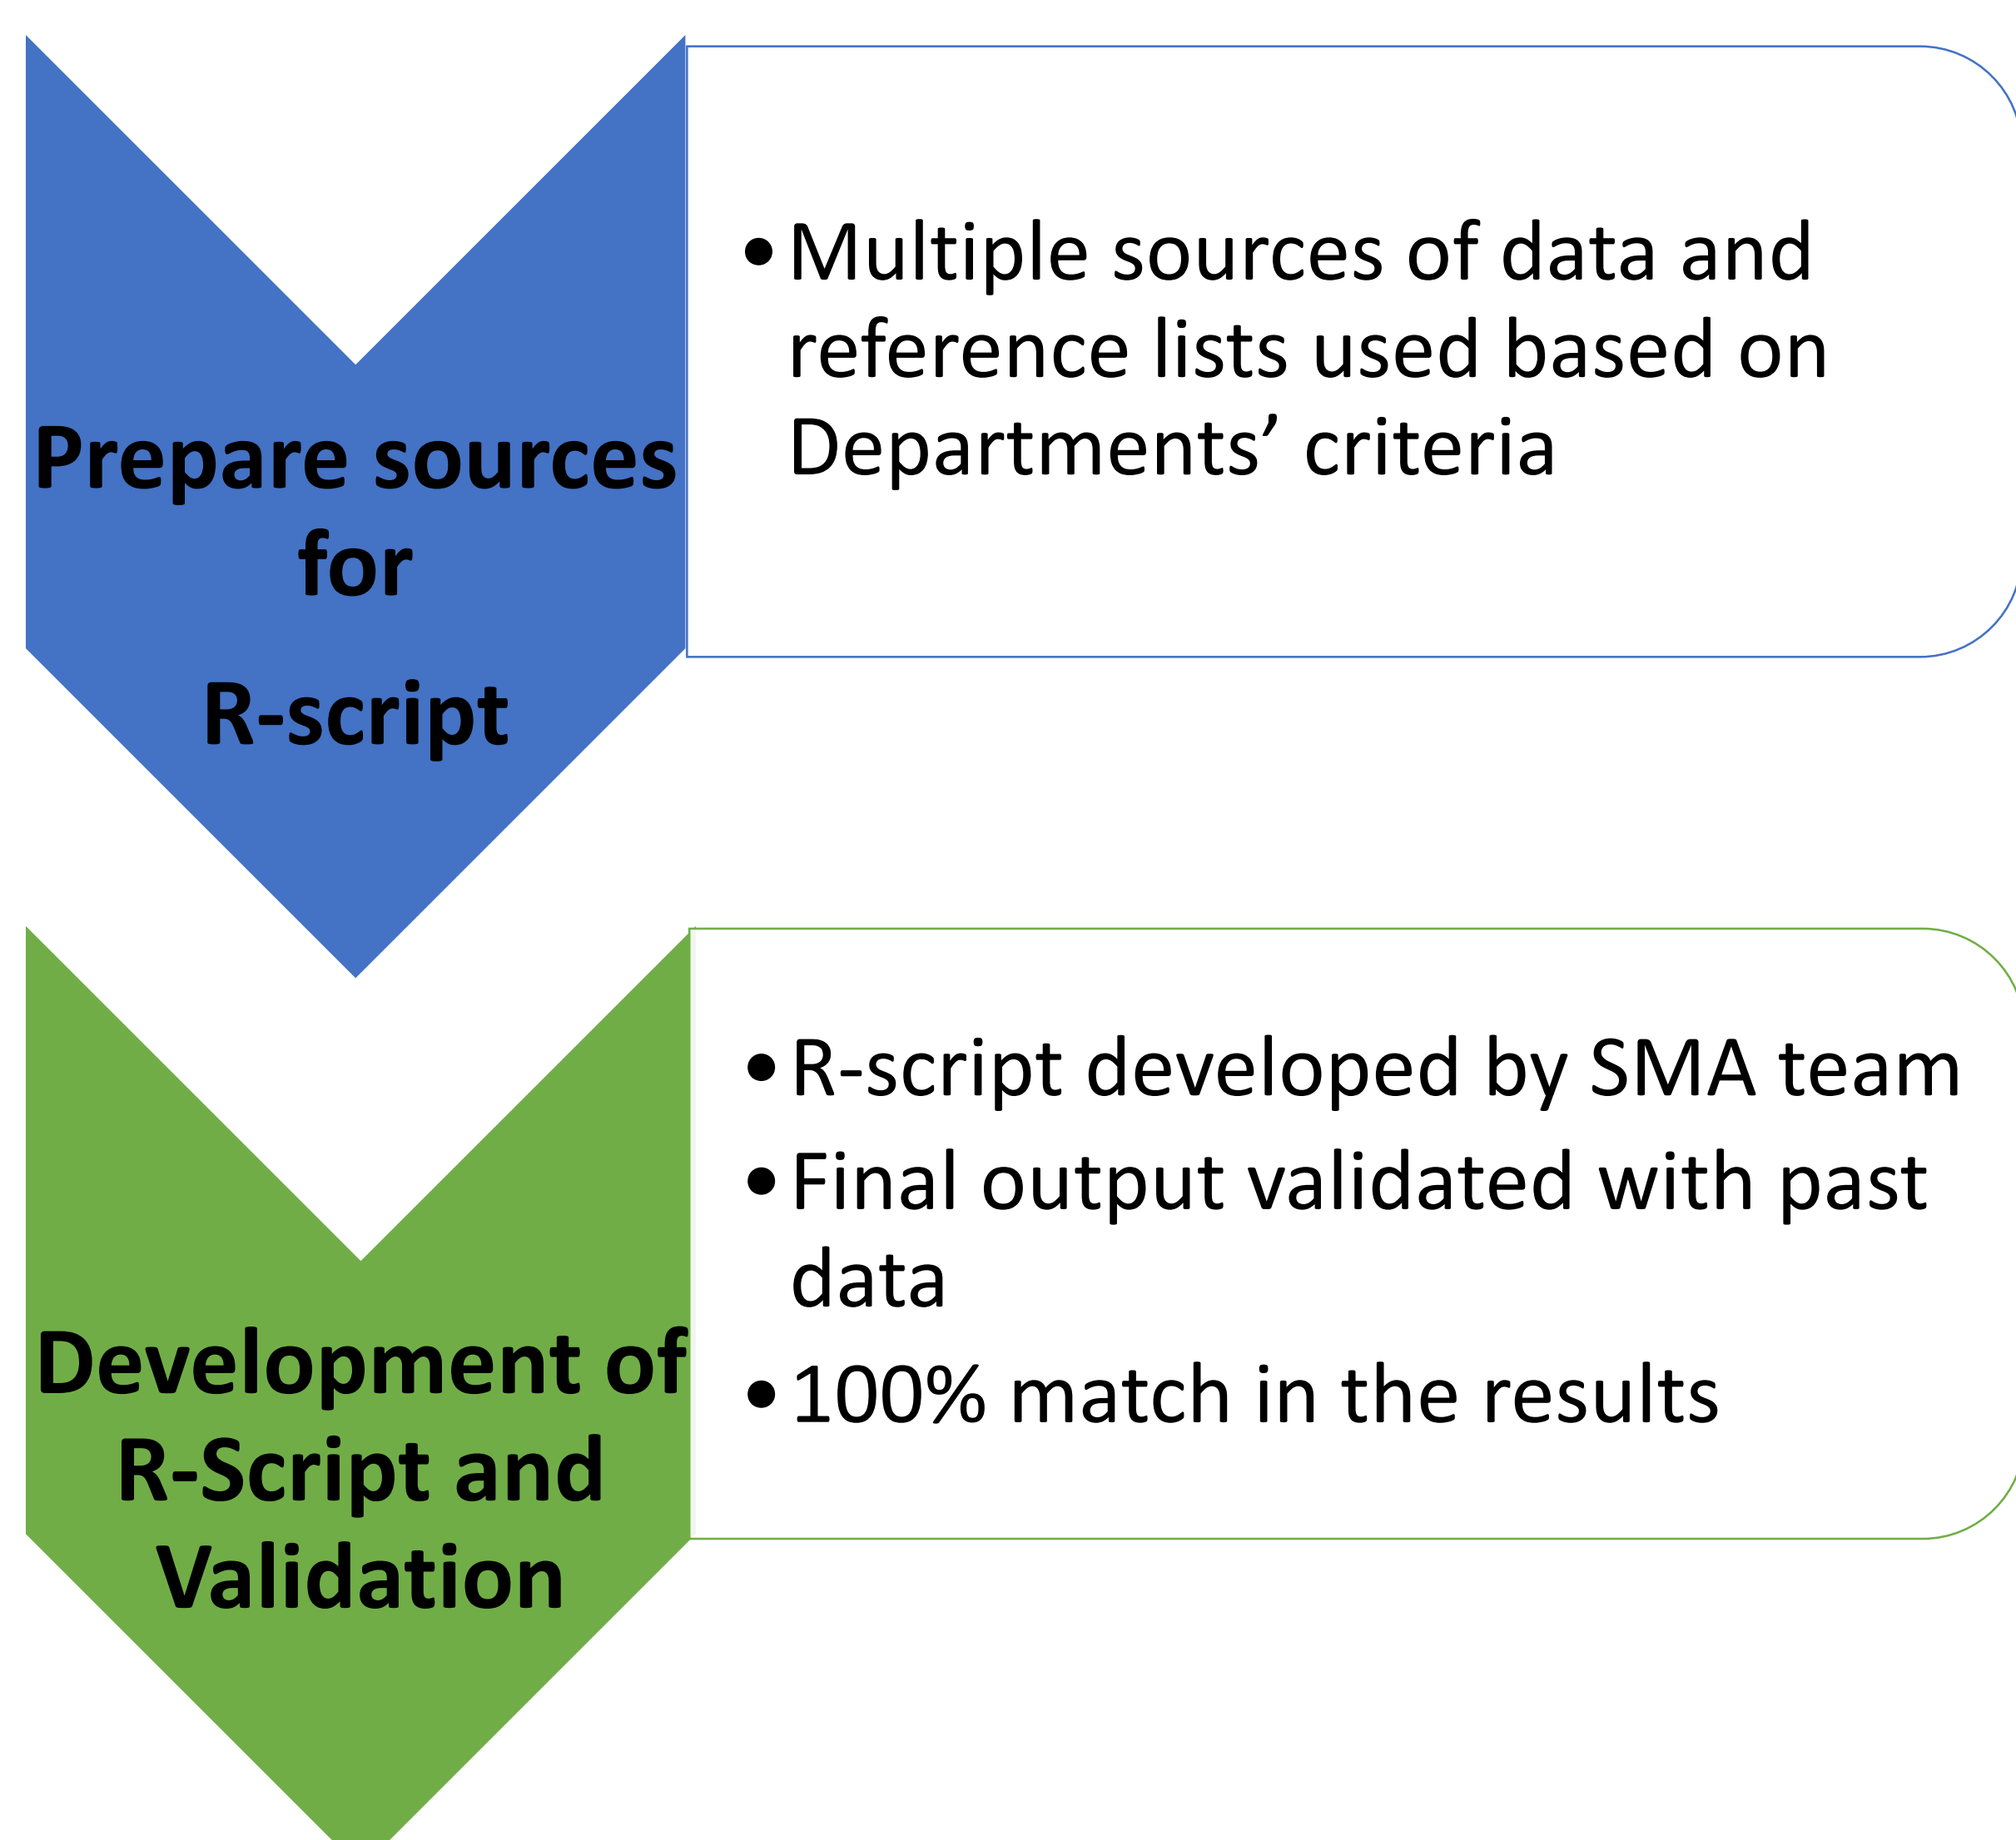

- ✓ Align IT capabilities by utilizing coding
- ✓ Streamline work process
- ✓ Improve report turnaround time
- ✓ Timely renewal of clinical privileges

METHODOLOGY

Members from Patient Safety & Clinical Standards and Strategy Management & Analytics (SMA) reviewed the current data tabulation process.

Team utilised R-script to process data and generate the Annual Privileging Reports

Before development of R-script

Manual data cleaning, processing using formulas, pivot tables

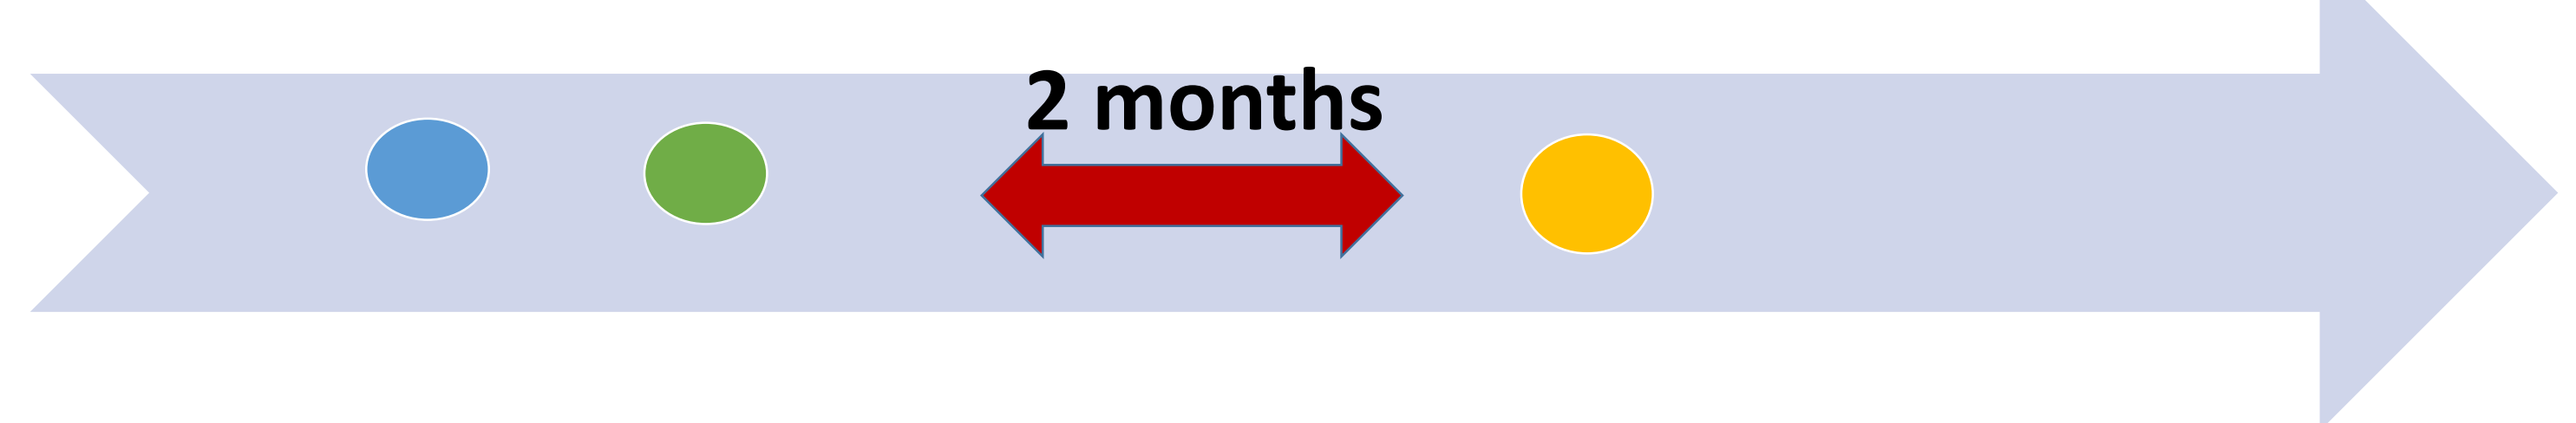

Manual input of data onto reports

After development of R-script

Input data to R-script and run the codes

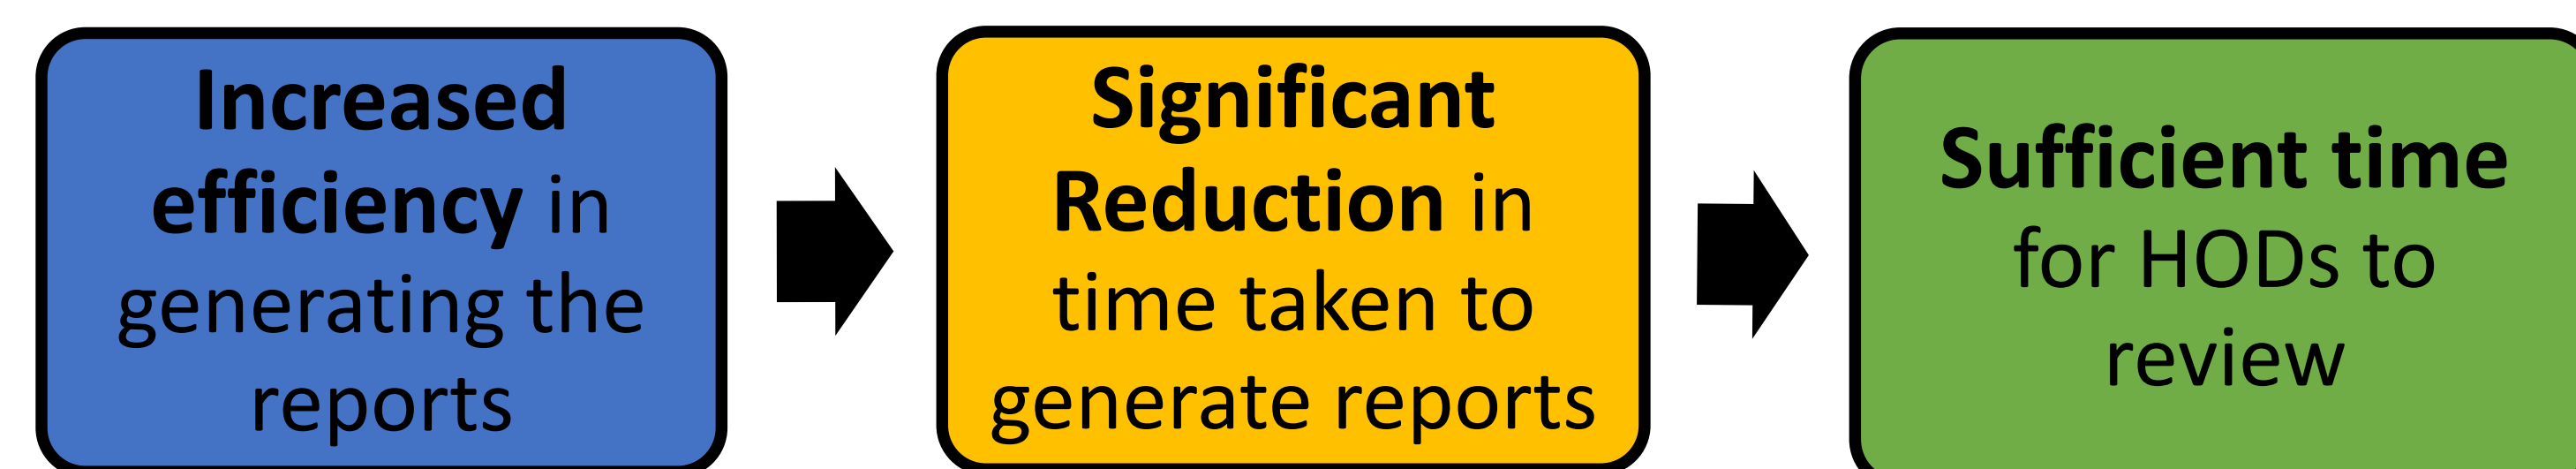

Transfer output onto report templates

RESULTS

Man-hours saved = 400

CONCLUSION

Harnessing information technology, team has:

1. enhanced productivity and efficiency
2. streamlined the data processing and analysis
3. improved turnaround time in report generation
4. timely renewed clinical privileges

Future utilization of coding to generate other reports to facilitate privileging works.
