

# PHARMACY SMART INTERFACE SYSTEM (PHARMASIS)

TEAM MEMBERS: DELICIA NGUI SUI YUN, PRIYANKA RAI, CHOY CARLYNNE, CHIN WENYING, VERNON CHEN YI LIANG, KARENHAY KAI XIN, SMARTRX VENDORS

Revolutionizing outpatient care with an innovative vending machine solution, offering both Pharmacy -Only Medications (PMEDs) and over-the-counter remedies (GSL) to conveniently address minor ailments.

## PROBLEM & SOLUTION SUMMARY

First vending machine approved by HSA to supply P-meds.

Patients may browse a range of P-meds and GSL items.

A teleconsultation session will be held remotely to allow pharmacist on duty to assess the suitability of medications and approve sales of P-Meds.

Payment may be made via cashless means (NETS, Visa, etc).

Cameras placed in strategic areas in the machine allow the pharmacist to verify medications remotely before approving collection.

Developed safety feature whereby pharmacist can intervene collection of items by clearing it to the 'uncollected medications' compartment.

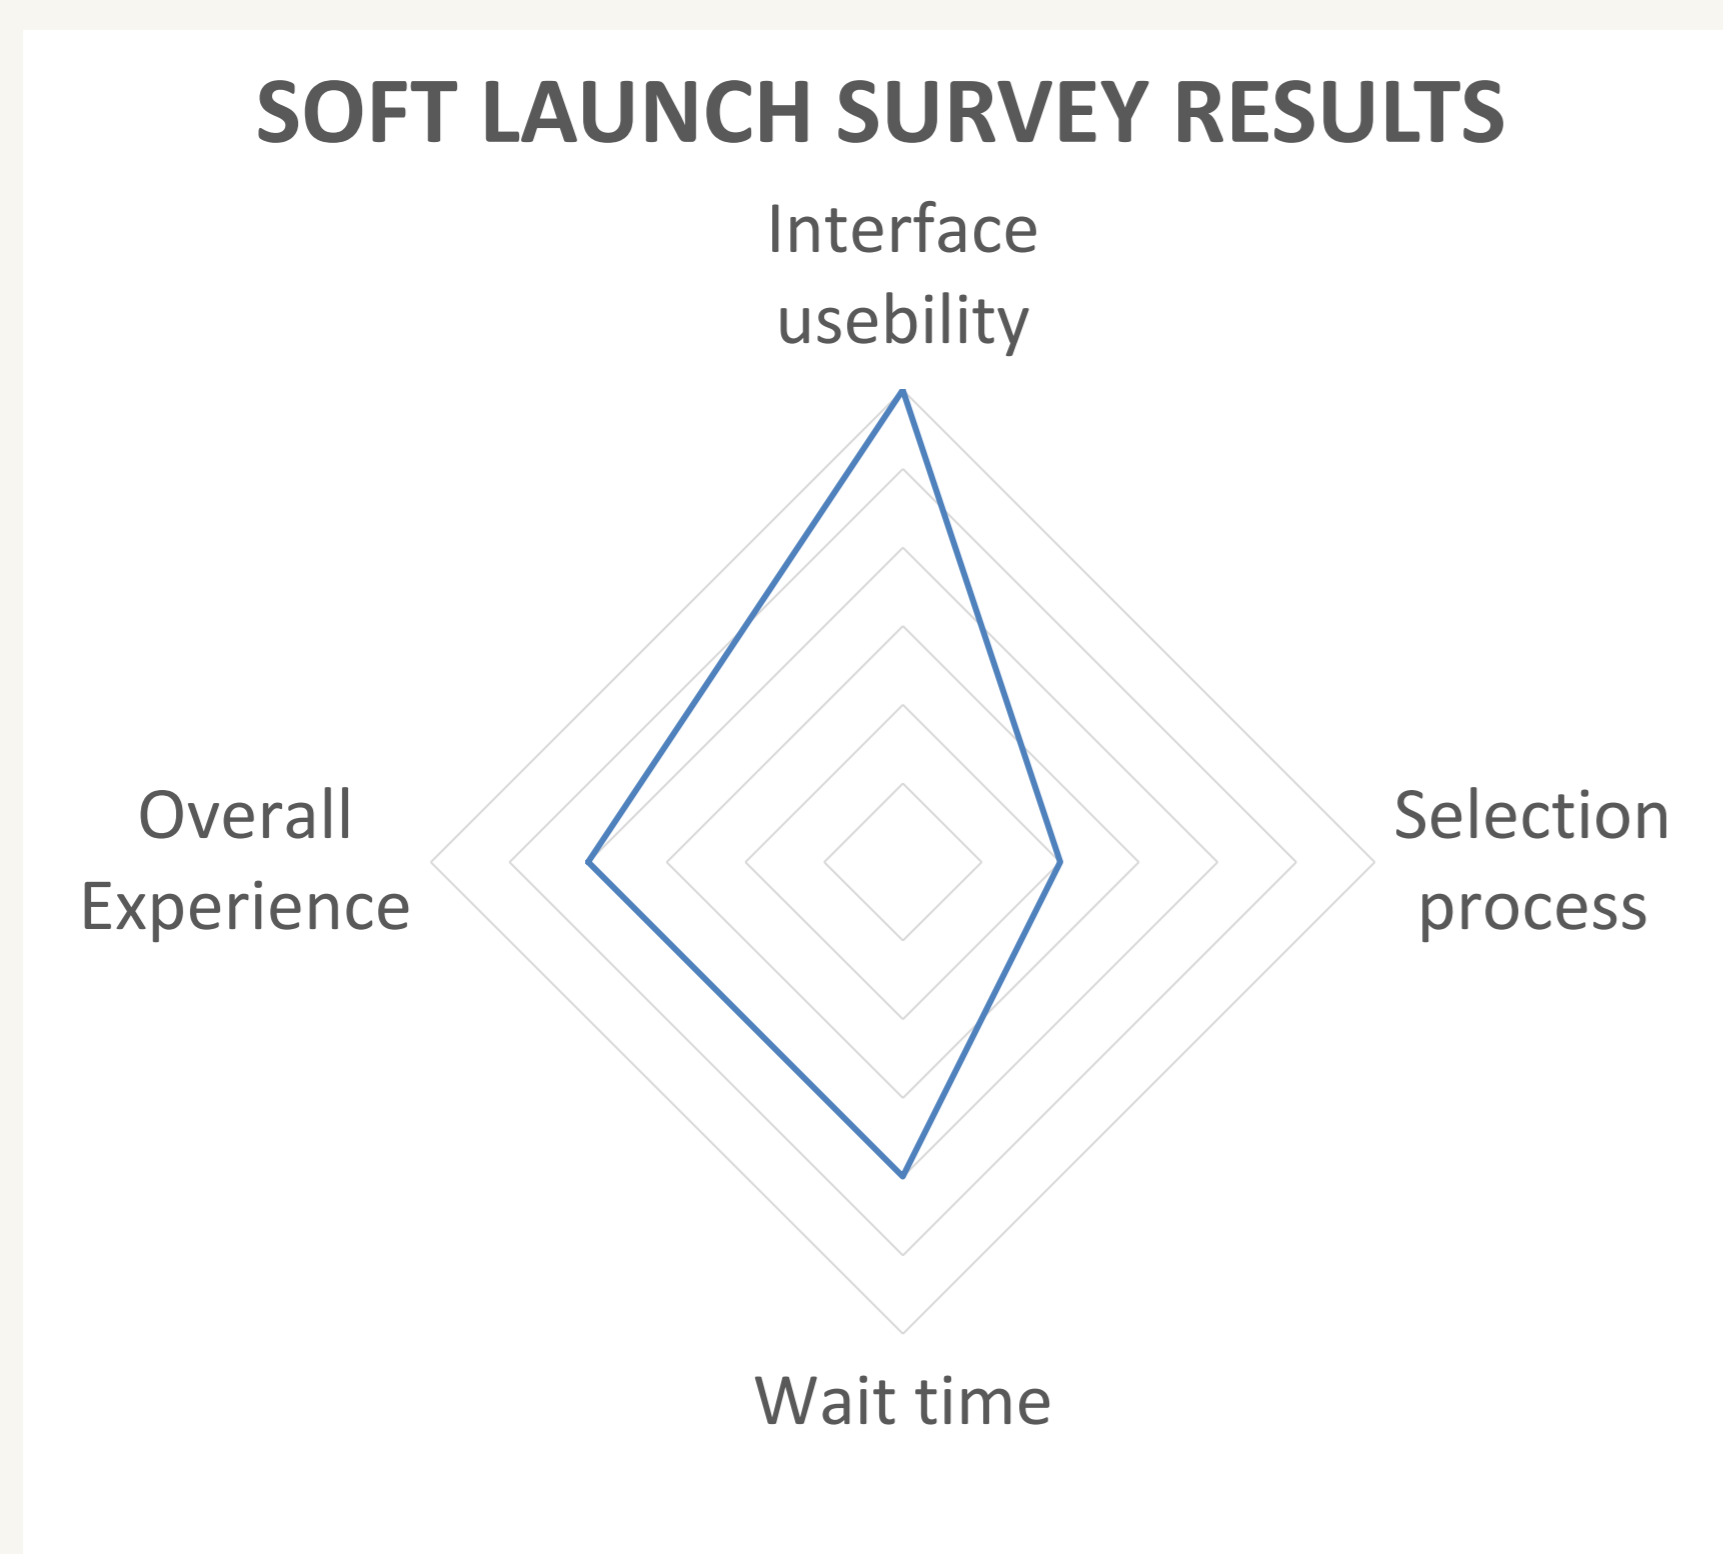

## OUTCOMES

- Patient-focused
- Healthcare provider-focused

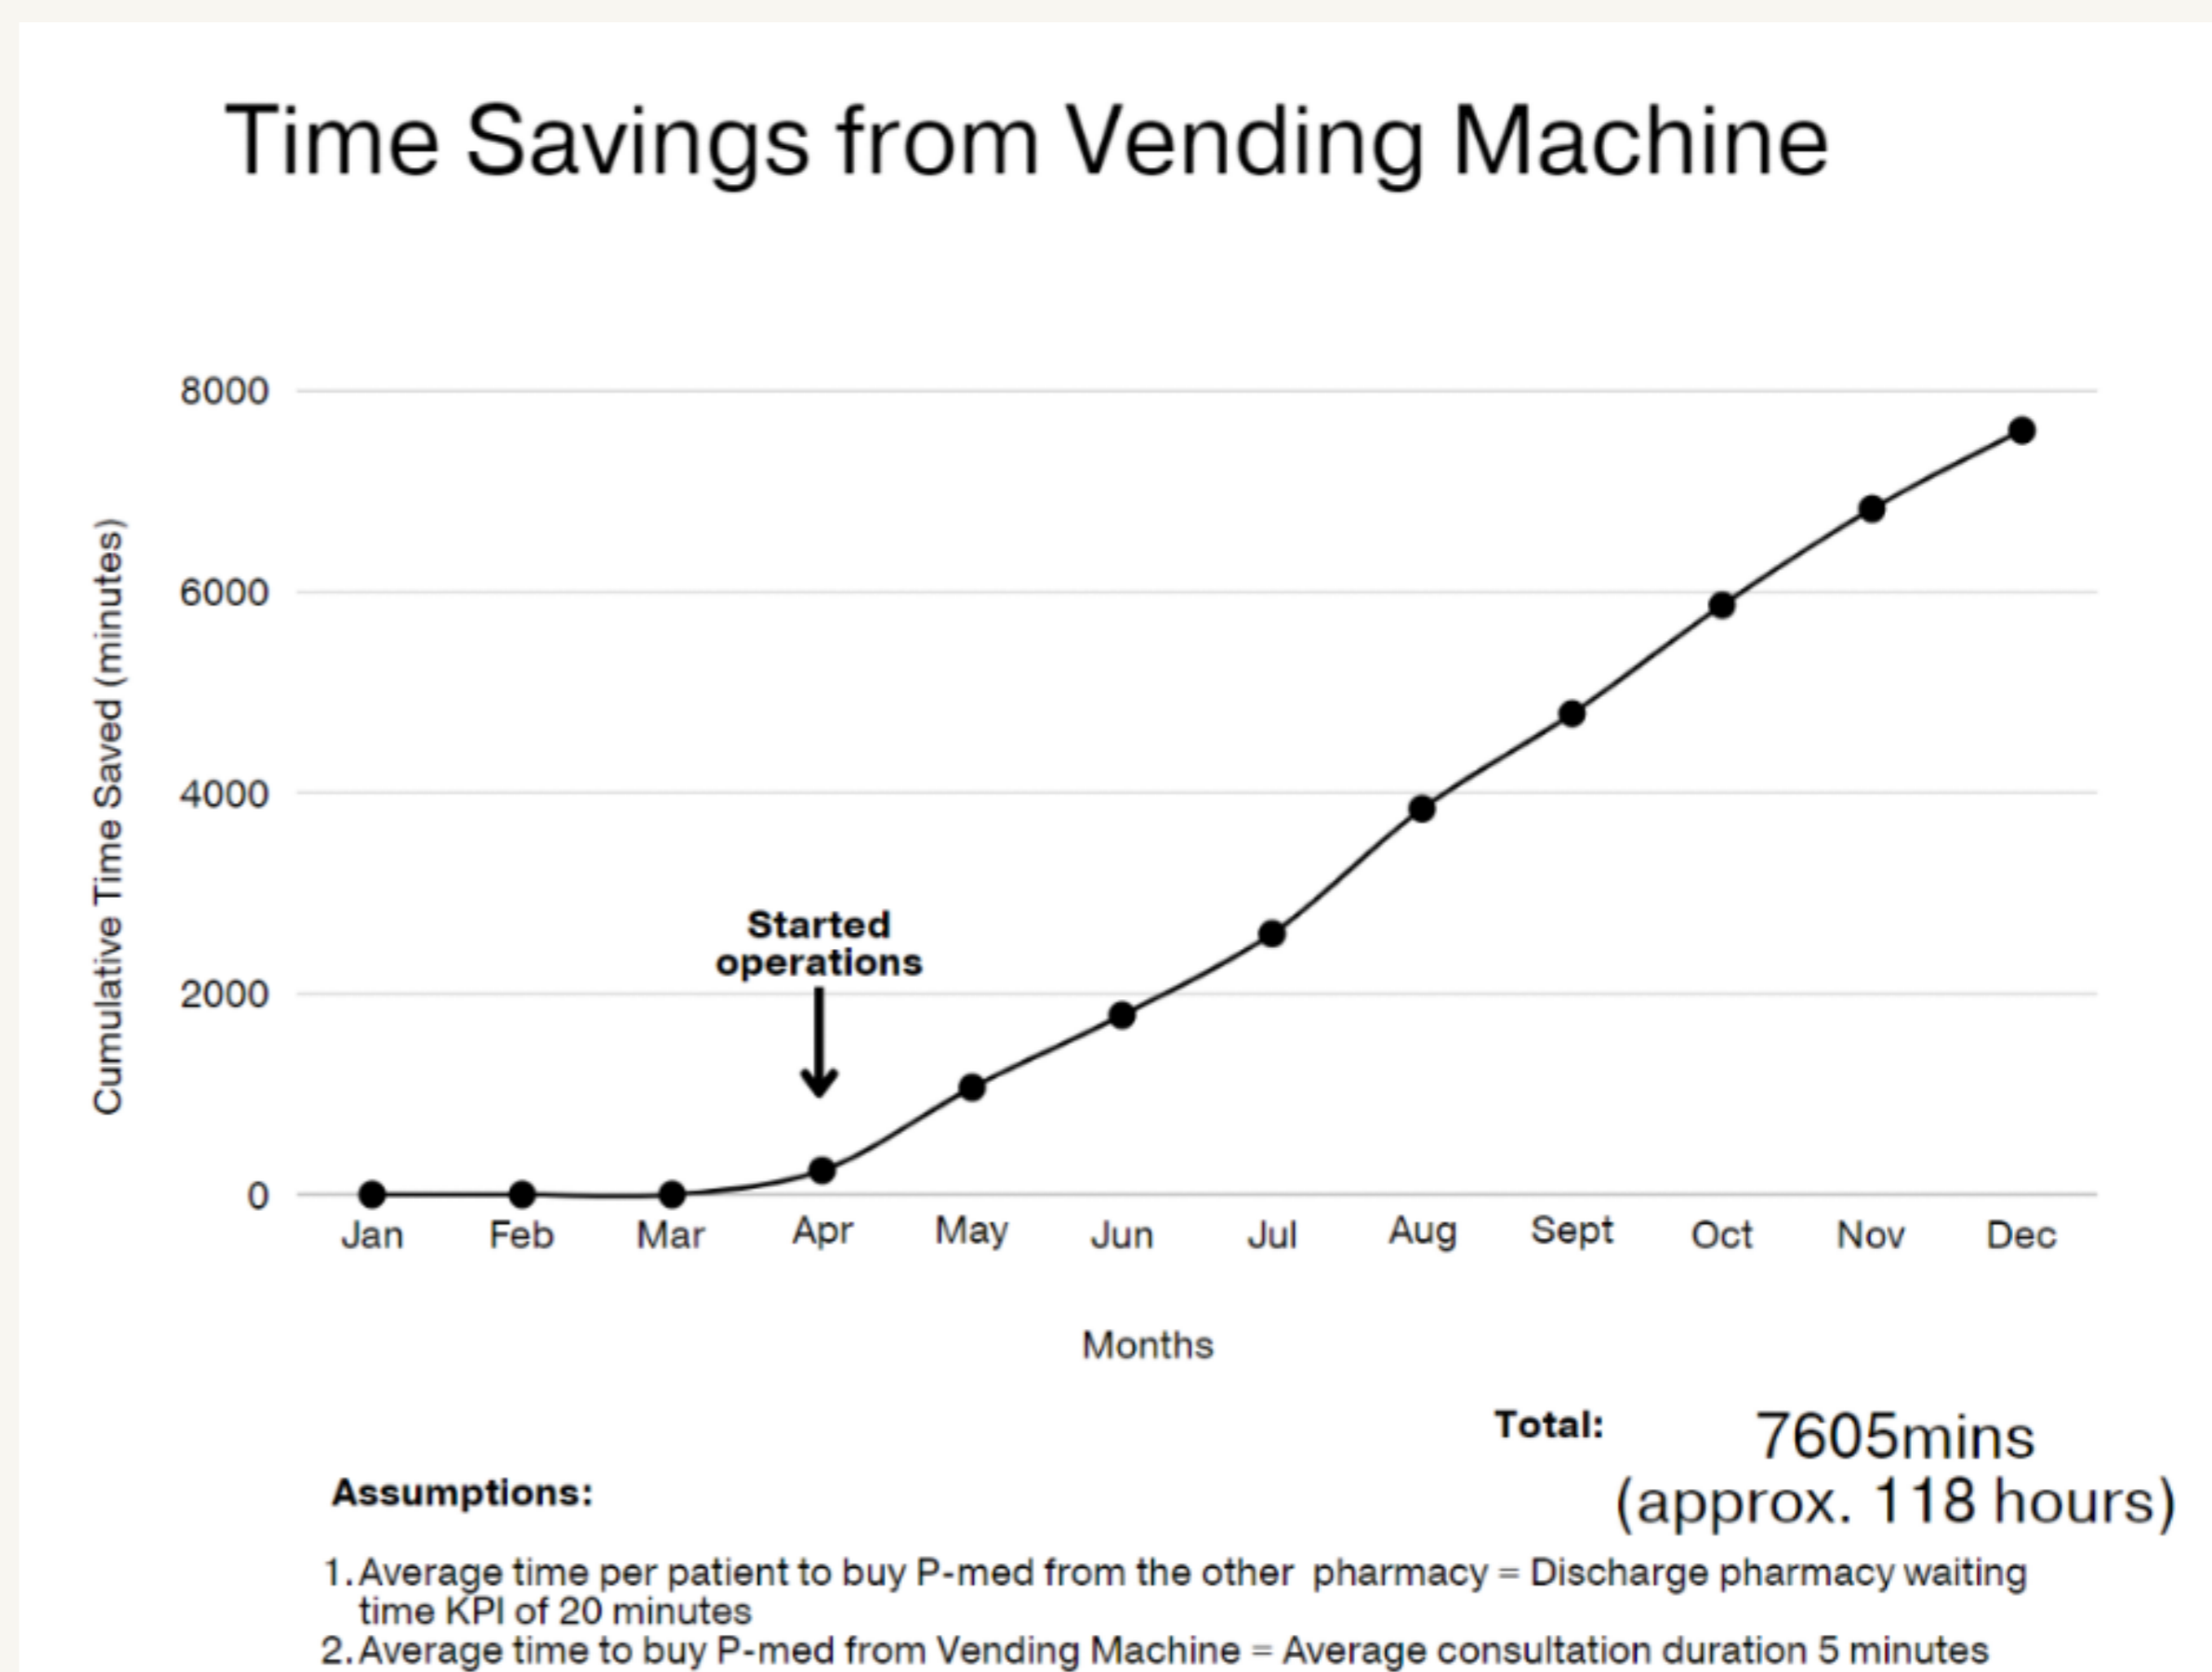

ENHANCED ACCESSIBILITY & IMPROVED CONVENIENCE

REDUCED WAITING TIME

REDUCED WORKLOAD FOR HEALTHCARE PROFESSIONALS

Satisfaction survey results on different aspects of usage of PharmaSIS out of score of 5, Jan-Oct 2023

## FUTURE SCALE-UP

Extended service hours

Upon expansion of services, we aim to allow services to run round the clock to cater to a wider community

Expanding use towards Healthier Sg

Plans to utilise dispensing abilities to complement Smoking Cessation efforts by dispensing Nicotine Replacement items coupled with counselling by Pharmacist.
