

Plain English Summary

Botulinum toxin A for treating cervical dystonia

What does the guidance say?

Botulinum toxin type A (Botox and Dysport) is recommended for listing on the Medication Assistance Fund (MAF) for government subsidy for adults with cervical dystonia.

What is cervical dystonia?

Cervical dystonia is a painful movement disorder that causes the muscles in the neck to abnormally contract, affecting the position of the head. The head often tilts or twists to one side. Difficulties in controlling the position of the head can cause severe pain and discomfort, headaches and muscle spasms.

What is botulinum toxin A?

You may know botulinum toxin A as Botox, Dysport or Xeomin. It is given as a series of injections to help relax muscle contractions.

How much botulinum toxin A can I take?

Your doctor will administer botulinum toxin A injections at affected areas at the required dose. The effects of the injection will start to work within a few days. Muscle relaxation typically lasts for around three months and treatment is repeated when symptoms return.

As cervical dystonia is a life-long condition for most patients, treatment with botulinum toxin A is usually continued for as long as the patient continues to have a good response.

Who can have botulinum toxin A?

Adults who have cervical dystonia can have botulinum toxin A (Botox or Dysport).

Your doctor can advise if botulinum toxin A is a suitable treatment for you.

Plain English Summary

Botulinum toxin A for treating cervical dystonia

Why was botulinum toxin A recommended for subsidy?

ACE evaluates how well a treatment works in relation to how much it costs compared to other treatments. Botulinum toxin A (Botox and Dysport) was recommended for subsidy because its benefit in relieving symptoms and improving quality of life for adults with cervical dystonia justifies its cost.

Other brands of botulinum toxin A were not recommended for subsidy.

What does listing on the MAF mean for me?

The MAF helps people pay for treatments that are clinically effective and cost effective. If your doctor prescribes botulinum toxin type A (Botox or Dysport) for you, and you meet the MAF criteria, your treatment cost will be subsidised by 40% to 75%.
