

## Technology Guidance

# Trastuzumab deruxtecan

**for unresectable or metastatic HER2-positive solid tumours  
after at least one prior line of systemic therapy**

Technology Guidance from the MOH Drug Advisory Committee

## Guidance Recommendations

The Ministry of Health's Drug Advisory Committee has not recommended trastuzumab deruxtecan (T-DXd) for inclusion on the MOH List of Subsidised Drugs for treating patients with unresectable or metastatic human epidermal growth receptor 2 (HER2)-positive solid tumours who show progression after at least one prior systemic treatment and who have no satisfactory alternative treatment options. The decision was based on uncertainties in the positioning of T-DXd relative to current management, its clinical and cost effectiveness across different cancer types, and its uncertain budget impact.

*Clinical indication, subsidy class and MediShield Life claim limit for T-DXd are provided in the Annex.*

Published: 6 February 2026

## ANNEX

### Recommendations by the MOH Drug Advisory Committee

Drug preparation	Company-proposed clinical indication	Subsidy class	MediShield Life claim limit per month
Trastuzumab deruxtecan powder for concentrate for solution for infusion 100 mg	Treatment of adult patients with unresectable or metastatic HER2-positive (IHC 3+) solid tumours who show progression after at least one prior systemic treatment and who have no satisfactory alternative treatment options.	Not recommended for subsidy	Not recommended for MediShield Life claims

Abbreviations: HER2, human epidermal growth receptor 2; IHC, immunohistochemistry.

 Agency for Care Effectiveness - ACE  Agency for Care Effectiveness (ACE)

#### About the Agency

The Agency for Care Effectiveness (ACE) was established by the Ministry of Health (Singapore) to drive better decision-making in healthcare through health technology assessment (HTA), clinical guidance, and education.

As the national HTA agency, ACE conducts evaluations to inform government funding decisions for treatments, diagnostic tests and vaccines, and produces guidance for public hospitals and institutions in Singapore.

The guidance is not, and should not be regarded as, a substitute for professional or medical advice. Please seek the advice of a qualified healthcare professional about any medical condition. The responsibility for making decisions appropriate to the circumstances of the individual patient remains with the healthcare professional.
