

Selpercatinib

for locally advanced or metastatic *RET*-fusion positive non-small-cell lung cancer

Technology Guidance from the MOH Drug Advisory Committee

Guidance Recommendations

The Ministry of Health's Drug Advisory Committee has not recommended selpercatinib for inclusion on the MOH List of Subsidised Drugs for treating adult patients with locally advanced or metastatic non-small-cell lung cancer with a *rearranged during transfection (RET)* gene fusion. The decision was based on selpercatinib being unlikely to represent an acceptable use of healthcare resources at the price proposed by the company.

Clinical indication, subsidy class and MediShield Life claims eligibility for selpercatinib are provided in the Annex.

ANNEX

Recommendations by the MOH Drug Advisory Committee

Drug preparation	Approved clinical indication	Subsidy class	Eligible for MediShield Life claims (implementation date)
Selpercatinib 40 mg, 80 mg capsules and tablets	Monotherapy for the treatment of adult patients with locally advanced or metastatic non-small-cell lung cancer (NSCLC) with a <i>RET</i> gene fusion.	Not recommended for subsidy	Yes ¹ (1 Sep 2026)

Abbreviation: *RET*, *rearranged during transfection*.

¹ Please refer to [MOH's website](#) for the MediShield Life claim limit starting from the implementation date.

 Agency for Care Effectiveness - ACE  Agency for Care Effectiveness (ACE)

About the Agency

The Agency for Care Effectiveness (ACE) was established by the Ministry of Health (Singapore) to drive better decision-making in healthcare through health technology assessment (HTA), clinical guidance, and education.

As the national HTA agency, ACE conducts evaluations to inform government funding decisions for treatments, diagnostic tests and vaccines, and produces guidance for public hospitals and institutions in Singapore.

The guidance is not, and should not be regarded as, a substitute for professional or medical advice. Please seek the advice of a qualified healthcare professional about any medical condition. The responsibility for making decisions appropriate to the circumstances of the individual patient remains with the healthcare professional.
