¹ Type of interest can be classified under “direct interest” or “indirect interest”. Direct interest refers to direct commitment, involvement, investment, relationship or obligation where there may be material benefit gained by the individual that may influence his/her judgement in the issues being considered by the group. Indirect interest refers to indirect commitment, involvement, investment, relationship or obligation that may be perceived to be of a material benefit even when no actual benefit was derived and influence the person’s judgment in the issues being considered by the group.
