

Dear Healthcare Partner,

Explore the latest from ACE — clinical guidelines, health technology guidance, horizon scanning reports, and patient resources, all designed to support evidence-based care in practice.

AT A GLANCE THIS MONTH

- Clinical guidelines on knee osteoarthritis and stroke rehabilitation
- Patient resources for positive airway pressure (PAP) systems
- Learning modules on health technology assessment (HTA)
- Guidance documents on diagnostic and therapeutic technologies

Highlights

This month focuses on guidance for common conditions and strengthening the use of real-world evidence in practice.

New clinical guidelines to help inform the standard of care, click to find out more:

- [ACE Clinical Guideline \(ACG\): Management of knee osteoarthritis](#)
- [G4G-validated guideline: Singapore stroke rehabilitation guideline](#)

Latest News: ACE position statement on real-world data and evidence (RWD/RWE)

This sets out ACE's approach to the use of RWD and RWE in HTA, including the contexts in which such evidence may be needed or valuable for evaluating health technologies.

Patient Resources

New resources to support patient conversations:

- Factsheet on "[Positive airway pressure systems for obstructive sleep apnoea](#)"
- Learning module on "[How is the PICO framework used in HTA?](#)"
- Learning module on "[How is clinical effectiveness assessed in HTA?](#)"
- [CEE Updates \(April 2026\)](#) issue

💡 Supports explanation of treatment options and shared decision-making

Clinical Guidelines

ACE Clinical Guideline (ACG):

- [Management of knee osteoarthritis – a joint effort with patients](#)

Guidelines with ACE-Validated Methodology:

- [Singapore stroke rehabilitation guideline – an adaptation of the Australian and New Zealand living clinical guidelines for stroke management](#)

🎓 Read the ACE Clinical Guideline (ACG) to earn 1 CME/CPE point

Health Technology Guidance & Horizon Scanning Briefs

Latest assessments and early insights of emerging health technologies to support clinical, funding and planning decisions:

NEW

Medical Technology Guidances:

- [Positive airway pressure for moderate-to-severe obstructive sleep apnoea](#)
- [Artificial intelligence-enabled electrocardiogram \(AI-ECG\) to detect reduced left ventricular ejection fraction](#)

Horizon Scanning Briefs:

- [DermaSensor as an adjunctive diagnostic tool for lesions suspicious for skin cancer](#)
- [Biology-guided radiotherapy for treatment of lung or bone tumour in adults](#)
- [Symani surgical system for open microsurgery](#)

UPDATED

Drug Guidances:

- [Blinatumomab for treating relapsed or refractory B-precursor acute lymphoblastic leukaemia](#)
- [Nivolumab for treating gastroesophageal cancers](#)
- [Nirmatrelvir and ritonavir combination for treating mild-to-moderate COVID-19](#)

Cancer Drug Reviews:

- [Review of cancer drugs for Acute Lymphoblastic Leukaemia](#)
- [Review of cancer drugs for previously treated advanced gastric cancer](#)
- [Review of cancer drugs for treating advanced urothelial carcinoma](#)

List of Subsidised Drugs:

- [Update of MOH List of Subsidised Drugs for various cancer conditions](#)
